

## Welcome

At Robina High State School we offer an education suitable for the development of the individual student in the CARE of the Robina family. We have created a friendly environment based on traditional community values. We recognise that one size does not fit all, thus we provide each student with the opportunity to pursue a unique pathway that assists him or her in reaching specific life goals. From Years 8 &ndash; 12 students have many opportunities to engage in academic, civic, sporting, creative and personal endeavours, while being supported by the caring relationships provided by teachers and support staff through our House system.

Our extensive range of subjects can be combined in a variety of ways to allow each student to focus on individual talents and skills, whether the aim is a fast tracked academic excellence program, a vocationally orientated apprenticeship program or any other combination of subjects, Robina High State School can meet your child's learning needs. Our flexible school timetable enables students to balance their study, work and family responsibilities more easily.

Through Robina's numerous excellence sporting, recreational, cultural and international programs, students are nurtured in order to further consolidate skills, explore new areas and discover untapped talents.

We value excellence and expect our students to achieve their personal best in all endeavours.

Ross Smith
