

About Robina State High School

Robina State High School is a co-educational state school located on the Gold Coast. The total enrolment is approximately 1460 from years 8 to 12. We have a wide range of curriculum offerings including authority, non-authority and vocational subjects structured over a 4-day week in the senior school and a comprehensive range of subjects structured under Key Learning Areas (KLAs) in the junior school. Our extra-curricular activities include a wide range of cultural programs.

The staff development priorities fall under the framework of CIASa Accreditation (Council of Internationally Accredited Schools Australia). This process is a highly effective means of initiating and maintaining school improvement and demonstrating adherence to a set of publicly stated standards including strategies for parental feedback into the future direction of the school and their child's education.

Please refer to the Annual Report and associated documents for specific information regarding retention rates, opinion surveys and school progress towards its goal for the year.
