Introduction

The purpose of this guide is to support schools through the provision of a resource that guides students and parents/carers in Years 11 and 12 subject selection. It includes a comprehensive list of all Queensland Curriculum and Assessment Authority (QCAA) subjects that form the basis of a school's curriculum offerings.

Schools design curriculum programs that provide a variety of opportunities for students while catering to individual schools' contexts, resources, students' pathways and community expectations.

The information contained in this booklet is a summary of the approved General, Applied, Senior External Examinations and Short Courses syllabuses. Schools that require further detail about any subject should access the syllabuses from the QCAA portal.

Senior Education Profile

Students in Queensland are issued with a Senior Education Profile (SEP) upon completion of senior studies. This profile may include a:

- statement of results
- Queensland Certificate of Education (QCE)
- Queensland Certificate of Individual Achievement (QCIA)

For more information about the SEP see: <https://www.qcaa.qld.edu.au/senior/certificates-and-qualifications/sep>

Statement of results

Students are issued with a statement of results in the December following the completion of a QCAA-developed course of study. A new statement of results is issued to students after each QCAA-developed course of study is completed.

A full record of study will be issued, along with the QCE qualification, in the first December or July after the student meets the requirements for a QCE.

Queensland Certificate of Education (QCE)

All Senior Schooling students at Robina SHS, with the exception of those working towards a QCIA, are required to be eligible for and work towards gaining a Queensland Certificate of Education (QCE) at the end of their Senior Schooling.

The attainment of a QCE certifies that a student has achieved a set standard of literacy and numeracy, and has met the minimum requirements of 20 points of study in an approved pattern, through the successful completion of approved General, Applied and/or VET courses.

<https://www.qcaa.qld.edu.au/senior/certificates-and-qualifications>

Queensland Certificate of Individual Achievement (QCIA)

The Queensland Certificate of Individual Achievement (QCIA) reports the learning achievements of eligible students who complete an individual learning program. At the end of the senior phase of learning, eligible students achieve a QCIA. These students have the option of continuing to work towards a QCE post-secondary schooling.

<https://www.qcaa.qld.edu.au/senior/certificates-and-qualifications/qcia>

Senior Schooling Pathways @ Robina SHS

At Robina SHS Senior Schooling Students will either undertake an:

- ATAR Pathway
- Or a Applied/VET Studies: NON-ATAR Pathway

Students Year 10, Semester 1 results will be utilised to determine pathway options available to them. Each student will receive a list of General, Applied or VET courses they are eligible to select after each reporting juncture, based on academic prerequisites.

ATAR Pathway

An ATAR pathway is for students who intend on studying at University, directly following the completion of Year 12. An ATAR pathway consists of a very high level of academic rigour. Students undertaking this pathway are required to be diligent and dedicated students, committed to completing independent study, revision and research on a nightly basis for a minimum of 2 hours.

As a minimum, students on an ATAR pathway must be willing to prepare for and sit 5 external examinations at the end of year 12, some of which may be worth up to 50% of their subject result.

ATAR Pathway Criteria:

In order to be eligible to undertake an ATAR Pathway, students' must comply with the following rules:

- Students must select a total of 6 subjects
- Of their 6 subjects, at least 5 must be General Subjects
- Students must select General English as one of their General subjects
- Students must select a Maths subject (General or Applied)

Applied and/or VET: NON ATAR Pathway

This pathway has a focus on building students' skills and qualifications for entry into the workforce or further vocational education and training after the completion of Year 12. This pathway can lead students into an apprenticeship or traineeship, fulltime employment or further study at Registered Training Organisation such as TAFE Queensland, which in the future, may lead to University study.

Applied and/or VET: NON ATAR Pathway Criteria:

When selecting subjects for an Applied and/or VET: NON-ATAR Pathway, students' must comply with the following rules:

- Students must select a total of 6 subjects
- Students study Essential English
- Students select a Maths subject, based on their Semester 1, Year 10 mathematics results
- Students select remaining subjects from those listed on their subject selection form (Students can only complete one VETiS funded course)

Students are also encouraged to consider the following when selecting subjects:

- Students on an Applied and/or VET: NON-ATAR Pathway, are advised to only select Applied subjects or VET courses
- Students are advised to complete a VET course or undertake a school based traineeship/apprenticeship

Pathways and QCE Point Examples

For Applied and General subjects, students are awarded 1 QCE point after the successful completion of each unit (C result or better). For units 3&4, completed in Year 12, students must successfully complete (C result or better) units 3&4 to be awarded QCE points.

For VET courses, QCE points are awarded based on the Certificate level.

- For Certificate II courses, students can achieve a maximum of 4 QCE points
- For Certificate III level courses or above, students can achieve 5-8 QCE points depending on the qualification

ATAR Pathway Example (Successful QCE Attainment)

Subject	Units studied			QCE credits
	Unit 1	Unit 2	Units 3 & 4	
English	S	S	A	4
Mathematical Methods	S	S	B	4
Biology	S	S	A	4
Geography	S	S	B	4
Modern History	S	S	A	4
Visual Art	S	S	C	4
<p>1 QCE credit per Unit Satisfactorily completed</p> <p>2 QCE points awarded for satisfactory completion of Units 3 & 4 combined</p>				24

ATAR Pathway Example (Unsuccessful QCE Attainment)

Subject	Units studied			QCE credits
	Unit 1	Unit 2	Units 3 & 4	
English	S	S	A	4
Mathematical Methods	S	U	D	1
Biology	S	U	B	3
Geography	S	U	B	3
Modern History	S	S	A	4
Visual Art	S	S	C	4
<p>0 QCE credit points awarded for unsatisfactory completion of a Unit of work.</p> <p>0 QCE credit points awarded for unsatisfactory completion of Unit 3& 4 combined.</p>				19

Applied/VET: NON-ATAR Pathway (Successful QCE Attainment)

Subject	Units studied			QCE credits
	Unit 1	Unit 2	Units 3 & 4	
Essential English	S	S	A	4
Essential Mathematics	S	S	A	4
Industrial Technology Skills	S	S	B	4
Industrial Graphic Skills	S	S	B	4
Sport & Recreation	S	S	A	4
Cert II in Engineering Pathways	100% Complete			4
1 QCE credit points awarded for satisfactory completion of a Unit of work.		2 QCE credit points awarded for satisfactory completion of Unit 3& 4 combined.		24

Applied/VET: NON-ATAR Pathway (Unsuccessful QCE Attainment)

Subject	Units studied			QCE credits
	Unit 1	Unit 2	Units 3 & 4	
Essential English	U	U	C	2
Essential Mathematics	U	S	C	3
Visual Art in Practice	S	U	B	3
Drama in Practice	S	S	B	4
Sport & Recreation	U	S	B	3
Certificate III in Screen and Media	Partially Completed			(6 eligible) 4 awarded
0 QCE credit points awarded for unsatisfactory completion of a Unit of work.		Portion of QCE credit points awarded for partial of Certificate.		19

Senior subjects

The QCAA develops four types of senior subject syllabuses — General, Applied, Senior External Examinations and Short Courses. Results in General and Applied subjects contribute to the award of a QCE and may contribute to an Australian Tertiary Admission Rank (ATAR) calculation, although no more than one result in an Applied subject can be used in the calculation of a student's ATAR.

Extension subjects are extensions of the related General subjects and are studied either concurrently with, or after, Units 3 and 4 of the General course.

Typically, it is expected that most students will complete these courses across Years 11 and 12. All subjects build on the P–10 Australian Curriculum.

General syllabuses

General subjects are suited to students who are interested in pathways beyond senior secondary schooling that lead primarily to tertiary studies and to pathways for vocational education and training and work. General subjects include Extension subjects.

Applied syllabuses

Applied subjects are suited to students who are primarily interested in pathways beyond senior secondary schooling that lead to vocational education and training or work.

Senior External Examination

The Senior External Examination consists of individual subject examinations provided across Queensland in October and November each year by the QCAA.

Short Courses

Short Courses are developed to meet a specific curriculum need and are suited to students who are interested in pathways beyond senior secondary schooling that lead to vocational education and training and establish a basis for further education and employment. They are informed by, and articulate closely with, the requirements of the Australian Core Skills Framework (ACSF). A grade of C in Short Courses aligns with the requirements for ACSF Level 3.

For more information about the ACSF see: <https://www.education.gov.au/australian-core-skills-framework>.

Underpinning factors

All senior syllabuses are underpinned by:

- literacy — the set of knowledge and skills about language and texts essential for understanding and conveying content
- numeracy — the knowledge, skills, behaviours and dispositions that students need to use mathematics in a wide range of situations, to recognise and understand the role of mathematics in the world, and to develop the dispositions and capacities to use mathematical knowledge and skills purposefully

General syllabuses and Short Courses

In addition to literacy and numeracy, General syllabuses and Short Courses are underpinned by:

- 21st century skills — the attributes and skills students need to prepare them for higher education, work and engagement in a complex and rapidly changing world. These include critical thinking, creative thinking, communication, collaboration and teamwork, personal and social skills, and information & communication technologies (ICT) skills.

Applied syllabuses

In addition to literacy and numeracy, Applied syllabuses are underpinned by:

- applied learning — the acquisition and application of knowledge, understanding and skills in real-world or lifelike contexts
- community connections — the awareness and understanding of life beyond school through authentic, real-world interactions by connecting classroom experience with the world outside the classroom
- core skills for work — the set of knowledge, understanding and non-technical skills that underpin successful participation in work

Vocational education and training (VET)

Students can access VET programs through the school if it:

- is a registered training organisation (RTO)
- has a third-party arrangement with an external provider who is an RTO
- offers opportunities for students to undertake school-based apprenticeships or traineeships

Australian Tertiary Admission Rank (ATAR) eligibility

The calculation of an Australian Tertiary Admission Rank (ATAR) will be based on a student's:

- best five General subject results or
- best results in a combination of four General subject results plus an Applied subject result or a Certificate III or higher VET qualification

The Queensland Tertiary Admissions Centre (QTAC) has responsibility for ATAR calculations.

English requirement

Eligibility for an ATAR will require satisfactory completion of a QCAA English subject.

Satisfactory completion will require students to attain a result that is equivalent to a Sound Level of Achievement in one of five subjects — English, Essential English, Literature, English and Literature Extension or English as an Additional Language.

While students must meet this standard to be eligible to receive an ATAR, it is not mandatory for a student's English result to be included in the calculation of their ATAR.

Although any of the 5 subjects in English may be used in the ATAR calculation, university prerequisites require a General English subject which includes General English, English as an Additional Language, Literature and English and Literature Extension.

2023 Senior Schooling: General Subject Prerequisites

Year 10 and Senior Subject Prerequisites				
Faculty	Year 10 Subject	Senior School Subject	Year 10 Prerequisites	Senior Prerequisites
Mathematics	Specialist Mathematics	Specialist Mathematics (G)	Class composition will be based on Year 9 results	B in Mathematical Methods (MME) or Specialist Mathematics (MSE) May be combined with General Mathematics in addition to Mathematical Methods
	Mathematical Methods	Mathematical Methods (G)	Class composition will be based on Year 9 results	B in Mathematical Methods (MME) or Specialist Mathematics (MSE) General English May be combined with General Mathematics or Specialist Mathematics
	General Mathematics	General Mathematics (G)	Class composition will be based on Year 9 results	C in General Mathematics (MGE) or Mathematical Methods (MME) General English May be combined with Mathematical Methods or Essential Mathematics.

CPC10111 – CERTIFICATE I IN CONSTRUCTION | VCN

Faculty:	Applied Technologies	Type:	VET Certificate - VETiS
QCE Credits:	Maximum 3 credits		
Pre-Requisites:	NIL		
Context:	Construction		
Future Options:	Builder, carpenter, bricklayer, plasterer, plumber etc. All building trade related areas.		

RTO: Blue Dog Training

Provider Number: 31193

Competencies:

- CPCCOHS2001 Apply OHS requirements, policies and procedures in the construction industry
- CPCCWHS1001 Prepare to work safely in the construction industry
- CPCCCM1012 Work effectively and sustainably in the construction industry
- CPCCCM1014 Conduct workplace communication
- CPCCCM2004 Handle construction materials
- CPCCCM1013 Plan and organise work]
- CPCCCM1011 Undertake basic estimation and costing
- CPCCCM2005 Use construction tools and equipment
- CPCCCM1015 Carry out measurements and calculations
- CPCCCM2001 Read and interpret plans and specifications
- CPCCVE1011 Undertake a basic construction project

Blue Dog will issue the certificate upon completion

Assessment:	<ul style="list-style-type: none"> • Competency based with an opportunity to redo tasks • Short and specific online tests
Expectations:	<ul style="list-style-type: none"> • Motivated students who enjoy practical work • Students looking to gain a traineeship or school based apprenticeship • Practical and skilled students who enjoy working with hand and power tools • Students looking to get a trade or have an interest in gaining practical hand skills
Invoiced Fees:	<p>**There are no fees for this subject unless VETiS funding has previously been used.</p> <p>In this case the course fees are \$1200</p>
Additional Costs:	<p>** This course is covered by the VETiS funding arrangement and is provided free for students who have not previously accessed the funding.**</p> <p>There are costs associated with the supply of Protective clothing for this course.</p>
Disclaimer:	All information is correct at time of publication. Information subject to change.

MEM20413 – CERTIFICATE II IN ENGINEERING (PATHWAYS)

VEP

Faculty:	Applied Technologies	Type:	VET Certificate - VETIS
QCE Credits:	Maximum 4 credits		
Context:	Metals		
Future Options:	A trade in a metal fabrication, boiler making, fitter and turner or related industry.		
<p>Engineering pathways is a metal based course that is managed and moderated by an external Registered Training Organisation, Blue Dog Training. The course provides the industrial and personal benefits of aligning the appropriate levels of learning and experience that are reasonably attainable in a school setting at Certificate II level, focusing on a broad range of metal fabrication and manufacturing techniques. This qualification has been designed to equip students with the skills and knowledge for employment prospects in an engineering related working environment.</p>			
RTO: Blue Dog Training		Provider Number: 31193	
			
Competencies:			
MEM13014A	Apply principles of occupational health and safety in the work environment		
MEMPE005A	Develop a career plan for the engineering and manufacturing industry		
MEMPE006A	Undertake a basic engineering project		
MSAENV272B	Participate in environmentally sustainable work practices		
MEM16006A	Organise and communicate information		
MEM16008A	Interact with computing technology		
MEM18001C	Use hand tools		
MEM18002B	Use power tools/hand held operations		
MEMPE001A	Use engineering workshop machines		
MEMPE002A	Use electric welding machines		
MEMPE004A	Use fabrication equipment		
MEMPE007A	Pull apart and re-assemble engineering mechanisms		
			
Blue Dog will issue the certificate upon completion			
Assessment:	<ul style="list-style-type: none"> • Competency based with an opportunity to redo tasks • Short and specific online tests 		
Expectations:	<ul style="list-style-type: none"> • Motivated students who enjoy practical work • Students looking to gain a traineeship or school based apprenticeship • Practical and skilled students who enjoy working with hand and power tools • Students looking to get a trade or have an interest in gaining practical hand skills 		
Invoiced Fees:	<p>**There are no fees for this subject unless VETIS funding has previously been used. In this case the course fees are \$1200</p>		
Additional Costs:	<p>This course is covered by the VETIS funding arrangement and is provided free for students who have not previously accessed the funding.** Safety gear- full-length shirt/pants (cotton), safety boots (steel capped).</p>		
Disclaimer:	All information is correct at time of publication. Information subject to change.		

HLT23215 / HLT33115 – CERTIFICATE II IN HEALTH SUPPORT SERVICES / CERTIFICATE III IN HEALTH SERVICES ASSISTANCE

(VHL)

Faculty:	Science	Type:	VET Certificate - VETiS	ATAR	Cert. III may be used to calculate an ATAR
QCE Credits:	Certificate II – 4 max Certificate III – 8 max	When a student completes or partially completes multiple qualifications from within the same VET training package, the highest level qualification in the Core category of learning will contribute credit to a QCE. In this case 8 core credits.			
Subject Pre-Requisites:	C in Year 10 English and Year 10 Science and highly recommend studying Year 10 Health Science				
Context:	This course is delivered online at our campus with the assistance of our teachers but the Registered Training Organisation is TAFE Queensland Gold Coast. Students will adhere to all TAFE Gold Coast requirements which will include attendance at their facilities on some Fridays. Times TBA				
Future Options:	<ul style="list-style-type: none"> Allied Health Assistant Therapy Assistant Podiatry Assistant Nursing 		<ul style="list-style-type: none"> Occupational Therapy Assistant Speech Pathology Assistant Further study Midwifery 		
<p>Enrolments will not be accepted by TAFE after the first two weeks of school. Students will complete the following courses across 2 years:</p> <p>HLT21212 Certificate II in Health Support Services has been identified as a need within the health industry and it allows students to be employed multi-skilled, thus increasing employment opportunities. This program will provide job opportunities including but not limited to; Orderly, Support Services Worker and Ward Assistant.</p> <p>HLT32512 Certificate III in Health Services Assistance covers workers in a range of roles providing assistance to health professional staff with the care of clients. Health Services Assistance involves the worker in direct client contact under supervision.</p> <p>HLT21212 / HLT32512 Schools Health Program - Certificate II in Health Support Services / Certificate III in Health Services Assistance (Dual Qualification)</p>					
RTO: TAFE QLD Gold Coast		Provider Number: 0083			
Units of Competency:					
CHCCOM005	Communicate and work in health or community services				
HLTINF001	Comply with infection prevention and control policies and procedures				
BSBFLM312	Contribute to team effectiveness				
BSBMED301	Interpret and apply medical terminology appropriately				
CHCCCS010	Maintain a high standard of service				
BSBWOR301	Organise personal work priorities and development				
HLTWHS001	Participate in Workplace Health and Safety				
HLTAAP001	Recognise healthy body systems				
HLTAID003	Provide first aid				
CHCCCS020	Respond effectively to behaviours of concern				
CHCCCS015	Provide Individualised Support				
CHCCCS026	Transport individuals				
CHCCCS012	Prepare and maintain beds				
BSBWOR203	Work effectively with others				
CHCDIV002	Promote Aboriginal and/or Torres Strait Islander Cultural Safety				
VPC80	Vocational Placement				
CHCAGE001	Facilitate the empowerment of older people				
CHCMHS001	Work with people with mental health issues				

NATIONALLY RECOGNISED
TRAINING

(Con't) Certificate III in Health Services Assistance/Certificate II in Health Support Services

<p>Assessment:</p>	<ul style="list-style-type: none"> • Online tasks and assessment • Oral Presentations • Practical Assessment
<p>Expectations:</p>	<p>This course has blended delivery (online study with scheduled practical skills days each semester) held over 2 years. Compulsory scheduled face-to-face workshops, practical sessions and field trips to be attended at TAFE Gold Coast Southport throughout the program. All face-to-face sessions will be timetabled on Fridays.</p> <p>Vocational Placement (HLT32512 Certificate III in Health Services Assistance ONLY) The vocational placement requirement for this program is 80 hours completed in the second year of course delivery. This will occur during the school holidays.</p> <p>IMPORTANT: Students are required to organise their own transport to and from the facilities, be available to attend nominated shifts and may be required to undertake placement in the Gold Coast area.</p> <p>The TAFE sources and coordinates vocational placement on the students' behalf. The TAFE's Vocational Placement Team will work in collaboration with students and facilities to coordinate vocational placement.</p> <p>Mandatory Vocational Placement Documentation Please note: The Health Industry dictates that TAFE Queensland Gold Coast must ensure that all students going on placement in health care facilities hold the following documentation. Students will NOT be released for placement without these documents.</p> <p>Students must provide to TAFE Queensland Gold Coast a certified copy* of each of these documents as soon as possible. *Certified copy - photocopy certified by a Justice of the Peace or Commissioner of Declarations.</p> <ol style="list-style-type: none"> 1. Current Australian First Aid Certificate (HLTAID003 Provide First Aid) with current competency in CPR (CPR must be updated annually). HLTAID003 Provide First Aid is delivered as part of this course. 2. Full vaccination history for all of the following vaccination regimes, including serology evidence of immunity where indicated. Hepatitis B - you must commence or have undertaken an age appropriate course of vaccination. Students must not undertake an accelerated course of vaccination. To prove immunity you will need to have a blood test (serology) after the completion of the full vaccination course. Varicella (Chicken Pox) - provide serology or evidence of completed vaccinations. FSK20119 - CERTIFICATE II IN SKILLS FOR WORK AND VOCATIONAL PATHWAYS
 ICT20120 - CERTIFICATE II APPLIED DIGITAL TECHNOLOGIES

VSW

Faculty:	Senior Schooling	Type:	VET Certificate
QCE Credits:	Maximum 4 credits per certificate for successful completion		
Pre-Requisites:	General entry requirements for this program include the student's agreement and ability to undertake the following: <ul style="list-style-type: none"> • demonstrate evidence of language, literacy and numeracy skills at the requisite ACSF level • attend and participate in scheduled training and assessment • participate in simulated workplace tasks • be able to work in an ICT environment • comply with Robina SHS standards and expectations, directions on work, and health and safety matters. 		
Context:	Students work in an ICT context with a variety of workplace scenarios.		
Future Options:	<ul style="list-style-type: none"> • Further Certificate courses at TAFE in IT and Multimedia. • Vocational workplace and ICT skills for entry level jobs in any industry. 		

This dual certificate offering should appeal to all students as it provides basic work and information technology skills suitable for any work environment. Each Certificate is delivered over one year.

RTO: Robina State High School

Provider Number: 30341

FSK20119 Certificate II in Skills for Work and Vocational Pathways

It is suitable for individuals who require:

- a pathway to employment or further vocational training
- reading, writing, oral communication and numeracy skills
- entry level digital literacy and employability skills
- a vocational training and employment plan.

Competencies

FSKLRG011	Use routine strategies for work-related learning
FSKNUM014	Calculate with whole numbers and familiar fractions, decimals and percentages for work
FSKNUM015	Estimate, measure and calculate with routine metric measurements for work
FSKLRG009	Use strategies to respond to routine workplace problems
FSKOCM007	Interact effectively with others at work
FSKRDG010	Read and respond to routine workplace information
FSKWTG009	Write routine workplace texts
FSKOCM005	Use oral communication skills for effective workplace presentations
FSKDIG003	Use digital technology for non-routine workplace tasks
FSKLRG010	Use strategies for career planning
BSBWHS211	Contribute to health and safety of self and others
ICTICT214	Operate application software packages
BSBTEC303	Create electronic presentations
FSKWTG008	Complete routine workplace formatted text.

(Con't) Certificate II in Skills for Work and Vocational Pathways, Certificate II in Applied Digital Technologies

ICT20120 Certificate II in Applied digital technologies

This pathways qualification provides the foundation skills and knowledge to use basic applied digital technologies in varied contexts. The qualification is designed for those developing the necessary digital and technology skills in preparation for work.

Students carry out a range of basic procedural and operational tasks that require digital and technology skills. They perform a range of mainly routine tasks using practical skills and knowledge in a defined context. Most tasks are completed using the Microsoft suite including Word, Excel, PowerPoint and Outlook. There are also some tasks that require applications involving hardware, installation set up and device management.

Competencies:

BSBSUS211	Participate in sustainable work practices
BSBTEC202	Use digital technologies to communicate in a work environment
BSBWHS211	Contribute to the health and safety of self and others
ICTICT213	Use computer operating systems and hardware
ICTICT214	Operate application software packages
ICTICT215	Operate digital media technology packages
ICTSAS203	Connect hardware peripherals
BSBTEC203	Research using the internet
BSBTEC302	Design and produce spreadsheets
BSBTEC303	Create electronic presentations
ICTICT216	Design and create basic organisational documents
ICTICT219	Interact and resolve queries with ICT clients

Certificates will be issued within 30 days of the completion of the course upon request by the student or parent. Otherwise certificates will be issued at the completion of the school year with graduation packs and/or report cards.

Assessment:	Competency based assessment
Expectations:	Willingness and capacity to work independently
Additional costs:	Possible excursion and work placement costs
Disclaimer:	All information is correct at time of publication.

Expectations:	Students must complete a total of 14 units of competency. Use of a personal laptop (BYOD) is required as the majority of the course is completed online.		
Invoiced Fees:	\$40/week 54 weeks \$2150; course delivery in conjunction with Registered Training Organisation (RTO), onsite (school) RTO weekly visits, online digital work / assessment platform, First Aid & CPR qualifications. INVOICED FEES FOR THIS SUBJECT MUST BE PAID IN FULL ON OR BEFORE 10 NOVEMBER 2022 ALONG WITH FULL/INSTALMENT PAYMENT OF 2023 STUDENT RESOURCE SCHEME TO ENSURE PLACEMENT INTO THE SUBJECT. NON-REFUNDABLE AFTER COURSE COMMENCEMENT. STUDENTS WISHING TO ENTER THIS SUBJECT/PROGRAM AFTER THIS DATE ARE REQUIRED TO PAY IN FULL AT ENROLMENT INTERVIEW OR PRIOR TO SUBJECT CHANGE FINAL APPROVAL.		
Disclaimer:	All information is correct at time of publication. Information subject to change.		

SAT – SCHOOL BASED APPRENTICESHIP OR TRAINEESHIP

(STP)

Faculty:	Senior Schooling	Type:	VET
QCE Credits:	4 – 8 Core Certificate II = 4 credits Certificate III = 5-8 credits Certificate IV = 8 credits Apprenticeship up to 6 credits		
Other Pre-Requisites:	<ul style="list-style-type: none"> • Provide own transport to work place • Specific Industry requirements e.g. White Card (construction) 		
Context:	School-based Apprenticeships and Traineeships can be started at any time in Years 10 & 11 and first term of Year 12. SATs are advertised through the school's Newsletter, on our website under Careers and Senior Schooling Dashboard. Students apply for these via the Industry Liaison Officer (ILO), Mrs Allen. Students are selected by the employer using resume, interview and sometimes work trialling. The process is coordinated by the ILO. Students who have a family business or friends with a trade/industry business who will take a student on as a SAT need only bring their details to the ILO to arrange a sign up.		
Advantages & Future Options:	<ul style="list-style-type: none"> • Qualified direct entry into an industry area • Permanent/part time traineeship or apprenticeship. Advancement to higher qualification • Completed VET qualifications at AQF Cert III level or above can contribute to an ATAR 		
<p>SATs, a combination of paid work, training and school study, are available in over 800 areas. Students undertaking a SAT work at least one day/shift a week and attend school for other scheduled classes. <i>Each SAT arrangement is flexible and individually negotiated between the student, employer and school.</i></p> <p>Training with a Registered Training Organisation selected by the employer takes place in the work place, school or at an outside venue.</p> <p>In some cases students are able to turn their part-time job into a SAT. Others work in a family company whilst most apply through the school for one of the advertised SAT positions.</p> <p>STUDENTS MUST STILL SELECT 6 SCHOOL SUBJECTS for SUBJECT SELECTION from Year 10 into 11 even if they are already signed into a SAT. Adjustments will be made to a student's timetable to acknowledge this extra study when they have completed the probationary period of the SAT. They may drop a subject at that time, or later, depending on QCE eligibility.</p>			
Assessment:	Training assessment/competency items as per certificate requirements		
Expectations:	<ul style="list-style-type: none"> • Adhere to workplace health and safety requirements • Excellent attendance at workplace, training and school • Notification of any changed circumstance or difficulty with SAT • Completion of all school subject assessment 		
Additional Costs:	Some industries may require specific clothing or equipment and /or own transport. Other requirements may also exist. Funding of SATs changes from time to time but there is no cost to a SAT student for the delivery of their certified training course.		
Disclaimer:	All information is correct at time of publication. Information subject to change.		

TAFE SCHOOLS PROGRAM			(STP)
Faculty:	Senior Schooling	Type:	VET
QCE Credits:	Cert I	Preparatory	2-3 credits
	Cert II	Core	4 credits
	Cert III – Cert IV	Core	5-8 credits
	Diploma	Complementary	8 credits
Other Pre-Requisites:	<ul style="list-style-type: none"> Keen interest in course, own transport to TAFE or RTO's campus Independent learner as some school-based classes may be missed to attend. 		
Advantages & Future Options:	<ul style="list-style-type: none"> Use of completed VET certificate AQF Level III or above may be used in calculating an ATAR and QCE credits Use for entry to some further tertiary courses such as more advanced Certificate and Diploma courses Articulation into/credit towards some University studies Direct qualified entry into some industries at entry level Employability skills 		
<p>The TAFE & other RTO's Schools Program involves students enrolling in a VET certificate I, II, III, IV or Diploma courses as offered by TAFE Gold Coast, TAFE Brisbane and other private RTOs. Courses are completed one day per week at the relevant RTO's campus. Depending on the qualification the course will run for 1 year, 18 months or 2 years.</p> <p>Most Certificate III or higher courses take place over two years, therefore students need to apply for these in Year 10, usually by September. Enrolments are on an electronic application basis in Term 3/4 for commencement the following year. There is a mid-year Year 11 intake in some courses as well. Students apply in the year before course commencement so these are open only to Year 10 & 11 students.</p> <p>See the 2022 TAFE Schools Program booklet and other brochures at Student Pathways in the Support House, the Careers and Senior Schooling Dashboard on Robina SHS's website or GCIT website for available courses.</p> <p>YEAR 10 STUDENTS MUST STILL SELECT 6 SCHOOL SUBJECTS at the time of Subject Selection, even if they are applying for an external course. Not all applications are successful.</p> <p>PLEASE NOTE: Most certificate I & II course are funded under VETiS. As students can only access this funding ONCE, enrolling in a Cert I or II with TAFE or another provider will preclude them from taking a range of certificates as school subjects. Please check the coding at the top of certificate pages.</p> <p>Students may study a reduced school timetable while maintaining QCE eligibility if undertaking a Certificate II or higher.</p> <p>Adjustments will be made to a student's timetable to acknowledge a TAFE/external RTO course when they have completed four weeks of the certificate course. They may drop a subject at that time or later, depending on QCE eligibility.</p>			
Assessment:	<ul style="list-style-type: none"> Written/spoken assessment/tests Module work booklets and/or Demonstrated industry competencies 		
Expectations:	Excellent attendance at certificate course whilst managing to keep up to date with school-based subjects. Absences for external courses are noted on a student's school record as acknowledged absences. Absences from TAFE are unauthorised.		
Costs:	<ul style="list-style-type: none"> Some are fee free whilst others have a cost depending on the course. This is payable to TAFE or other RTO on enrolment. Transport to campus is not provided by Robina SHS. Specialised equipment outlined prior to enrolment 		
Disclaimer:	All information is correct at time of publication. Information subject to change.		

UNIVERSITY SEMESTER COURSES (Year 12 only) (STP)	
Faculty:	Senior Schooling
QCE Credits:	Up to 2 points per course
Other Pre-Requisites:	Strong academic progress in General subjects (Generally B standard in ATAR subjects minimum requirement)
Advantages & Future Options:	<ul style="list-style-type: none"> • QCE credits • Reduced HECs costs (public university courses are free) • Taste of university life • Begin tertiary studies early • Possible credit towards courses at other public universities • Scholarship advantage
<p>Students enrol in and attend lectures/tutorials for a semester course offered through the “Student for a Semester” Bond University Program, the Griffith University “GUESTS At-School” program, START QUT, Enhanced Studies UQ, and/or Southern Cross University’s Head Start and Access program.</p> <p>Applications are processed depending on the universities’ timelines and the types of programs offered. Dates will be communicated via Senior Schooling Updates. Please refer to the relevant university’s websites for more specific course information regarding course delivery (online and/or on-campus) and withdrawal deadlines.</p> <p>STUDENTS MUST STILL SELECT 6 SCHOOL SUBJECTS as university courses are offered late in Year 11 for Year 12 intake. Adjustments will be made to a student’s timetable to acknowledge extra study when they have completed 3 weeks of the course. They may drop a subject at that time or later depending on QCE eligibility.</p> <p>Whilst there are advantages for students accessing university semester courses, universities no longer offer Direct Entry or Guaranteed Entry to Bachelor degrees.</p>	
Assessment:	Dependent on semester course undertaken: <ul style="list-style-type: none"> • Extended written assignments • Exams • Group tasks • Presentations
Expectations:	<ul style="list-style-type: none"> • Independent study skills • Maintain academic progress in school-based subjects
Costs:	<ul style="list-style-type: none"> • Bond Student for a Semester from \$250.00 • Griffith and other public universities’ courses are free • Transport to campus • Text books • Stationery supplies
Disclaimer:	All information is correct at time of publication. Information subject to change.

General syllabuses

Structure

The syllabus structure consists of a course overview and assessment.

General syllabuses course overview

General syllabuses are developmental four-unit courses of study.

Units 1 and 2 provide foundational learning, allowing students to experience all syllabus objectives and begin engaging with the course subject matter. It is intended that Units 1 and 2 are studied as a pair. Assessment in Units 1 and 2 provides students with feedback on their progress in a course of study and contributes to the award of a QCE.

Students should complete Units 1 and 2 before starting Units 3 and 4.

Units 3 and 4 consolidate student learning. Assessment in Units 3 and 4 is summative and student results contribute to the award of a QCE and to ATAR calculations.

Extension syllabuses course overview

Extension subjects are extensions of the related General subjects and include external assessment. Extension subjects are studied either concurrently with, or after, Units 3 and 4 of the General course of study.

Extension syllabuses are courses of study that consist of two units (Units 3 and 4). Subject matter, learning experiences and assessment increase in complexity across the two units as students develop greater independence as learners.

The results from Units 3 and 4 contribute to the award of a QCE and to ATAR calculations.

Assessment

Units 1 and 2 assessments

Schools decide the sequence, scope and scale of assessments for Units 1 and 2. These assessments should reflect the local context. Teachers determine the assessment program, tasks and marking guides that are used to assess student performance for Units 1 and 2.

Units 1 and 2 assessment outcomes provide feedback to students on their progress in the course of study. Schools should develop at least *two* but no more than *four* assessments for Units 1 and 2. At least *one* assessment must be completed for *each* unit.

Schools report satisfactory completion of Units 1 and 2 to the QCAA, and may choose to report levels of achievement to students and parents/carers using grades, descriptive statements or other indicators.

Units 3 and 4 assessments

Students complete a total of *four* summative assessments — three internal and one external — that count towards the overall subject result in each General subject.

Schools develop *three* internal assessments for each senior subject to reflect the requirements described in Units 3 and 4 of each General syllabus.

The three summative internal assessments need to be endorsed by the QCAA before they are used in schools. Students' results in these assessments are externally confirmed by QCAA assessors. These confirmed results from internal assessment are combined with a single result from an external assessment, which is developed and marked by the QCAA. The external assessment result for a subject contributes to a determined percentage of a students' overall subject result. For most subjects this is 25%; for Mathematics and Science subjects it is 50%.

Instrument-specific marking guides

Each syllabus provides instrument-specific marking guides (ISMGs) for summative internal assessments.

The ISMGs describe the characteristics evident in student responses and align with the identified assessment objectives. Assessment objectives are drawn from the unit objectives and are contextualised for the requirements of the assessment instrument.

Schools cannot change or modify an ISMG for use with summative internal assessment.

As part of quality teaching and learning, schools should discuss ISMGs with students to help them understand the requirements of an assessment task.

External assessment

External assessment is summative and adds valuable evidence of achievement to a student's profile. External assessment is:

- common to all schools
- administered under the same conditions at the same time and on the same day
- developed and marked by the QCAA according to a commonly applied marking scheme.

The external assessment contributes a determined percentage (see specific subject guides — assessment) to the student's overall subject result and is not privileged over summative internal assessment.

Applied syllabuses

Structure

The syllabus structure consists of a course overview and assessment.

Applied syllabuses course overview

Applied syllabuses are developmental four-unit courses of study.

Units 1 and 2 of the course are designed to allow students to begin their engagement with the course content, i.e. the knowledge, understanding and skills of the subject. Course content, learning experiences and assessment increase in complexity across the four units as students develop greater independence as learners.

Units 3 and 4 consolidate student learning. Results from assessment in Applied subjects contribute to the award of a QCE and results from Units 3 and 4 may contribute as a single input to ATAR calculation.

A course of study for Applied syllabuses includes core topics and elective areas for study.

Assessment

Applied syllabuses use *four* summative internal assessments from Units 3 and 4 to determine a student's exit result.

Schools should develop at least *two* but no more than *four* internal assessments for Units 1 and 2 and these assessments should provide students with opportunities to become familiar with the summative internal assessment techniques to be used for Units 3 and 4.

Applied syllabuses do not use external assessment.

Instrument-specific standards matrixes

For each assessment instrument, schools develop an instrument-specific standards matrix by selecting the syllabus standards descriptors relevant to the task and the dimension/s being assessed. The matrix is shared with students and used as a tool for making judgments about the quality of students' responses to the instrument. Schools develop assessments to allow students to demonstrate the range of standards.

Essential English and Essential Mathematics — Common internal assessment

Students complete a total of *four* summative internal assessments in Units 3 and 4 that count toward their overall subject result. Schools develop *three* of the summative internal assessments for each senior subject and the other summative assessment is a common internal assessment (CIA) developed by the QCAA.

The CIA for Essential English and Essential Mathematics is based on the learning described in Unit 3 of the respective syllabus. The CIA is:

- developed by the QCAA
- common to all schools
- delivered to schools by the QCAA
- administered flexibly in Unit 3

- administered under supervised conditions
- marked by the school according to a common marking scheme developed by the QCAA.

The CIA is not privileged over the other summative internal assessment.

Summative internal assessment — instrument-specific standards

The Essential English and Essential Mathematics syllabuses provide instrument-specific standards for the three summative internal assessments in Units 3 and 4.

The instrument-specific standards describe the characteristics evident in student responses and align with the identified assessment objectives. Assessment objectives are drawn from the unit objectives and are contextualised for the requirements of the assessment instrument.

Senior External Examinations

Senior External Examinations course overview

A Senior External Examination syllabus sets out the aims, objectives, learning experiences and assessment requirements for each of these subjects.

Results are based solely on students' demonstrated achievement in examinations. Work undertaken before an examination is not assessed.

The Senior External Examination is for:

- low candidature subjects not otherwise offered as a General subject in Queensland
- students in their final year of senior schooling who are unable to access particular subjects at their school
- adult students (people of any age not enrolled at a Queensland secondary school)
 - to meet tertiary entrance or employment requirements
 - for personal interest.

Senior External Examination results may contribute credit to the award of a QCE and contribute to ATAR calculations.

For more information about the Senior External Examination, see:
www.qcaa.qld.edu.au/senior/see.

Assessment

The Senior External Examination consists of individual subject examinations that are held once each year in Term 4. Important dates and the examination timetable are published in the Senior Education Profile (SEP) calendar, available at: <https://www.qcaa.qld.edu.au/senior/sep-calendar>.

Results are based solely on students' demonstrated achievement in the examinations. Work undertaken before an examination is not assessed. Results are reported as a mark and grade of A–E. For more information about results, see the QCE and QCIA policy and procedures handbook, Section 10.

Short Courses

Course overview

Short Courses are one-unit courses of study. A Short Course includes topics and subtopics. Results contribute to the award of a QCE. Results do not contribute to ATAR calculations.

Short Courses are available in:

- Literacy
- Numeracy
- Aboriginal and Torres Strait Islander Languages
- Career Education.

Assessment

A Short Course uses two summative school-developed assessments to determine a student's exit result. Short Courses do not use external assessment.

The Short Course syllabus provides instrument-specific standards for the two summative internal assessments.

General Mathematics

General senior subject

General

General Mathematics' major domains are Number and algebra, Measurement and geometry, Statistics, and Networks and matrices, building on the content of the P–10 Australian Curriculum.

General Mathematics is designed for students who want to extend their mathematical skills beyond Year 10 but whose future studies or employment pathways do not require calculus.

Students build on and develop key mathematical ideas, including rates and percentages, concepts from financial mathematics, linear and non-linear expressions, sequences, the use of matrices and networks to model and solve authentic problems, the use of trigonometry to find solutions to practical problems, and the exploration of real-world phenomena in statistics.

Students engage in a practical approach that equips learners for their needs as future citizens. They learn to ask appropriate questions, map out pathways, reason about complex solutions, set up models and communicate in different forms. They experience the relevance of mathematics to their daily lives, communities and cultural backgrounds. They develop the ability to understand, analyse and take action regarding social issues in their world.

Pathways

A course of study in General Mathematics can establish a basis for further education and employment in the fields of business, commerce, education, finance, IT, social science and the arts.

Objectives

By the conclusion of the course of study, students will:

- select, recall and use facts, rules, definitions and procedures drawn from Number and algebra, Measurement and geometry, Statistics, and Networks and matrices
- comprehend mathematical concepts and techniques drawn from Number and algebra, Measurement and geometry, Statistics, and Networks and matrices
- communicate using mathematical, statistical and everyday language and conventions
- evaluate the reasonableness of solutions
- justify procedures and decisions by explaining mathematical reasoning
- solve problems by applying mathematical concepts and techniques drawn from Number and algebra, Measurement and geometry, Statistics, and Networks and matrices.

Structure

Unit 1	Unit 2	Unit 3	Unit 4
Money, measurement and relations <ul style="list-style-type: none"> • Consumer arithmetic • Shape and measurement • Linear equations and their graphs 	Applied trigonometry, algebra, matrices and univariate data <ul style="list-style-type: none"> • Applications of trigonometry • Algebra and matrices • Univariate data analysis 	Bivariate data, sequences and change, and Earth geometry <ul style="list-style-type: none"> • Bivariate data analysis • Time series analysis • Growth and decay in sequences • Earth geometry and time zones 	Investing and networking <ul style="list-style-type: none"> • Loans, investments and annuities • Graphs and networks • Networks and decision mathematics

Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

Summative assessments

Unit 3		Unit 4	
Summative internal assessment 1 (IA1): • Problem-solving and modelling task	20%	Summative internal assessment 3 (IA3): • Examination	15%
Summative internal assessment 2 (IA2): • Examination	15%		
Summative external assessment (EA): 50% • Examination			

Mathematical Methods

General senior subject

General

Mathematical Methods' major domains are Algebra, Functions, relations and their graphs, Calculus and Statistics.

Mathematical Methods enables students to see the connections between mathematics and other areas of the curriculum and apply their mathematical skills to real-world problems, becoming critical thinkers, innovators and problem-solvers.

Students learn topics that are developed systematically, with increasing levels of sophistication, complexity and connection, and build on algebra, functions and their graphs, and probability from the P–10 Australian Curriculum. Calculus is essential for developing an understanding of the physical world. The domain Statistics is used to describe and analyse phenomena involving uncertainty and variation. Both are the basis for developing effective models of the world and solving complex and abstract mathematical problems.

Students develop the ability to translate written, numerical, algebraic, symbolic and graphical information from one representation to another. They make complex use of factual knowledge to successfully formulate, represent and solve mathematical problems.

Pathways

A course of study in Mathematical Methods can establish a basis for further education and employment in the fields of natural and physical sciences (especially physics and chemistry), mathematics and science education, medical and health sciences (including human biology, biomedical science, nanoscience and forensics), engineering (including chemical, civil, electrical and mechanical engineering, avionics, communications and mining), computer science (including electronics and software design), psychology and business.

Objectives

By the conclusion of the course of study, students will:

- select, recall and use facts, rules, definitions and procedures drawn from Algebra, Functions, relations and their graphs, Calculus and Statistics
- comprehend mathematical concepts and techniques drawn from Algebra, Functions, relations and their graphs, Calculus and Statistics
- communicate using mathematical, statistical and everyday language and conventions
- evaluate the reasonableness of solutions
- justify procedures and decisions by explaining mathematical reasoning
- solve problems by applying mathematical concepts and techniques drawn from Algebra, Functions, relations and their graphs, Calculus and Statistics.

Structure

Summative external assessment (EA): 50% • Examination			

Specialist Mathematics

General senior subject

General

Specialist Mathematics' major domains are Vectors and matrices, Real and complex numbers, Trigonometry, Statistics and Calculus.

Specialist Mathematics is designed for students who develop confidence in their mathematical knowledge and ability, and gain a positive view of themselves as mathematics learners. They will gain an appreciation of the true nature of mathematics, its beauty and its power.

Students learn topics that are developed systematically, with increasing levels of sophistication, complexity and connection, building on functions, calculus, statistics from Mathematical Methods, while vectors, complex numbers and matrices are introduced. Functions and calculus are essential for creating models of the physical world. Statistics are used to describe and analyse phenomena involving probability, uncertainty and variation. Matrices, complex numbers and vectors are essential tools for explaining abstract or complex relationships that occur in scientific and technological endeavours.

Student learning experiences range from practising essential mathematical routines to developing procedural fluency, through to investigating scenarios, modelling the real world, solving problems and explaining reasoning.

Pathways

A course of study in Specialist Mathematics can establish a basis for further education and employment in the fields of science, all branches of mathematics and statistics, computer science, medicine, engineering, finance and economics.

Objectives

By the conclusion of the course of study, students will:

- select, recall and use facts, rules, definitions and procedures drawn from Vectors and matrices, Real and complex numbers, Trigonometry, Statistics and Calculus
- comprehend mathematical concepts and techniques drawn from Vectors and matrices, Real and complex numbers, Trigonometry, Statistics and Calculus
- communicate using mathematical, statistical and everyday language and conventions
- evaluate the reasonableness of solutions
- justify procedures and decisions, and prove propositions by explaining mathematical reasoning
- solve problems by applying mathematical concepts and techniques drawn from Vectors and matrices, Real and complex numbers, Trigonometry, Statistics and Calculus.

Structure

Specialist Mathematics is to be undertaken in conjunction with, or on completion of, Mathematical Methods.

Unit 1	Unit 2	Unit 3	Unit 4
Combinatorics, vectors and proof <ul style="list-style-type: none"> • Combinatorics • Vectors in the plane • Introduction to proof 	Complex numbers, trigonometry, functions and matrices <ul style="list-style-type: none"> • Complex numbers 1 • Trigonometry and functions • Matrices 	Mathematical induction, and further vectors, matrices and complex numbers <ul style="list-style-type: none"> • Proof by mathematical induction • Vectors and matrices • Complex numbers 2 	Further statistical and calculus inference <ul style="list-style-type: none"> • Integration and applications of integration • Rates of change and differential equations • Statistical inference

Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

Essential Mathematics

Applied senior subject

Applied

Essential Mathematics' major domains are Number, Data, Location and time, Measurement and Finance.

Essential Mathematics benefits students because they develop skills that go beyond the traditional ideas of numeracy.

Students develop their conceptual understanding when they undertake tasks that require them to connect mathematical concepts, operations and relations. They learn to recognise definitions, rules and facts from everyday mathematics and data, and to calculate using appropriate mathematical processes.

Students interpret and use mathematics to make informed predictions and decisions about personal and financial priorities. This is achieved through an emphasis on estimation, problem-solving and reasoning, which develops students into thinking citizens.

Pathways

A course of study in Essential Mathematics can establish a basis for further education and employment in the fields of trade, industry, business and community services. Students learn within a practical context

related to general employment and successful participation in society, drawing on the mathematics used by various professional and industry groups.

Objectives

By the conclusion of the course of study, students will:

- select, recall and use facts, rules, definitions and procedures drawn from Number, Data, Location and time, Measurement and Finance
- comprehend mathematical concepts and techniques drawn from Number, Data, Location and time, Measurement and Finance
- communicate using mathematical, statistical and everyday language and conventions
- evaluate the reasonableness of solutions
- justify procedures and decisions by explaining mathematical reasoning
- solve problems by applying mathematical concepts and techniques drawn from Number, Data, Location and time, Measurement and Finance.

English

General senior subject

General

English focuses on the study of both literary texts and non-literary texts, developing students as independent, innovative and creative learners and thinkers who appreciate the aesthetic use of language, analyse perspectives and evidence, and challenge ideas and interpretations through the analysis and creation of varied texts.

Students are offered opportunities to interpret and create texts for personal, cultural, social and aesthetic purposes. They learn how language varies according to context, purpose and audience, content, modes and mediums, and how to use it appropriately and effectively for a variety of purposes. Students have opportunities to engage with diverse texts to help them develop a sense of themselves, their world and their place in it.

Students communicate effectively in Standard Australian English for the purposes of responding to and creating texts. They make choices about generic structures, language, textual features and technologies for participating actively in literary analysis and the creation of texts in a range of modes, mediums and forms, for a variety of purposes and audiences. They explore how literary and non-literary texts shape perceptions of the world, and consider ways in which texts may reflect or challenge social and cultural ways of thinking and influence audiences.

Pathways

A course of study in English promotes open-mindedness, imagination, critical awareness and intellectual flexibility — skills that prepare students for local and global citizenship, and for lifelong learning across a wide range of contexts.

Objectives

By the conclusion of the course of study, students will:

- use patterns and conventions of genres to achieve particular purposes in cultural contexts and social situations
- establish and maintain roles of the writer/speaker/signer/designer and relationships with audiences
- create and analyse perspectives and representations of concepts, identities, times and places
- make use of and analyse the ways cultural assumptions, attitudes, values and beliefs underpin texts and invite audiences to take up positions
- use aesthetic features and stylistic devices to achieve purposes and analyse their effects in texts
- select and synthesise subject matter to support perspectives
- organise and sequence subject matter to achieve particular purposes
- use cohesive devices to emphasise ideas and connect parts of texts
- make language choices for particular purposes and contexts
- use grammar and language structures for particular purposes
- use mode-appropriate features to achieve particular purposes.

Structure

Unit 1	Unit 2	Unit 3	Unit 4
Perspectives and texts <ul style="list-style-type: none"> Examining and creating perspectives in texts Responding to a variety of non-literary and literary texts Creating responses for public audiences and persuasive texts 	Texts and culture <ul style="list-style-type: none"> Examining and shaping representations of culture in texts Responding to literary and non-literary texts, including a focus on Australian texts Creating imaginative and analytical texts 	Textual connections <ul style="list-style-type: none"> Exploring connections between texts Examining different perspectives of the same issue in texts and shaping own perspectives Creating responses for public audiences and persuasive texts 	Close study of literary texts <ul style="list-style-type: none"> Engaging with literary texts from diverse times and places Responding to literary texts creatively and critically Creating imaginative and analytical texts

Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

Summative assessments

Unit 3		Unit 4	
Summative internal assessment 1 (IA1): • Extended response — written response for a public audience	25%	Summative internal assessment 3 (IA3): • Extended response — imaginative written response	25%
Summative internal assessment 2 (IA2): • Extended response — persuasive spoken response	25%	Summative external assessment (EA): • Examination — analytical written response	25%

English as an Additional Language

General senior subject

General

English as an Additional Language is designed for students for whom English is not their first or home language. It develops students' knowledge, understanding and language skills in Standard Australian English (SAE), and provides them with opportunities to develop higher-order thinking skills and to interpret and create texts for personal, cultural, social and aesthetic purposes.

Students have opportunities to engage with language and texts to foster the skills to communicate effectively in SAE for the purposes of responding to and creating literary and non-literary texts. They develop the language skills required to be competent users of written and spoken English in a variety of contexts, including academic contexts suitable for tertiary studies.

Students make choices about generic structures, language, textual features and technologies to best convey intended meaning in the most appropriate medium and genre. They explore the ways literary and non-literary texts may reflect or challenge social and cultural ways of thinking and influence audiences. Students develop empathy for others and appreciation of different perspectives through a study of a range of literary texts from diverse cultures and periods.

Pathways

A course of study in English as an Additional Language promotes not only language and literacy skills, but also open-mindedness, imagination, critical awareness and intellectual flexibility — skills that prepare students for local and global citizenship, and for lifelong learning across a wide range of contexts.

Objectives

By the conclusion of the course of study, students will:

- use patterns and conventions of genres to achieve particular purposes in cultural contexts and social situations
- establish and maintain roles of the writer/speaker/signer/designer and relationships with audiences
- create and analyse perspectives and representations of concepts, identities, times and places
- make use of and analyse the ways cultural assumptions, attitudes, values and beliefs underpin texts and invite audiences to take up positions
- use aesthetic features and stylistic devices to achieve purposes and analyse their effects in texts
- select and synthesise subject matter to support perspectives
- organise and sequence subject matter to achieve particular purposes
- use cohesive devices to emphasise ideas and connect parts of texts
- make language choices for particular purposes and contexts
- use grammar and language structures for particular purposes
- use mode-appropriate features to achieve particular purposes.

Structure

English & Literature Extension (Year 12 only)

General senior subject

General

English & Literature Extension is an extension of both the English (2019) and the Literature (2019) syllabuses and therefore offers more challenge than other English courses as it builds on the study students have already undertaken.

English & Literature Extension provides a theorised study of literature, to understand themselves and the potential of literature to expand the scope of their experiences. They ask critical questions about cultural assumptions, implicit values and differing world views encountered in an exploration of social, cultural and textual understandings about literary texts and the ways they might be interpreted and valued.

Students apply different theoretical approaches to analyse and evaluate a variety of literary texts and different ways readers might interpret these texts. They synthesise different interpretations and relevant theoretical approaches to produce written and spoken/signed extended analytical and evaluative texts. The nature of the learning in this subject provides opportunities for students to work independently on intellectually challenging tasks.

Pathways

A course of study in English & Literature Extension can establish a basis for further education and employment in a range of fields, and can lead to a range of careers in areas where understanding social, cultural and textual influences on ways of viewing the world is a key element, such as law, journalism, media, arts, curating, education, policy and human resources. It also provides a good introduction to the academic disciplines and fields of study that involve the application of methodologies based on theoretical understandings.

Objectives

By the conclusion of the course of study, students will:

- demonstrate understanding of literary texts studied to develop interpretation/s
- demonstrate understanding of different theoretical approaches to exploring meaning in texts
- demonstrate understanding of the relationships among theoretical approaches
- apply different theoretical approaches to literary texts to develop and examine interpretations
- analyse how different genres, structures and textual features of literary texts support different interpretations
- use appropriate patterns and conventions of academic genres and communication, including correct terminology, citation and referencing conventions
- use textual features in extended analytical responses to create desired effects for specific audiences
- evaluate theoretical approaches used to explore different interpretations of literary texts
- evaluate interpretations of literary texts, making explicit the theoretical approaches that underpin them
- synthesise analysis of literary texts, theoretical approaches and interpretations with supporting evidence.

Structure

To study English & Literature Extension, students should have completed Units 1 and 2 of either English or Literature. In Year 12, students undertake Units 3 and 4 of English & Literature Extension concurrently with, or after, Units 3 and 4 of English and/or Units 3 and 4 of Literature.

Unit 3	Unit 4
Ways of reading <ul style="list-style-type: none"> • Readings and defences • Complex transformation and defence 	Exploration and evaluation <ul style="list-style-type: none"> • Extended academic research paper • Application of theory

Assessment

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

Unit 3		Unit 4	
Summative internal assessment 1 (IA1): • Extended response — reading and defence	20%	Summative internal assessment 3 (IA3): • Extended response — academic research paper	35%
Summative internal assessment 2 (IA2): • Extended response — complex transformation and defence	20%	Summative external assessment (EA): • Examination — theorised exploration of unseen text	25%

Essential English develops and refines students' understanding of language, literature and literacy to enable them to interact confidently and effectively with others in everyday, community and social contexts. Students recognise language and texts as relevant in their lives now and in the future and learn to understand, accept or challenge the values and attitudes in these texts.

Students engage with language and texts to foster skills to communicate confidently and effectively in Standard Australian English in a variety of contemporary contexts and social situations, including everyday, social, community, further education and work-related contexts. They choose generic structures, language, language features and technologies to best convey meaning. They develop skills to read for meaning and purpose, and to use, critique and appreciate a range of contemporary literary and non-literary texts.

Students use language effectively to produce texts for a variety of purposes and audiences and engage creative and imaginative thinking to explore their own world and the worlds of others. They actively and critically interact with a range of texts, developing an awareness of how the language they engage with positions them and others.

Pathways

A course of study in Essential English promotes open-mindedness, imagination, critical awareness and intellectual flexibility — skills that prepare students for local and global citizenship, and for lifelong learning across a wide range of contexts.

Objectives

By the conclusion of the course of study, students will:

- use patterns and conventions of genres to achieve particular purposes in cultural contexts and social situations
- use appropriate roles and relationships with audiences
- construct and explain representations of identities, places, events and concepts
- make use of and explain the ways cultural assumptions, attitudes, values and beliefs underpin texts and influence meaning
- explain how language features and text structures shape meaning and invite particular responses
- select and use subject matter to support perspectives
- sequence subject matter and use mode-appropriate cohesive devices to construct coherent texts
- make mode-appropriate language choices according to register informed by purpose, audience and context
- use language features to achieve particular purposes across modes.

Structure

Unit 1	Unit 2	Unit 3	Unit 4
Language that works <ul style="list-style-type: none"> • Responding to a variety of texts used in and developed for a work context • Creating multimodal and written texts 	Texts and human experiences <ul style="list-style-type: none"> • Responding to reflective and nonfiction texts that explore human experiences • Creating spoken and written texts 	Language that influences <ul style="list-style-type: none"> • Creating and shaping perspectives on community, local and global issues in texts • Responding to texts that seek to influence audiences 	Representations and popular culture texts <ul style="list-style-type: none"> • Responding to popular culture texts • Creating representations of Australian identities, places, events and concepts

Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete four summative assessments. Schools develop three summative internal assessments and the common internal assessment (CIA) is developed by the QCAA.

Summative assessments

Ancient History

General senior subject

General

Ancient History provides opportunities for students to study people, societies and civilisations of the past, from the development of the earliest human communities to the end of the Middle Ages. Students explore the interaction of societies, and the impact of individuals and groups on ancient events and ways of life, and study the development of some features of modern society, such as social organisation, systems of law, governance and religion.

Students analyse and interpret archaeological and written evidence. They develop increasingly sophisticated skills and understandings of historical issues and problems by interrogating the surviving evidence of ancient sites, societies, individuals and significant historical periods. They investigate the problematic nature of evidence, pose increasingly complex questions about the past and formulate reasoned responses.

Students gain multi-disciplinary skills in analysing textual and visual sources, constructing arguments, challenging assumptions, and thinking both creatively and critically.

Pathways

A course of study in Ancient History can establish a basis for further education and employment in the fields of archaeology, history, education, psychology, sociology, law, business, economics, politics, journalism, the media, health and social sciences, writing, academia and research.

Objectives

By the conclusion of the course of study, students will:

- comprehend terms, issues and concepts
- devise historical questions and conduct research
- analyse historical sources and evidence
- synthesise information from historical sources and evidence
- evaluate historical interpretations
- create responses that communicate meaning.

Structure

Business provides opportunities for students to develop business knowledge and skills to contribute meaningfully to society, the workforce and the marketplace and prepares them as potential employees, employers, leaders, managers and entrepreneurs.

Students investigate the business life cycle, develop skills in examining business data and information and learn business concepts, theories, processes and strategies relevant to leadership, management and entrepreneurship. They investigate the influence of, and implications for, strategic development in the functional areas of finance, human resources, marketing and operations.

Students use a variety of technological, communication and analytical tools to comprehend, analyse, interpret and synthesise business data and information. They engage with the dynamic business world (in both national and global contexts), the changing workforce and emerging digital technologies.

Pathways

A course of study in Business can establish a basis for further education and employment in the fields of business management, business development, entrepreneurship, business analytics, economics, business law, accounting and finance, international business, marketing, human resources management and business information systems.

Objectives

By the conclusion of the course of study, students will:

- describe business environments and situations
- explain business concepts, strategies and processes
- select and analyse business data and information
- interpret business relationships, patterns and trends to draw conclusions
- evaluate business practices and strategies to make decisions and propose recommendations
- create responses that communicate meaning to suit purpose and audience.

Structure

Unit 1	Unit 2	Unit 3	Unit 4

Geography focuses on the significance of 'place' and 'space' in understanding our world. Students engage in a range of learning experiences that develop their geographical skills and thinking through the exploration of geographical challenges and their effects on people, places and the environment.

Students investigate places in Australia and across the globe to observe and measure spatial, environmental, economic, political, social and cultural factors. They interpret global concerns and challenges including responding to risk in hazard zones, planning sustainable places, managing land cover transformations and planning for population change. They develop an understanding of the complexities involved in sustainable planning and management practices.

Students observe, gather, organise, analyse and present data and information across a range of scales. They engage in real-world applications of geographical skills and thinking, including the collection and representation of data.

Pathways

A course of study in Geography can establish a basis for further education and employment in the fields of urban and environmental design, planning and management; biological and environmental science; conservation and land management; emergency response and hazard management; oceanography, surveying, global security, economics, business, law, engineering, architecture, information technology, and science.

Objectives

By the conclusion of the course of study, students will:

- explain geographical processes
- comprehend geographic patterns
- analyse geographical data and information
- apply geographical understanding
- synthesise information from the analysis to propose action
- communicate geographical understanding.

Structure

Unit 1	Unit 2	Unit 3	Unit 4
<p>Responding to risk and vulnerability in hazard zones</p> <ul style="list-style-type: none"> • Natural hazard zones • Ecological hazard zones 	<p>Planning sustainable places</p> <ul style="list-style-type: none"> • Responding to challenges facing a place in Australia • Managing the challenges facing a megacity 	<p>Responding to land cover transformations</p> <ul style="list-style-type: none"> • Land cover transformations and climate change • Responding to local land cover transformations 	<p>Managing population change</p> <ul style="list-style-type: none"> • Population challenges in Australia • Global population change

Legal Studies focuses on the interaction between society and the discipline of law and explores the role and development of law in response to current issues. Students study the legal system and how it regulates activities and aims to protect the rights of individuals, while balancing these with obligations and responsibilities.

Students study the foundations of law, the criminal justice process and the civil justice system. They critically examine issues of governance, explore contemporary issues of law reform and change, and consider Australian and international human rights issues.

Students develop skills of inquiry, critical thinking, problem-solving and reasoning to make informed and ethical decisions and recommendations. They identify and describe legal issues, explore information and data, analyse, evaluate to make decisions or propose recommendations, and create responses that convey legal meaning. They question, explore and discuss tensions between changing social values, justice and equitable outcomes.

Pathways

A course of study in Legal Studies can establish a basis for further education and employment in the fields of law, law enforcement, criminology, justice studies and politics. The knowledge, skills and attitudes students gain are transferable to all discipline areas and post-schooling tertiary pathways. The research and analytical skills this course develops are universally valued in business, health, science and engineering industries.

Objectives

By the conclusion of the course of study, students will:

- comprehend legal concepts, principles and processes
- select legal information from sources
- analyse legal issues
- evaluate legal situations
- create responses that communicate meaning.

Structure

Unit 1	Unit 2	Unit 3	Unit 4
Beyond reasonable doubt <ul style="list-style-type: none"> • Legal foundations • Criminal investigation process • Criminal trial process • Punishment and sentencing 	Balance of probabilities <ul style="list-style-type: none"> • Civil law foundations • Contractual obligations • Negligence and the duty of care 	Law, governance and change <ul style="list-style-type: none"> • Governance in Australia • Law reform within a dynamic society 	Human rights in legal contexts <ul style="list-style-type: none"> • Human rights • The effectiveness of international law • Human rights in Australian contexts

Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

Business Studies provides opportunities for students to develop practical business knowledge, understanding and skills for use, participation and work in a range of business contexts.

Students develop their business knowledge and understanding through applying business practices and business functions in business contexts, analysing business information and proposing and implementing outcomes and solutions in business contexts.

Students develop effective decision-making skills and learn how to plan, implement and evaluate business outcomes and solutions, resulting in improved economic, consumer and financial literacy.

Pathways

A course of study in Business Studies can establish a basis for further education and employment in office administration, data entry, retail, sales, reception, small business, finance administration, public relations, property management, events administration and marketing.

Structure

The Business Studies course is designed around core and elective topics. The elective learning occurs through business contexts.

Core topics	Elective topics	
<ul style="list-style-type: none"> Business practices, consisting of Business fundamentals, Financial literacy, Business communication and Business technology Business functions, consisting of Working in administration, Working in finance, Working with customers and Working in marketing 	<ul style="list-style-type: none"> Entertainment Events management Financial services Health and well-being Insurance Legal Media Mining 	<ul style="list-style-type: none"> Not-for-profit Real estate Retail Rural Sports management Technical, e.g. manufacturing, construction, engineering Tourism Travel

Objectives

By the end of the course of study, students should:

- describe concepts and ideas related to business functions
- explain concepts and ideas related to business functions
- demonstrate processes, procedures and skills related to business functions to complete tasks
- analyse business information related to business functions and contexts
- apply knowledge, understanding and skills related to business functions and contexts
- use language conventions and features to communicate ideas and information
- make and justify decisions for business solutions and outcomes
- plan and organise business solutions and outcomes
- evaluate business decisions, solutions and outcomes.

Assessment

For Business Studies, assessment from Units 3 and 4 is used to determine the student's exit result, and consists of four instruments from at least three different assessment techniques, including:

- at least one project
- no more than two assessment instruments from any one technique.

Project	Extended response	Examination
A response to a single task, situation and/or scenario.	A technique that assesses the interpretation, analysis/examination and/or evaluation of ideas and information in provided stimulus materials.	A response that answers a number of provided questions, scenarios and/or problems.
At least two different components from the following: <ul style="list-style-type: none"> • written: 500–900 words • spoken: 2½–3½ minutes • multimodal: 3–6 minutes • performance: continuous class time • product: continuous class time. 	Presented in one of the following modes: <ul style="list-style-type: none"> • written: 600–1000 words • spoken: 3–4 minutes • multimodal: 4–7 minutes. 	<ul style="list-style-type: none"> • 60–90 minutes • 50–250 words per item on the test

Social & Community Studies

Applied senior subject

Applied

Social & Community Studies focuses on personal development and social skills which lead to self-reliance, self-management and concern for others. It fosters appreciation of, and respect for, cultural diversity and encourages responsible attitudes and behaviours required for effective participation in the community and for thinking critically, creatively and constructively about their future.

Students develop personal, interpersonal, and citizenship skills, encompassing social skills, communication skills, respect for and interaction with others, building rapport, problem solving and decision making, self-esteem, self-confidence and resilience, workplace skills, learning and study skills.

Students use an inquiry approach in collaborative learning environments to investigate the dynamics of society and the benefits of working with others in the community. They are provided with opportunities to explore and refine personal values and lifestyle choices and to practise, develop and value social, community and workplace participation skills.

Pathways

A course of study in Social & Community Studies can establish a basis for further education and employment, as it helps students develop the skills and attributes necessary in all workplaces.

Objectives

By the conclusion of the course of study, students should:

- recognise and describe concepts and ideas related to the development of personal, interpersonal and citizenship skills
- recognise and explain the ways life skills relate to social contexts
- explain issues and viewpoints related to social investigations
- organise information and material related to social contexts and issues
- analyse and compare viewpoints about social contexts and issues
- apply concepts and ideas to make decisions about social investigations
- use language conventions and features to communicate ideas and information, according to purposes
- plan and undertake social investigations
- communicate the outcomes of social investigations, to suit audiences
- appraise inquiry processes and the outcomes of social investigations.

Structure

The Social and Community Studies course is designed around three core life skills areas which must be covered within every elective topic studied, and be integrated throughout the course.

Core life skills	Elective topics	
<ul style="list-style-type: none"> • Personal skills — Growing and developing as an individual • Interpersonal skills — Living with and relating to other people • Citizenship skills — Receiving from and contributing to community 	<ul style="list-style-type: none"> • The Arts and the community • Australia's place in the world • Gender and identity • Health: Food and nutrition • Health: Recreation and leisure 	<ul style="list-style-type: none"> • Into relationships • Legally, it could be you • Money management • Science and technology • Today's society • The world of work

Assessment

For Social and Community Studies, assessment from Units 3 and 4 is used to determine the student's exit result, and consists of four instruments from at least three different assessment techniques, including:

- one project or investigation
- one examination
- no more than two assessments from each technique.

Project	Investigation	Extended response	Examination
A response to a single task, situation and/or scenario.	A response that includes locating and using information beyond students' own knowledge and the data they have been given.	A technique that assesses the interpretation, analysis/examination and/or evaluation of ideas and information in provided stimulus materials.	A response that answers a number of provided questions, scenarios and/or problems.
At least two different components from the following: <ul style="list-style-type: none"> • written: 500–900 words • spoken: 2½–3½ minutes • multimodal: 3–6 minutes • performance: continuous class time • product: continuous class time. 	Presented in one of the following modes: <ul style="list-style-type: none"> • written: 600–1000 words • spoken: 3–4 minutes • multimodal: 4–7 minutes. 	Presented in one of the following modes: <ul style="list-style-type: none"> • written: 600–1000 words • spoken: 3–4 minutes • multimodal: 4–7 minutes. 	<ul style="list-style-type: none"> • 60–90 minutes • 50–250 words per item on the test

Tourism

Applied senior subject

Applied

Tourism studies enable students to gain an appreciation of the role of the tourism industry and the structure, scope and operation of the related tourism sectors of travel, hospitality and visitor services.

Students examine the socio-cultural, environmental and economic aspects of tourism, as well as tourism opportunities, problems and issues across global, national and local contexts.

Students develop and apply tourism-related knowledge and understanding through learning experiences and assessment in which they plan projects, analyse issues and opportunities, and evaluate concepts and information.

Pathways

A course of study in Tourism can establish a basis for further education and employment in businesses and industries such as tourist attractions, cruising, gaming, government and industry organisations, meeting and events coordination, caravan parks, marketing, museums and galleries, tour operations, wineries, cultural liaison, tourism and leisure industry development, and transport and travel.

Structure

The Tourism course is designed around interrelated core topics and electives.

Core topics	Elective topics
<ul style="list-style-type: none"> • Tourism as an industry • The travel experience • Sustainable tourism 	<ul style="list-style-type: none"> • Technology and tourism • Forms of tourism • Tourist destinations and attractions • Tourism marketing • Types of tourism • Tourism client groups

Objectives

By the conclusion of the course of study, students should:

- recall terminology associated with tourism and the tourism industry
- describe and explain tourism concepts and information
- identify and explain tourism issues or opportunities
- analyse tourism issues and opportunities
- apply tourism concepts and information from a local, national and global perspective
- communicate meaning and information using language conventions and features relevant to tourism contexts
- generate plans based on consumer and industry needs
- evaluate concepts and information within tourism and the tourism industry
- draw conclusions and make recommendations.

Assessment

For Tourism, assessment from Units 3 and 4 is used to determine the student's exit result, and consists of four instruments from at least three different assessment techniques, including:

- one project
- one examination
- no more than two assessments from each technique.

Project	Investigation	Extended response	Examination
A response to a single task, situation and/or scenario.	A response that includes locating and using information beyond students' own knowledge and the data they have been given.	A technique that assesses the interpretation, analysis/examination and/or evaluation of ideas and information in provided stimulus materials.	A response that answers a number of provided questions, scenarios and/or problems.
<p>At least two different components from the following:</p> <ul style="list-style-type: none"> • written: 500–900 words • spoken: 2½–3½ minutes • multimodal <ul style="list-style-type: none"> – non-presentation: 8 A4 pages max (or equivalent) – presentation: 3–6 minutes • performance: continuous class time • product: continuous class time. 	<p>Presented in one of the following modes:</p> <ul style="list-style-type: none"> • written: 600–1000 words • spoken: 3–4 minutes • multimodal <ul style="list-style-type: none"> – non-presentation: 10 A4 pages max (or equivalent) – presentation: 4–7 minutes. 	<p>Presented in one of the following modes:</p> <ul style="list-style-type: none"> • written: 600–1000 words • spoken: 3–4 minutes • multimodal <ul style="list-style-type: none"> – non-presentation: 10 A4 pages max (or equivalent) – presentation: 4–7 minutes. 	<ul style="list-style-type: none"> • 60–90 minutes • 50–250 words per item

Design

General senior subject

General

Design focuses on the application of design thinking to envisage creative products, services and environments in response to human needs, wants and opportunities. Designing is a complex and sophisticated form of problem-solving that uses divergent and convergent thinking strategies that can be practised and improved. Designers are separated from the constraints of production processes to allow them to appreciate and exploit new innovative ideas.

Students learn how design has influenced the economic, social and cultural environment in which they live. They understand the agency of humans in conceiving and imagining possible futures through design. Collaboration, teamwork and communication are crucial skills needed to work in design teams and liaise with stakeholders. They learn the value of creativity and build resilience as they experience iterative design processes, where the best ideas may be the result of trial and error and a willingness to take risks and experiment with alternatives.

Students learn about and experience design through exploring needs, wants and opportunities; developing ideas and design concepts; using drawing and low-fidelity prototyping skills; and evaluating ideas and design concepts. They communicate design proposals to suit different audiences.

Pathways

A course of study in Design can establish a basis for further education and employment in the fields of architecture, digital media design, fashion design, graphic design, industrial design, interior design and landscape architecture.

Objectives

By the conclusion of the course of study, students will:

- describe design problems and design criteria
- represent ideas, design concepts and design information using drawing and low-fidelity prototyping
- analyse needs, wants and opportunities using data
- devise ideas in response to design problems
- synthesise ideas and design information to propose design concepts
- evaluate ideas and design concepts to make refinements
- make decisions about and use mode-appropriate features, language and conventions for particular purposes and contexts.

Structure

Unit 1	Unit 2	Unit 3	Unit 4
Design in practice <ul style="list-style-type: none"> • Experiencing design • Design process • Design styles 	Commercial design <ul style="list-style-type: none"> • Explore — client needs and wants • Develop — collaborative design 	Human-centred design <ul style="list-style-type: none"> • Designing with empathy 	Sustainable design <ul style="list-style-type: none"> • Explore — sustainable design opportunities • Develop — redesign

Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

Summative assessments

Unit 3		Unit 4	
Summative internal assessment 1 (IA1): • Examination — design challenge	15%	Summative internal assessment 3 (IA3): • Project	25%
Summative internal assessment 2 (IA2): • Project	35%	Summative external assessment (EA): • Examination — design challenge	25%

Digital Solutions enables students to learn about algorithms, computer languages and user interfaces through generating digital solutions to problems. Students engage with data, information and applications to create digital solutions that filter and present data in timely and efficient ways while understanding the need to encrypt and protect data. They understand computing's personal, local and global impact, and the issues associated with the ethical integration of technology into our daily lives.

Students use problem-based learning to write computer programs to create digital solutions that: use data; require interactions with users and within systems; and affect people, the economy and environments. They develop solutions using combinations of readily available hardware and software development environments, code libraries or specific instructions provided through programming.

Students create, construct and repurpose solutions that are relevant in a world where data and digital realms are transforming entertainment, education, business, manufacturing and many other industries.

Pathways

A course of study in Digital Solutions can establish a basis for further education and employment in the fields of science, technologies, engineering and mathematics.

Objectives

By the conclusion of the course of study, students will:

- recognise and describe elements, components, principles and processes
- symbolise and explain information, ideas and interrelationships
- analyse problems and information
- determine solution requirements and criteria
- synthesise information and ideas to determine possible digital solutions
- generate components of the digital solution
- evaluate impacts, components and solutions against criteria to make refinements and justified recommendations
- make decisions about and use mode-appropriate features, language and conventions for particular purposes and contexts.

Structure

Unit 1	Unit 2	Unit 3	Unit 4
Creating with code <ul style="list-style-type: none"> • Understanding digital problems • User experiences and interfaces • Algorithms and programming techniques • Programmed solutions 	Application and data solutions <ul style="list-style-type: none"> • Data-driven problems and solution requirements • Data and programming techniques • Prototype data solutions 	Digital innovation <ul style="list-style-type: none"> • Interactions between users, data and digital systems • Real-world problems and solution requirements • Innovative digital solutions 	Digital impacts <ul style="list-style-type: none"> • Digital methods for exchanging data • Complex digital data exchange problems and solution requirements • Prototype digital data exchanges

Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

Food & Nutrition is the study of food in the context of food science, nutrition and food technologies, considering overarching concepts of waste management, sustainability and food protection.

Students explore the chemical and functional properties of nutrients to create food solutions that maintain the beneficial nutritive values. This knowledge is fundamental for continued development of a safe and sustainable food system that can produce high quality, nutritious solutions with an extended shelf life. Their studies of the food system include the sectors of production, processing, distribution, consumption, research and development.

Students actively engage in a food and nutrition problem-solving process to create food solutions that contribute positively to preferred personal, social, ethical, economic, environmental, legal, sustainable and technological futures.

Pathways

A course of study in Food & Nutrition can establish a basis for further education and employment in the fields of science, technology, engineering and health.

Objectives

By the conclusion of the course of study, students will:

- recognise and describe food and nutrition facts and principles
- explain food and nutrition ideas and problems
- analyse problems, information and data
- determine solution requirements and criteria
- synthesise information and data to develop ideas for solutions
- generate solutions to provide data to determine the feasibility of the solution
- evaluate and refine ideas and solutions to make justified recommendations for enhancement
- make decisions about and use mode-appropriate features, language and conventions for particular purposes and contexts.

Structure

Unit 1	Unit 2	Unit 3	Unit 4
Food science of vitamins, minerals and protein <ul style="list-style-type: none"> • Introduction to the food system • Vitamins and minerals • Protein • Developing food solutions 	Food drivers and emerging trends <ul style="list-style-type: none"> • Consumer food drivers • Sensory profiling • Labelling and food safety • Food formulation for consumer markets 	Food science of carbohydrate and fat <ul style="list-style-type: none"> • The food system • Carbohydrate • Fat • Developing food solutions 	Food solution development for nutrition consumer markets <ul style="list-style-type: none"> • Formulation and reformulation for nutrition consumer markets • Food development process

Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

Furnishing Skills

Applied senior subject

Applied

Furnishing Skills focuses on the underpinning industry practices and production processes required to manufacture furnishing products with high aesthetic qualities.

Students understand industry practices; interpret specifications, including technical information and drawings; demonstrate and apply safe practical production processes with hand/power tools and machinery; communicate using oral, written and graphical modes; organise, calculate and plan production processes; and evaluate the products they create using predefined specifications.

Students develop transferable skills by engaging in manufacturing tasks that relate to business and industry, and that promote adaptable, competent, self-motivated and safe individuals who can work with colleagues to solve problems and complete practical work.

Pathways

A course of study in Furnishing Skills can establish a basis for further education and employment in the furnishing industry. With additional training and experience, potential employment opportunities may be found in furnishing trades as, for example,

a furniture-maker, wood machinist, cabinet-maker, polisher, shopfitter, upholsterer, furniture restorer, picture framer, floor finisher or glazier.

Objectives

By the conclusion of the course of study, students should:

- describe industry practices in manufacturing tasks
- demonstrate fundamental production skills
- interpret drawings and technical information
- analyse manufacturing tasks to organise materials and resources
- select and apply production skills and procedures in manufacturing tasks
- use visual representations and language conventions and features to communicate for particular purposes
- plan and adapt production processes
- create products from specifications
- evaluate industry practices, production processes and products, and make recommendations.

Structure

The Furnishing Skills course is designed around core and elective topics.

Core topics	Elective topics
<ul style="list-style-type: none">• Industry practices• Production processes	<ul style="list-style-type: none">• Cabinet-making• Furniture finishing• Furniture-making• Glazing and framing• Upholstery

Assessment

For Furnishing Skills, assessment from Units 3 and 4 is used to determine the student's exit result, and consists of four instruments, including:

- at least two projects
- at least one practical demonstration (separate to the assessable component of a project).

Project	Practical demonstration	Examination
A response to a single task, situation and/or scenario.	A task that assesses the practical application of a specific set of teacher-identified production skills and procedures.	A response that answers a number of provided questions, scenarios and/or problems.
<p>A project consists of a product component and at least one of the following components:</p> <ul style="list-style-type: none"> • written: 500–900 words • spoken: 2½–3½ minutes • multimodal <ul style="list-style-type: none"> – non-presentation: 8 A4 pages max (or equivalent) – presentation: 3-6 minutes • product: continuous class time. 	Students demonstrate production skills and procedures in class under teacher supervision.	<ul style="list-style-type: none"> • 60–90 minutes • 50–250 words per item

FURNISHING SKILLS – Applied Senior Subject	
Invoiced Fees:	<p>\$125 per year: <i>Project materials</i></p> <p>INVOICED FEES FOR THIS SUBJECT MUST BE PAID IN FULL ON OR BEFORE 10 NOVEMBER 2022 ALONG WITH FULL/INSTALMENT PAYMENT OF 2023 STUDENT RESOURCE SCHEME TO ENSURE PLACEMENT INTO THE SUBJECT. NON-REFUNDABLE AFTER COURSE COMMENCEMENT. STUDENTS WISHING TO ENTER THIS SUBJECT/PROGRAM AFTER THIS DATE ARE REQUIRED TO PAY IN FULL AT ENROLMENT INTERVIEW OR PRIOR TO SUBJECT CHANGE FINAL APPROVAL.</p>

Hospitality Practices

Applied senior subject

Applied

Hospitality Practices develops knowledge, understanding and skills about the hospitality industry and emphasises the food and beverage sector, which includes food and beverage production and service.

Students develop an understanding of hospitality and the structure, scope and operation of related activities in the food and beverage sector and examine and evaluate industry practices from the food and beverage sector.

Students develop skills in food and beverage production and service. They work as individuals and as part of teams to plan and implement events in a hospitality context. Events provide opportunities for students to participate in and produce food and beverage products and perform service for customers in real-world hospitality contexts.

Pathways

A course of study in Hospitality Practices can establish a basis for further education and employment in the hospitality sectors of food and beverage, catering, accommodation and entertainment. Students could pursue further studies in hospitality, hotel, event and tourism or business management, which allows for specialisation.

Structure

The Hospitality Practices course is designed around core topics embedded in a minimum of two elective topics.

Core topics	Elective topics
<ul style="list-style-type: none">• Navigating the hospitality industry• Working effectively with others• Hospitality in practice	<ul style="list-style-type: none">• Kitchen operations• Beverage operations and service• Food and beverage service

Objectives

By the conclusion of the course of study, students should:

- explain concepts and ideas from the food and beverage sector
- describe procedures in hospitality contexts from the food and beverage sector
- examine concepts and ideas and procedures related to industry practices from the food and beverage sector
- apply concepts and ideas and procedures when making decisions to produce products and perform services for customers
- use language conventions and features to communicate ideas and information for specific purposes.
- plan, implement and justify decisions for events in hospitality contexts
- critique plans for, and implementation of, events in hospitality contexts
- evaluate industry practices from the food and beverage sector.

Assessment

For Hospitality Practices, assessment from Units 3 and 4 is used to determine the student's exit result, and consists of four instruments, including:

- at least two projects
- at least one investigation or an extended response.

Project	Investigation	Extended response	Examination
A response to a single task, situation and/or scenario.	A response that includes locating and using information beyond students' own knowledge and the data they have been given.	A technique that assesses the interpretation, analysis/examination and/or evaluation of ideas and information in provided stimulus materials.	A response that answers a number of provided questions, scenarios and/or problems.
<p>A project consists of a product and performance component and one other component from the following:</p> <ul style="list-style-type: none"> • written: 500–900 words • spoken: 2½–3½ minutes • multimodal: 3–6 minutes • product and performance: continuous class time 	<p>Presented in one of the following modes:</p> <ul style="list-style-type: none"> • written: 600–1000 words • spoken: 3–4 minutes • multimodal: 4–7 minutes. 	<p>Presented in one of the following modes:</p> <ul style="list-style-type: none"> • written: 600–1000 words • spoken: 3–4 minutes • multimodal: 4–7 minutes. 	<ul style="list-style-type: none"> • 60–90 minutes • 50–250 words per item

HOSPITALITY PRACTICES – Applied Senior Subject	
Invoiced Fees:	<p>\$125 per year: Supply of ingredients & equipment as part of training course except when students make choices outside recommended menu.</p> <p>INVOICED FEES FOR THIS SUBJECT MUST BE PAID IN FULL ON OR BEFORE 10 NOVEMBER 2022 ALONG WITH FULL/INSTALMENT PAYMENT OF 2023 STUDENT RESOURCE SCHEME TO ENSURE PLACEMENT INTO THE SUBJECT. NON-REFUNDABLE AFTER COURSE COMMENCEMENT. STUDENTS WISHING TO ENTER THIS SUBJECT/PROGRAM AFTER THIS DATE ARE REQUIRED TO PAY IN FULL AT ENROLMENT INTERVIEW OR PRIOR TO SUBJECT CHANGE FINAL APPROVAL.</p>

Industrial Graphics Skills

Applied senior subject

Applied

Industrial Graphics Skills focuses on the underpinning industry practices and production processes required to produce the technical drawings used in a variety of industries, including building and construction, engineering and furnishing.

Students understand industry practices, interpret technical information and drawings, demonstrate and apply safe practical modelling procedures with tools and materials, communicate using oral and written modes, organise and produce technical drawings and evaluate drawings using specifications.

Students develop transferable skills by engaging in drafting and modelling tasks that relate to business and industry, and that promote adaptable, competent, self-motivated and safe individuals who can work with colleagues to solve problems and complete tasks.

Pathways

A course of study in Industrial Graphics Skills can establish a basis for further education and employment in a range of roles and trades in the manufacturing industries. With additional training and experience, potential employment opportunities may be found in drafting roles such as architectural drafter, estimator, mechanical drafter, electrical drafter,

structural drafter, civil drafter and survey drafter.

Objectives

By the conclusion of the course of study, students should:

- describe industry practices in drafting and modelling tasks
- demonstrate fundamental drawing skills
- interpret drawings and technical information
- analyse drafting tasks to organise information
- select and apply drawing skills and procedures in drafting tasks
- use language conventions and features to communicate for particular purposes
- construct models from drawings
- create technical drawings from industry requirements
- evaluate industry practices, drafting processes and drawings, and make recommendations.

Structure

The Industrial Graphics Skills course is designed around core and elective topics.

Core topics	Elective topics
<ul style="list-style-type: none">• Industry practices• Drafting processes	<ul style="list-style-type: none">• Building and construction drafting• Engineering drafting• Furnishing drafting

Assessment

For Industrial Graphic Skills, assessment from Units 3 and 4 is used to determine the student's exit result, and consists of four instruments, including:

- at least two projects
- at least one practical demonstration (separate to the assessable component of a project).

Project	Practical demonstration	Examination
A response to a single task, situation and/or scenario.	A task that assesses the practical application of a specific set of teacher-identified production skills and procedures.	A response that answers a number of provided questions, scenarios and/or problems.
<p>A project consists of a technical drawing (which includes a model) component and at least one of the following components:</p> <ul style="list-style-type: none"> • written: 500–900 words • spoken: 2½–3½ minutes • multimodal <ul style="list-style-type: none"> – non-presentation: 8 A4 pages max (or equivalent) – presentation: 3-6 minutes • product: continuous class time. 	Students demonstrate production skills and procedures in class under teacher supervision.	<ul style="list-style-type: none"> • 60–90 minutes • 50–250 words per item

Industrial Technology Skills

Applied senior subject

Applied

Industrial Technology Skills focuses on the practices and processes required to manufacture products in a variety of industries.

Students understand industry practices; interpret specifications, including technical information and drawings; demonstrate and apply safe, practical production processes with hand/power tools and machinery; communicate using oral, written and graphical modes; organise, calculate and plan production processes; and evaluate the products they create using predefined specifications.

Students develop transferable skills by engaging in manufacturing tasks that relate to business and industry, and that promote adaptable, competent, self-motivated and safe individuals who can work with colleagues to solve problems and complete practical work.

Pathways

A course of study in Industrial Technology Skills can establish a basis for further education and employment in manufacturing industries. Employment opportunities may be found in the industry areas of aeroskills,

automotive, building and construction, engineering, furnishing, industrial graphics and plastics.

Objectives

By the conclusion of the course of study, students should:

- describe industry practices in manufacturing tasks
- demonstrate fundamental production skills
- interpret drawings and technical information
- analyse manufacturing tasks to organise materials and resources
- select and apply production skills and procedures in manufacturing tasks
- use visual representations and language conventions and features to communicate for particular purposes
- plan and adapt production processes
- create products from specifications
- evaluate industry practices, production processes and products, and make recommendations.

Structure

The Industrial Technology Skills course is designed around:

- core topics, which are integrated throughout the course
- elective topics, organised in industry areas, and manufacturing tasks related to the chosen electives.

Core topics	Industry area	Elective topics
<ul style="list-style-type: none"> • Industry practices • Production processes 	Aeroskills	<ul style="list-style-type: none"> • Aeroskills mechanical • Aeroskills structures
	Automotive	<ul style="list-style-type: none"> • Automotive mechanical • Automotive body repair • Automotive electrical
	Building and construction	<ul style="list-style-type: none"> • Bricklaying • Plastering and painting • Concreting • Carpentry • Tiling • Landscaping
	Engineering	<ul style="list-style-type: none"> • Sheet metal working • Welding and fabrication • Fitting and machining
	Furnishing	<ul style="list-style-type: none"> • Cabinet-making • Furniture finishing • Furniture-making • Glazing and framing • Upholstery
	Industrial graphics	<ul style="list-style-type: none"> • Engineering drafting • Building and construction drafting • Furnishing drafting
	Plastics	<ul style="list-style-type: none"> • Thermoplastics fabrication • Thermosetting fabrication

Assessment

For Industrial Technology Skills, assessment from Units 3 and 4 is used to determine the student's exit result, and this consists of four instruments, including:

- at least two projects
- at least one practical demonstration (separate to the assessable component of a project).

Project	Practical demonstration	Examination
A response to a single task, situation and/or scenario.	A task that assesses the practical application of a specific set of teacher-identified production skills and procedures.	A response that answers a number of provided questions, scenarios and/or problems.
<p>A project consists of a product component and at least one of the following components:</p> <ul style="list-style-type: none"> • written: 500–900 words • spoken: 2½–3½ minutes • multimodal <ul style="list-style-type: none"> – non-presentation: 8 A4 pages max (or equivalent) – presentation: 3–6 minutes • product: continuous class time. 	Students demonstrate production skills and procedures in class under teacher supervision.	<ul style="list-style-type: none"> • 60–90 minutes • 50–250 words per item

INDUSTRIAL TECHNOLOGY SKILLS – Applied Senior Subject

Physical Education provides students with knowledge, understanding and skills to explore and enhance their own and others' health and physical activity in diverse and changing contexts.

Physical Education provides a philosophical and educative framework to promote deep learning in three dimensions: about, through and in physical activity contexts. Students optimise their engagement and performance in physical activity as they develop an understanding and appreciation of the interconnectedness of these dimensions.

Students learn how body and movement concepts and the scientific bases of biophysical, sociocultural and psychological concepts and principles are relevant to their engagement and performance in physical activity. They engage in a range of activities to develop movement sequences and movement strategies.

Students learn experientially through three stages of an inquiry approach to make connections between the scientific bases and the physical activity contexts. They recognise and explain concepts and principles about and through movement, and demonstrate and apply body and movement concepts to movement sequences and movement strategies.

Through their purposeful engagement in physical activities, students gather data to analyse, synthesise and devise strategies to optimise engagement and performance. They engage in reflective decision-making as they evaluate and justify strategies to achieve a particular outcome.

Pathways

A course of study in Physical Education can establish a basis for further education and employment in the fields of exercise science, biomechanics, the allied health professions, psychology, teaching, sport journalism, sport marketing and management, sport promotion, sport development and coaching.

Objectives

By the conclusion of the course of study, students will:

- recognise and explain concepts and principles about movement
- demonstrate specialised movement sequences and movement strategies
- apply concepts to specialised movement sequences and movement strategies
- analyse and synthesise data to devise strategies about movement
- evaluate strategies about and in movement
- justify strategies about and in movement
- make decisions about and use language, conventions and mode-appropriate features for particular purposes and contexts.

Structure

Unit 1	Unit 2	Unit 3	Unit 4
Motor learning, functional anatomy, biomechanics and physical activity <ul style="list-style-type: none"> • Motor learning integrated with a selected physical activity • Functional anatomy and biomechanics integrated with a selected physical activity 	Sport psychology, equity and physical activity <ul style="list-style-type: none"> • Sport psychology integrated with a selected physical activity • Equity — barriers and enablers 	Tactical awareness, ethics and integrity and physical activity <ul style="list-style-type: none"> • Tactical awareness integrated with one selected 'Invasion' or 'Net and court' physical activity • Ethics and integrity 	Energy, fitness and training and physical activity <ul style="list-style-type: none"> • Energy, fitness and training integrated with one selected 'Invasion', 'Net and court' or 'Performance' physical activity

Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

Sport & Recreation provides students with opportunities to learn in, through and about sport and active recreation activities, examining their role in the lives of individuals and communities.

Students examine the relevance of sport and active recreation in Australian culture, employment growth, health and wellbeing.

They consider factors that influence participation in sport and recreation, and how physical skills can enhance participation and performance in sport and recreation activities. Students explore how interpersonal skills support effective interaction with others, and the promotion of safety in sport and recreation activities. They examine technology in sport and recreation activities, and how the sport and recreation industry contributes to individual and community outcomes.

Students are involved in acquiring, applying and evaluating information about and in physical activities and performances, planning and organising activities, investigating solutions to individual and community challenges, and using suitable technologies where relevant. They communicate ideas and information in, about and through sport and recreation activities. They examine the effects of sport and recreation on individuals and communities, investigate the role of sport and recreation in maintaining good health, evaluate strategies to promote health and safety, and investigate personal and interpersonal skills to achieve goals.

Pathways

A course of study in Sport & Recreation can establish a basis for further education and employment in the fields of fitness, outdoor recreation and education, sports administration, community health and recreation and sport performance.

Objectives

By the conclusion of the course of study, students should:

- demonstrate physical responses and interpersonal strategies in individual and group situations in sport and recreation activities
- describe concepts and ideas about sport and recreation using terminology and examples
- explain procedures and strategies in, about and through sport and recreation activities for individuals and communities
- apply concepts and adapt procedures, strategies and physical responses in individual and group sport and recreation activities
- manage individual and group sport and recreation activities
- apply strategies in sport and recreation activities to enhance health, wellbeing, and participation for individuals and communities
- use language conventions and textual features to achieve particular purposes
- evaluate individual and group physical responses and interpersonal strategies to improve outcomes in sport and recreation activities
- evaluate the effects of sport and recreation on individuals and communities
- evaluate strategies that seek to enhance health, wellbeing, and participation in sport and recreation activities and provide recommendations
- create communications that convey meaning for particular audiences and purposes.

Structure

The Sport & Recreation course is designed around core and elective topics.

Core topics	Elective topics
<ul style="list-style-type: none"> • Sport and recreation in the community • Sport, recreation and healthy living • Health and safety in sport and recreation activities • Personal and interpersonal skills in sport and recreation activities 	<ul style="list-style-type: none"> • Active play and minor games • Challenge and adventure activities • Games and sports • Lifelong physical activities • Rhythmic and expressive movement activities • Sport and recreation physical activities

Assessment

For Sport & Recreation, assessment from Units 3 and 4 is used to determine the student's exit result, and consists of four instruments, including:

- one project (annotated records of the performance is also required)
- one investigation, extended response or examination.

Project	Investigation	Extended response	Performance	Examination
A response to a single task, situation and/or scenario.	A response that includes locating and using information beyond students' own knowledge and the data they have been given.	A technique that assesses the interpretation, analysis/examination and/or evaluation of ideas and information in provided stimulus materials.	A response involves the application of identified skill/s when responding to a task that involves solving a problem, providing a solution, providing instruction or conveying meaning or intent.	A response that answers a number of provided questions, scenarios and/or problems.
At least two different components from the following: <ul style="list-style-type: none"> • written: 500–900 words • spoken: 2½–3½ minutes • multimodal: 3–6 minutes • performance: 2–4 minutes.* 	Presented in one of the following modes: <ul style="list-style-type: none"> • written: 600–1000 words • spoken: 3–4 minutes • multimodal: 4–7 minutes. 	Presented in one of the following modes: <ul style="list-style-type: none"> • written: 600–1000 words • spoken: 3–4 minutes • multimodal: 4–7 minutes. 	<ul style="list-style-type: none"> • 2–4 minutes* 	<ul style="list-style-type: none"> • 60–90 minutes • 50–250 words per item

* Evidence must include annotated records that clearly identify the application of standards to performance.

SPORT & RECREATION – BASEBALL			
Faculty:	Robina Sports Academy	Type:	Applied
QCE Credits:	4 Core	Field Weightings:	Not Applicable
Other Pre-Requisites:	Written application and interview with the Sports Academy Director and Baseball Coordinator. Must be a current member of a Baseball Club.		
Future Options:	Study in University/TAFE courses relating to health and fitness, recreation, education personal training and coaching. Study in US Colleges is a viable option available to students who study this subject.		
Baseball is a Robina Sports Academy program aimed at the high level player. Expert coaching will be provided to ensure students develop all facets of the game. The course will consist of practical skill developments, strength and conditioning and several theory units. Units include: Biomechanics, Nutrition, Training Program Design, Career Pathways and Sport Psychology.			
Assessment:	Physical testing data, athletic performance, theory tasks.		
Expectations:	Full participation in practical and theoretical classes. Adhering to the Sports Academy Athlete Agreement.		
Invoiced Fees:	<p>\$570 per year: <i>Professional coaching fees, grounds maintenance, equipment, gym membership.</i></p> <p>INVOICED FEES FOR THIS SUBJECT MUST BE PAID IN FULL ON OR BEFORE 10 NOVEMBER 2022 ALONG WITH FULL/INSTALMENT PAYMENT OF 2023 STUDENT RESOURCE SCHEME TO ENSURE PLACEMENT INTO THE SUBJECT.</p> <p>NON-REFUNDABLE AFTER COURSE COMMENCEMENT. STUDENTS WISHING TO ENTER THIS SUBJECT/PROGRAM AFTER THIS DATE ARE REQUIRED TO PAY IN FULL AT ENROLMENT INTERVIEW OR PRIOR TO SUBJECT CHANGE FINAL APPROVAL.</p>		

SPORT & RECREATION – FUTSAL / FOOTBALL			
Faculty:	HPE	Type:	Applied
QCE Credits:	4 Core	Field Weightings:	Not Applicable
Other Pre-Requisites:	Written application and interview with the Sports Academy Director and Futsal/Football Coordinator. Must be a current member of a Baseball Club.		
Future Options:	Study in University/TAFE courses relating to health and fitness, recreation, education personal training and coaching. Study in US Colleges is a viable option available to students who study this subject.		
<p>Futsal/Football is a Robina Sports Academy program aimed at the high level player. Students will study both Football (Soccer) and Futsal. At various stages throughout the year matches will become a greater focus, depending on the tournament structure. The course will consist of practical skill developments, strength and conditioning and several theory units. Units include: Biomechanics, Nutrition, Training Program Design, Career Pathways and Sport Psychology.</p>			
Assessment:	Physical testing data, athletic performance, theory tasks.		
Expectations:	Full participation in practical and theoretical classes. Adhering to the Sports Academy Athlete Agreement.		
Invoiced Fees:	<p>\$340 per year - <i>Tournaments, transport, equipment, coaching aides, coaches</i></p> <p>INVOICED FEES FOR THIS SUBJECT MUST BE PAID IN FULL ON OR BEFORE 10 NOVEMBER 2022 ALONG WITH FULL/INSTALMENT PAYMENT OF 2023 STUDENT RESOURCE SCHEME TO ENSURE PLACEMENT INTO THE SUBJECT.</p> <p>NON-REFUNDABLE AFTER COURSE COMMENCEMENT. STUDENTS WISHING TO ENTER THIS SUBJECT/PROGRAM AFTER THIS DATE ARE REQUIRED TO PAY IN FULL AT ENROLMENT INTERVIEW OR PRIOR TO SUBJECT CHANGE FINAL APPROVAL.</p>		

SPORT & RECREATION – GOLF							
Faculty:	Robina Sports Academy	Type:	Applied				
QCE Credits:	4 Core	Field Weightings:	Not Applicable				
Other Pre-Requisites:	Written application and interview with the Sports Academy Director and Golf Coordinator. Must be a current member of a Golf Club.						
Future Options:	Study in University/TAFE courses relating to health and fitness, recreation, education personal training and coaching. Study in US Colleges is a viable option available to students who study this subject.						
<p>Golf is a Robina Sports Academy program aimed at the high level player. Expert coaching will be provided to ensure students develop all facets of the game. The course will consist of practical skill developments, strength and conditioning and several theory units. Units include: Biomechanics, Nutrition, Training Program Design, Career Pathways and Sport Psychology.</p>							
Assessment:	Physical testing data, athletic performance, theory tasks.						
Expectations:	Full participation in practical and theoretical classes. Adhering to the Sports Academy Athlete Agreement.						
Assessment:	Physical testing data, athletic performance, theory tasks.						
Expectations:	Full participation in practical and theoretical classes. Adhering to the Sports Academy Athlete Agreement.						
Invoiced Fees:	<p>\$1620 per year – <i>External rounds, Professional coaching fees, grounds maintenance, equipment, gym membership.</i></p> <p>INVOICED FEES FOR THIS SUBJECT MUST BE PAID IN FULL ON OR BEFORE THE DUE DATES LISTED BELOW ALONG WITH FULL/INSTALMENT PAYMENT OF 2023 STUDENT RESOURCE SCHEME TO ENSURE PLACEMENT INTO THE SUBJECT.</p> <table style="width: 100%; border: none;"> <tr> <td style="text-align: center;">Semester One (\$810)</td> <td style="text-align: center;">Due in Full 10 NOVEMBER 2022</td> </tr> <tr> <td style="text-align: center;">Semester Two (\$810)</td> <td style="text-align: center;">Due in Full 11 MAY 2023</td> </tr> </table> <p>NON-REFUNDABLE AFTER COURSE COMMENCEMENT. Semester Two (\$810)	Due in Full 11 MAY 2023						

SPORT & RECREATION – NETBALL			
Faculty:	HPE	Type:	Applied
QCE Credits:	4 Core	Field Weightings:	Not Applicable
Other Pre-Requisites:	Written application and interview with the Sports Academy Director and Netball Coordinator. Must be a current member of a Netball Club.		
Future Options:	Study in University/TAFE courses relating to health and fitness, recreation, education personal training and coaching.		
<p>This course is a Robina Sports Academy program aimed at the high level player. Expert coaching will be provided to ensure students develop all facets of the game. The course will consist of practical skill developments, strength and conditioning and several theory units. Units include: Biomechanics, Nutrition, Training Program Design, Career Pathways and Sport Psychology.</p>			
Assessment:	Physical testing data, athletic performance, theory tasks.		
Expectations:	Full participation in practical and theoretical classes. Adhering to the Sports Academy Athlete Agreement.		
Invoiced Fees:	<p>\$390 per year - <i>Professional coaching fees, equipment, gym membership.</i></p> <p>INVOICED FEES FOR THIS SUBJECT MUST BE PAID IN FULL ON OR BEFORE 10 NOVEMBER 2022 ALONG WITH FULL/INSTALMENT PAYMENT OF 2023 STUDENT RESOURCE SCHEME TO ENSURE PLACEMENT INTO THE SUBJECT.</p> <p>NON-REFUNDABLE AFTER COURSE COMMENCEMENT. STUDENTS WISHING TO ENTER THIS SUBJECT/PROGRAM AFTER THIS DATE ARE REQUIRED TO PAY IN FULL AT ENROLMENT INTERVIEW OR PRIOR TO SUBJECT CHANGE FINAL APPROVAL.</p>		

SPORT & RECREATION – TRIATHLON			
Faculty:	HPE	Type:	Applied
QCE Credits:	4 Core	Field Weightings:	Not Applicable
Other Pre-Requisites:	Written application and interview with the Sports Academy Director and Triathlon Coordinator.		
Future Options:	Study in University/TAFE courses relating to health and fitness, recreation, education personal training and coaching. Study in US Colleges is a viable option available to students who study this subject.		
<p>This course is a Robina Sports Academy program aimed at the high level athlete. Expert coaching will be provided to ensure students develop all facets of the sport. The course will consist of practical skill developments, strength and conditioning and several theory units. Units include: Biomechanics, Nutrition, Training Program Design, Career Pathways and Sport Psychology.</p>			
Assessment:	Physical testing data, athletic performance, theory tasks.		
Expectations:	Full participation in practical and theoretical classes. Adhering to the Sports Academy Athlete Agreement.		
Invoiced Fees:	<p>\$670 per year - <i>Professional coaching fees, equipment, gym membership, pool hire.</i></p> <p>INVOICED FEES FOR THIS SUBJECT MUST BE PAID IN FULL ON OR BEFORE 10 NOVEMBER 2022 ALONG WITH FULL/INSTALMENT PAYMENT OF 2023 STUDENT RESOURCE SCHEME TO ENSURE PLACEMENT INTO THE SUBJECT.</p> <p>NON-REFUNDABLE AFTER COURSE COMMENCEMENT. STUDENTS WISHING TO ENTER THIS SUBJECT/PROGRAM AFTER THIS DATE ARE REQUIRED TO PAY IN FULL AT ENROLMENT INTERVIEW OR PRIOR TO SUBJECT CHANGE FINAL APPROVAL.</p>		

Biology

General senior subject

General

Biology provides opportunities for students to engage with living systems.

Students develop their understanding of cells and multicellular organisms. They engage with the concept of maintaining the internal environment. They study biodiversity and the interconnectedness of life. This knowledge is linked with the concepts of heredity and the continuity of life.

Students learn and apply aspects of the knowledge and skills of the discipline (thinking, experimentation, problem-solving and research skills), understand how it works and how it may impact society. They develop their sense of wonder and curiosity about life; respect for all living things and the environment; understanding of biological systems, concepts, theories and models; appreciation of how biological knowledge has developed over time and continues to develop; a sense of how biological knowledge influences society.

Students plan and carry out fieldwork, laboratory and other research investigations; interpret evidence; use sound, evidence-based arguments creatively and analytically when evaluating claims and applying biological knowledge; and communicate biological understanding, findings, arguments and conclusions using appropriate representations, modes and genres.

Pathways

A course of study in Biology can establish a basis for further education and employment in the fields of medicine, forensics, veterinary, food and marine sciences, agriculture, biotechnology, environmental rehabilitation, biosecurity, quarantine, conservation and sustainability.

Objectives

By the conclusion of the course of study, students will:

- describe and explain scientific concepts, theories, models and systems and their limitations
- apply understanding of scientific concepts, theories, models and systems within their limitations
- analyse evidence
- interpret evidence
- investigate phenomena
- evaluate processes, claims and conclusions
- communicate understandings, findings, arguments and conclusions.

Structure

Chemistry

General senior subject

General

Chemistry is the study of materials and their properties and structure.

Students study atomic theory, chemical bonding, and the structure and properties of elements and compounds. They explore intermolecular forces, gases, aqueous solutions, acidity and rates of reaction. They study equilibrium processes and redox reactions. They explore organic chemistry, synthesis and design to examine the characteristic chemical properties and chemical reactions displayed by different classes of organic compounds.

Students develop their appreciation of chemistry and its usefulness; understanding of chemical theories, models and chemical systems; expertise in conducting scientific investigations. They critically evaluate and debate scientific arguments and claims in order to solve problems and generate informed, responsible and ethical conclusions, and communicate chemical understanding and findings through the use of appropriate representations, language and nomenclature.

Students learn and apply aspects of the knowledge and skills of the discipline (thinking, experimentation, problem-solving and research skills), understand how it works and how it may impact society.

Pathways

A course of study in Chemistry can establish a basis for further education and employment in the fields of forensic science, environmental science, engineering, medicine, pharmacy and sports science.

Objectives

By the conclusion of the course of study, students will:

- describe and explain scientific concepts, theories, models and systems and their limitations
- apply understanding of scientific concepts, theories, models and systems within their limitations
- analyse evidence
- interpret evidence
- investigate phenomena
- evaluate processes, claims and conclusions
- communicate understandings, findings, arguments and conclusions.

Physics

General senior subject

General

Physics provides opportunities for students to engage with classical and modern understandings of the universe.

Students learn about the fundamental concepts of thermodynamics, electricity and nuclear processes; and about the concepts and theories that predict and describe the linear motion of objects. Further, they explore how scientists explain some phenomena using an understanding of waves. They engage with the concept of gravitational and electromagnetic fields, and the relevant forces associated with them. They study modern physics theories and models that, despite being counterintuitive, are fundamental to our understanding of many common observable phenomena.

Students develop appreciation of the contribution physics makes to society: understanding that diverse natural phenomena may be explained, analysed and predicted using concepts, models and theories that provide a reliable basis for action; and that matter and energy interact in physical systems across a range of scales. They understand how models and theories are refined, and new ones developed in physics; investigate phenomena and solve problems; collect and analyse data; and interpret evidence. Students use accurate and precise measurement, valid and reliable evidence, and scepticism and intellectual rigour to evaluate claims; and communicate physics understanding, findings, arguments and conclusions using appropriate representations, modes and genres.

Students learn and apply aspects of the knowledge and skills of the discipline (thinking, experimentation, problem-solving and research skills), understand how it works and how it may impact society.

Pathways

A course of study in Physics can establish a basis for further education and employment in the fields of science, engineering, medicine and technology.

Objectives

By the conclusion of the course of study, students will:

- describe and explain scientific concepts, theories, models and systems and their limitations
- apply understanding of scientific concepts, theories, models and systems within their limitations
- analyse evidence
- interpret evidence
- investigate phenomena

Summative external assessment (EA): 50% • Examination			

Psychology

General senior subject

General

Psychology provides opportunities for students to engage with concepts that explain behaviours and underlying cognitions.

Students examine individual development in the form of the role of the brain, cognitive development, human consciousness and sleep. They investigate the concept of intelligence; the process of diagnosis and how to classify psychological disorder and determine an effective treatment; and the contribution of emotion and motivation on individual behaviour. They examine individual thinking and how it is determined by the brain, including perception, memory, and learning. They consider the influence of others by examining theories of social psychology, interpersonal processes, attitudes and cross-cultural psychology.

Students learn and apply aspects of the knowledge and skill of the discipline (thinking, experimentation, problem-solving and research skills), understand how it works and how it may impact society.

Pathways

A course of study in Psychology can establish a basis for further education and employment in the fields of psychology, sales, human resourcing, training, social work, health, law, business, marketing and education.

Objectives

By the conclusion of the course of study, students will:

- describe and explain scientific concepts, theories, models and systems and their limitations
- apply understanding of scientific concepts, theories, models and systems within their limitations
- analyse evidence
- interpret evidence
- investigate phenomena
- evaluate processes, claims and conclusions
- communicates understandings, findings, arguments and conclusions.

Aquatic Practices

Applied senior subject

Applied

Aquatic Practices provides opportunities for students to explore, experience and learn practical skills and knowledge valued in aquatic workplaces and other settings.

Students gain insight into the management of aquatic regions and their ecological and environmental systems, helping them to position themselves within a long and sustainable tradition of custodianship.

Students have opportunities to learn in, through and about aquatic workplaces, events and other related activities. Additional learning links to an understanding of the employment, study and recreational opportunities associated with communities who visit, live or work on and around our waterways.

Pathways

A course of study in Aquatic Practices can establish a basis for further education and employment in the fields of recreation, tourism, fishing and aquaculture. The subject also provides a basis for participating in and contributing to community associations, events and activities, such as yacht and sailing club races and competitions and boating shows.

Objectives

By the conclusion of the course of study, students should:

- describe concepts and ideas in aquatic contexts
- explain concepts and ideas in aquatic contexts
- demonstrate skills in aquatic contexts
- analyse information, situations and relationships in aquatic contexts
- apply knowledge, understanding and skills in aquatic contexts
- use language conventions and features appropriate to aquatic contexts to communicate ideas and information, according to purpose
- generate plans and procedures for activities in aquatic contexts
- evaluate the safety and effectiveness of activities in aquatic contexts
- make recommendations for activities in aquatic contexts.

Structure

Students must be able to swim continuously and efficiently for 400 metres using a combination of 2 strokes with above-water arm recovery and 2 strokes with underwater arm recovery (freestyle, breaststroke and survival side-stroke). Students must be able to continuously tread water for 10mins. Some practical activities will extend beyond normal school hours.

The Aquatic Practices course is designed around:

- the four areas of study with the core topics for 'Safety and management practices' embedded in each of the four areas of study
- schools determine whether to include elective topics in a course of study.

Unit 1	Unit 2	Unit 3	Unit 4
Module 1 Safety on our beaches	Module 3 The marine environment	Module 5 Coastal navigation and sailing	Module 7 Food from the sea
Module 2 Coastlines and culture	Module 4 Snorkelling in an underwater world	Module 6 Cruising with power	Module 8 Employment in the marine industry

Assessment

For Aquatic Practices, assessment from Units 3 and 4 is used to determine the student's exit result, and consists of four instruments, including no more than two assessment instruments from any one technique.

Project	Investigation	Extended response	Examination	Performance
A response to a single task, situation and/or scenario.	A response that includes locating and using information beyond students' own knowledge and the data they have been given.	A technique that assesses the interpretation, analysis/examination and/or evaluation of ideas and information in provided stimulus materials.	A response that answers a number of provided questions, scenarios and/or problems.	A technique that assesses physical demonstrations as outcomes of applying a range of cognitive, technical and physical skills.
At least two different components from the following: <ul style="list-style-type: none"> written: 500–900 words spoken: 2½–3½ minutes multimodal: 3–6 minutes performance: continuous class time product: continuous class time. 	Presented in one of the following modes: <ul style="list-style-type: none"> written: 600–1000 words spoken: 3–4 minutes multimodal: 4–7 minutes. 	Presented in one of the following modes: <ul style="list-style-type: none"> written: 600–1000 words spoken: 3–4 minutes multimodal: 4–7 minutes. 	<ul style="list-style-type: none"> 60–90 minutes 50–250 words per item 	<ul style="list-style-type: none"> performance: continuous class time to develop and practice the performance.

AQUATIC PRACTICES - Applied Senior Subject	
Invoiced Fees:	<p>\$450 per year: <i>Sailing, snorkelling excursions and equipment, transport and entry to venues, access to boating/fishing equipment, buses, CPR and aquatic rescue training and assessment and other excursions/activities.</i></p> <p>INVOICED FEES FOR THIS SUBJECT MUST BE PAID IN FULL ON OR BEFORE 10 NOVEMBER 2022 ALONG WITH FULL/INSTALMENT PAYMENT OF 2023 STUDENT RESOURCE SCHEME TO ENSURE PLACEMENT INTO THE SUBJECT.</p> <p>NON-REFUNDABLE AFTER COURSE COMMENCEMENT. STUDENTS WISHING TO ENTER THIS SUBJECT/PROGRAM AFTER THIS DATE ARE REQUIRED TO PAY IN FULL AT ENROLMENT INTERVIEW OR PRIOR TO SUBJECT CHANGE FINAL APPROVAL.</p>

Japanese

General senior subject

General

Japanese provides students with the opportunity to reflect on their understanding of the Japanese language and the communities that use it, while also assisting in the effective negotiation of experiences and meaning across cultures and languages. Students participate in a range of interactions in which they exchange meaning, develop intercultural understanding and become active participants in understanding and constructing written, spoken and visual texts.

Students communicate with people from Japanese-speaking communities to understand the purpose and nature of language and to gain understanding of linguistic structures. They acquire language in social and cultural settings and communicate across a range of contexts for a variety of purposes.

Students experience and evaluate a range of different text types; reorganise their thinking to accommodate other linguistic and intercultural knowledge and textual conventions; and create texts for a range of contexts, purposes and audiences.

Pathways

A course of study in Japanese can establish a basis for further education and employment in many professions and

industries, particularly those where the knowledge of an additional language and the intercultural understanding it encompasses could be of value, such as business, hospitality, law, science, technology, sociology and education.

Objectives

By the conclusion of the course of study, students will:

- comprehend Japanese to understand information, ideas, opinions and experiences
- identify tone, purpose, context and audience to infer meaning, values and attitudes
- analyse and evaluate information and ideas to draw conclusions and justify opinions, ideas and perspectives
- apply knowledge of Japanese language elements, structures and textual conventions to convey meaning appropriate to context, purpose, audience and cultural conventions
- structure, sequence and synthesise information to justify opinions, ideas and perspectives
- use strategies to maintain communication and exchange meaning in Japanese.

Structure

Drama

General senior subject

General

Drama fosters creative and expressive communication. It interrogates the human experience by investigating, communicating and embodying stories, experiences, emotions and ideas that reflect the human experience. It engages students in imaginative meaning-making processes and involves them using a range of artistic skills as they make and respond to dramatic works.

Students experience, reflect on, understand, communicate, collaborate and appreciate different perspectives of themselves, others and the world in which they live. They learn about the dramatic languages and how these contribute to the creation, interpretation and critique of dramatic action and meaning for a range of purposes. They study a range of forms, styles and their conventions in a variety of inherited traditions, current practice and emerging trends, including those from different cultures and contexts.

Students learn how to engage with dramatic works as both artists and audience through the use of critical literacies. The study of drama develops students' knowledge, skills and understanding in the making of and responding to dramatic works to help them realise their creative and expressive potential as individuals. Students learn to pose and solve problems, and work independently and collaboratively.

Pathways

A course of study in Drama can establish a basis for further education and employment in the field of drama, and to broader areas in creative industries and cultural institutions, including arts administration and management, communication, education, public relations, research and science and technology.

Objectives

By the conclusion of the course of study, students will:

- demonstrate an understanding of dramatic languages
- apply literacy skills
- apply and structure dramatic languages
- analyse how dramatic languages are used to create dramatic action and meaning
- interpret purpose, context and text to communicate dramatic meaning
- manipulate dramatic languages to create dramatic action and meaning
- evaluate and justify the use of dramatic languages to communicate dramatic meaning
- synthesise and argue a position about dramatic action and meaning.

Structure

Unit 1	Unit 2	Unit 3	Unit 4

Music

General senior subject

General

Music fosters creative and expressive communication. It allows students to develop musicianship through making (composition and performance) and responding (musicology).

Through composition, performance and musicology, students use and apply music elements and concepts. They apply their knowledge and understanding to convey meaning and/or emotion to an audience.

Students use essential literacy skills to engage in a multimodal world. They demonstrate practical music skills, and analyse and evaluate music in a variety of contexts, styles and genres.

Pathways

A course of study in Music can establish a basis for further education and employment in the fields of arts administration, communication, education, creative

industries, public relations and science and technology.

Objectives

By the conclusion of the course of study, students will:

- demonstrate technical skills
- explain music elements and concepts
- use music elements and concepts
- analyse music
- apply compositional devices
- apply literacy skills
- interpret music elements and concepts
- evaluate music to justify the use of music elements and concepts
- realise music ideas
- resolve music ideas.

Structure

Unit 1	Unit 2	Unit 3	Unit 4
<p>Designs Through inquiry learning, the following is explored:</p> <p>How does the treatment and combination of different music elements enable musicians to design music that communicates meaning through performance and composition?</p>	<p>Identities Through inquiry learning, the following is explored:</p> <p>How do musicians use their understanding of music elements, concepts and practices to communicate cultural, political, social and personal identities when performing, composing and responding to music?</p>	<p>Innovations Through inquiry learning, the following is explored:</p> <p>How do musicians incorporate innovative music practices to communicate meaning when performing and composing?</p>	<p>Narratives Through inquiry learning, the following is explored:</p> <p>How do musicians manipulate music elements to communicate narrative when performing, composing and responding to music?</p>

Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

Music Extension (Composition)

General senior subject

General

Music Extension (Composition) is an extension of the Music General senior syllabus. It provides an opportunity for students with specific abilities in music to extend their expertise. Students select one specialisation only, and follow an individual program of study designed to continue the development of refined musicianship skills. Music Extension encourages students to investigate music concepts and ideas relevant to their specialisation.

In the Composition specialisation (making), students create and resolve new music works. They demonstrate use of music concepts and manipulate music concepts to express meaning and/or emotion to an audience through resolved compositions.

Pathways

A course of study in Music Extension can establish a basis for further education and employment in the fields of arts administration, communication, education, creative industries, public relations and science and technology.

Objectives

By the conclusion of the course of study, students will:

- apply literary skills
- evaluate music and ideas about music
- examine music and ideas about music
- express meaning, emotion or ideas about music
- apply compositional devices
- manipulate music elements and concepts
- resolve music ideas.

Structure

Unit 3	Unit 4

Music Extension (Performance)

General senior subject

General

Music Extension (Performance) is an extension of the Music General senior syllabus. It provides an opportunity for students with specific abilities in music to extend their expertise. Students select one specialisation only, and follow an individual program of study designed to continue the development of refined musicianship skills. Music Extension encourages students to investigate music concepts and ideas relevant to their specialisation.

In the Performance specialisation (making), students realise music works, demonstrating technical skills and understanding. They make decisions about music, interpret music elements and concepts, and express music ideas to realise their performances.

Pathways

A course of study in Music Extension can establish a basis for further education and employment in the fields of arts administration, communication, education, creative industries, public relations and science and technology.

Objectives

By the conclusion of the course of study, students will:

- apply literary skills
- evaluate music and ideas about music
- examine music and ideas about music
- express meaning, emotion or ideas about music
- apply technical skills
- interpret music elements and concepts
- realise music ideas.

Visual Art

General senior subject

General

Visual Art provides students with opportunities to understand and appreciate the role of visual art in past and present traditions and cultures, as well as the contributions of contemporary visual artists and their aesthetic, historical and cultural influences. Students interact with artists, artworks, institutions and communities to enrich their experiences and understandings of their own and others' art practices.

Students have opportunities to construct knowledge and communicate personal interpretations by working as both artist and audience. They use their imagination and creativity to innovatively solve problems and experiment with visual language and expression.

Through an inquiry learning model, students develop critical and creative thinking skills. They create individualised responses and meaning by applying diverse materials, techniques, technologies and art processes.

In responding to artworks, students employ essential literacy skills to investigate artistic expression and critically analyse artworks in diverse contexts. They consider meaning, purposes and theoretical approaches when ascribing aesthetic value and challenging ideas.

Pathways

A course of study in Visual Art can establish a basis for further education and

employment in the fields of arts practice, design, craft, and information technologies; broader areas in creative industries and cultural institutions; and diverse fields that use skills inherent in the subject, including advertising, arts administration and management, communication, design, education, galleries and museums, film and television, public relations, and science and technology.

Objectives

By the conclusion of the course of study, students will:

- implement ideas and representations
- apply literacy skills
- analyse and interpret visual language, expression and meaning in artworks and practices
- evaluate art practices, traditions, cultures and theories
- justify viewpoints
- experiment in response to stimulus
- create meaning through the knowledge and understanding of materials, techniques, technologies and art processes
- realise responses to communicate meaning.

Structure

Unit 1	Unit 2	Unit 3	Unit 4
<p>Art as lens Through inquiry learning, the following are explored:</p> <ul style="list-style-type: none"> • Concept: lenses to explore the material world • Contexts: personal and contemporary • Focus: People, place, objects • Media: 2D, 3D, and time-based 	<p>Art as code Through inquiry learning, the following are explored:</p> <ul style="list-style-type: none"> • Concept: art as a coded visual language • Contexts: formal and cultural • Focus: Codes, symbols, signs and art conventions • Media: 2D, 3D, and time-based 	<p>Art as knowledge Through inquiry learning, the following are explored:</p> <ul style="list-style-type: none"> • Concept: constructing knowledge as artist and audience • Contexts: contemporary, personal, cultural and/or formal • Focus: student-directed • Media: student-directed 	<p>Art as alternate Through inquiry learning, the following are explored:</p> <ul style="list-style-type: none"> • Concept: evolving alternate representations and meaning • Contexts: contemporary and personal, cultural and/or formal • Focus: continued exploration of Unit 3 student-directed focus • Media: student-directed

Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

Summative assessments

Unit 3		Unit 4	
Summative internal assessment 1 (IA1): • Investigation — inquiry phase 1	15%	Summative internal assessment 3 (IA3): • Project — inquiry phase 3	35%
Summative internal assessment 2 (IA2): • Project — inquiry phase 2	25%		
Summative external assessment (EA): 25%			
• Examination			

Dance in Practice focuses on experiencing and understanding the role of dance in and across communities and, where possible, interacting with practising performers, choreographers and designers.

Students create, perform and produce dance works in class, school and community contexts, and use their senses as a means of understanding and responding to their own and others' dance works. This fosters creativity, helps students develop problem-solving skills, and heightens their imaginative, emotional, aesthetic, analytical and reflective experiences.

Students explore and apply techniques, processes and technologies individually and in groups to express dance ideas that serve particular purposes. Students explore safe dance practices for themselves and groups. They gain practical and technical skills, employ terminology specific to dance, investigate ways to solve problems, and make choices to communicate through dance and about dance.

Pathways

A course of study in Dance in Practice can establish a basis for further education and employment in dance education,

dance teaching, choreography, performance and event production.

Objectives

By the conclusion of the course of study, students should:

- recall terminology, concepts and ideas associated with dance
- interpret and demonstrate the technical and expressive skills required for dance genres
- explain dance and dance works
- apply dance concepts and ideas through performance and production of dance works
- analyse dance concepts and ideas for particular purposes, genres, styles and contexts
- use language conventions and features to achieve particular purposes
- generate, plan and modify creative processes to produce dance works
- create communications and make decisions to convey meaning to audiences
- evaluate dance works.

Structure

The Dance in Practice course is designed around core and elective topics. Students explore at least two dance genres across Units 1 and 2 and again in Units 3 and 4, and three genres across the four units.

Core	Electives
<ul style="list-style-type: none"> • Dance performance • Dance production • Dance literacies 	<ul style="list-style-type: none"> • Ballet • Contemporary • Jazz • Tap • Ballroom • Popular dance • World dance

Assessment

For Dance in Practice, assessment from Units 3 and 4 is used to determine the student's exit result, and consists of four instruments, including:

- at least one project, arising from community connections
- at least one performance, separate to an assessable component of a project.

Project	Performance	Product	Extended response	Investigation
A response to a single task, situation and/or scenario.	A technique that assesses the physical demonstration of identified skills.	A technique that assesses the production of a design solution and folio or choreographic work.	A technique that assesses the interpretation, analysis/examination and/or evaluation of ideas and information in provided stimulus materials.	A response that includes locating and using information beyond students' own knowledge and the data they have been given.
<p>The Project in Dance in Practice requires:</p> <ul style="list-style-type: none"> • a dance performance: 1½ – 2 minutes • at least one other component from the following <ul style="list-style-type: none"> – written: 500–900 words – spoken: 2½–3½ minutes – multimodal <ul style="list-style-type: none"> ▪ non-presentation: 8 A4 pages max (or equivalent) ▪ presentation: 3–6 minutes • product: variable conditions. 	<ul style="list-style-type: none"> • Dance performance: 2–3 minutes • Production performance: variable conditions • Teaching performance: variable conditions 	<ul style="list-style-type: none"> • Design solution and folio: variable conditions • Choreographic work: 2–3 minutes 	<p>Presented in one of the following modes:</p> <ul style="list-style-type: none"> • written: 600–1000 words • spoken: 3–4 minutes • multimodal <ul style="list-style-type: none"> – non-presentation: 10 A4 pages max (or equivalent) – presentation: 4–7 minutes. 	<p>Presented in one of the following modes:</p> <ul style="list-style-type: none"> • written: 600–1000 words • spoken: 3–4 minutes • multimodal <ul style="list-style-type: none"> – non-presentation: 10 A4 pages max (or equivalent) – presentation: 4–7 minutes.

Drama in Practice

Applied senior subject

Applied

Drama in Practice gives students opportunities to plan, create, adapt, produce, perform, appreciate and evaluate a range of dramatic works or events in a variety of settings.

Students participate in learning activities that apply knowledge and develop creative and technical skills in communicating meaning to an audience.

Students learn essential workplace health and safety procedures relevant to the drama and theatre industry, as well as effective work practices and industry skills needed by a drama practitioner.

Pathways

A course of study in Drama in Practice can establish a basis for further education and employment in the drama and theatre industry in areas such as performance, theatre management and promotions.

Objectives

By the conclusion of the course of study, students should:

- identify and explain dramatic principles and practices
- interpret and explain dramatic works and dramatic meanings
- demonstrate dramatic principles and practices
- apply dramatic principles and practices when engaging in drama activities and/or with dramatic works
- analyse the use of dramatic principles and practices to communicate meaning for a purpose
- use language conventions and features and terminology to communicate ideas and information about drama, according to purposes
- plan and modify dramatic works using dramatic principles and practices to achieve purposes
- create dramatic works that convey meaning to audiences
- evaluate the application of dramatic principles and practices to drama activities or dramatic works.

Structure

The Drama in Practice course is designed around core and elective topics.

Core	Electives
<ul style="list-style-type: none"> • Dramatic principles • Dramatic practices 	<ul style="list-style-type: none"> • Acting (stage and screen) • Career pathways (including arts entrepreneurship) • Community theatre • Contemporary theatre • Directing • Playbuilding • Scriptwriting • Technical design and production • The theatre industry • Theatre through the ages • World theatre

Assessment

For Drama in Practice, assessment from Units 3 and 4 is used to determine the student's exit result, and consists of four instruments, including:

- at least one project, arising from community connections
- at least one performance (acting), separate to an assessable component of a project.

Project	Performance	Product	Extended response	Investigation
A response to a single task, situation and/or scenario.	A technique that assesses the physical demonstration of identified skills.	A technique that assesses the production of a design solution.	A technique that assesses the interpretation, analysis/examination and/or evaluation of ideas and information in provided stimulus materials.	A response that includes locating and using information beyond students' own knowledge and the data they have been given.
<p>At least two different components from the following:</p> <ul style="list-style-type: none"> • written: 500–900 words • spoken: 2½–3½ minutes • multimodal <ul style="list-style-type: none"> – non-presentation: 8 A4 pages max (or equivalent) – presentation: 3–6 minutes • performance onstage (stage acting) <ul style="list-style-type: none"> – 2–4 minutes: individual – 1½–3 minutes: group • performance onstage (screen acting) <ul style="list-style-type: none"> – 2–3 minutes: individual – 1½–2 ½ minutes: group • performance offstage (directing, designing) <ul style="list-style-type: none"> – 4–6 minutes: individual (excluding actors delivering text) • workshop performance (other): variable conditions • product: variable conditions. 	<ul style="list-style-type: none"> • acting performance (stage) <ul style="list-style-type: none"> – 3–5 minutes: individual – 2–4 minutes: group • acting performance (screen) <ul style="list-style-type: none"> – 2½–3½ minutes: individual – 2–3 minutes: group • directing performance <ul style="list-style-type: none"> – 5–7 minutes: individual (excluding actors delivering text) 	<ul style="list-style-type: none"> • variable conditions 	<p>Presented in one of the following modes:</p> <ul style="list-style-type: none"> • written: 600–1000 words • spoken: 3–4 minutes • multimodal <ul style="list-style-type: none"> – non-presentation: 10 A4 pages max (or equivalent) – presentation: 4–7 minutes. 	<p>Presented in one of the following modes:</p> <ul style="list-style-type: none"> • written: 600–1000 words • spoken: 3–4 minutes • multimodal <ul style="list-style-type: none"> – non-presentation: 10 A4 pages max (or equivalent) – presentation: 4–7 minutes.

Media Arts in Practice

Applied senior subject

Applied

Media Arts in Practice focuses on the role media arts plays in the community in reflecting and shaping society's values, attitudes and beliefs. It provides opportunities for students to create and share media artworks that convey meaning and express insight.

Students learn how to apply media technologies in real-world contexts to solve technical and/or creative problems. When engaging with school and/or local community activities, they gain an appreciation of how media communications connect ideas and purposes with audiences. They use their knowledge and understanding of design elements and principles to develop their own works and to evaluate and reflect on their own and others' art-making processes and aesthetic choices.

Students learn to be ethical and responsible users of and advocates for digital technologies, and aware of the social, environmental and legal impacts of their actions and practices.

Pathways

A course of study in Media Arts in Practice can establish a basis for further education and employment in a dynamic, creative and global industry that is constantly adapting to new technologies.

Structure

The Media Arts in Practice course is designed around core and elective topics.

Core	Electives
<ul style="list-style-type: none">• Media technologies• Media communications• Media in society	<ul style="list-style-type: none">• Audio• Curating• Graphic design• Interactive media• Moving images• Still image

Objectives

By the conclusion of the course of study, students should:

- identify and explain media art-making processes
- interpret information about media arts concepts and ideas for particular purposes
- demonstrate practical skills, techniques and technologies required for media arts
- organise and apply media art-making processes, concepts and ideas
- analyse problems within media arts contexts
- use language conventions and features to communicate ideas and information about media arts, according to context and purpose
- plan and modify media artworks using media art-making processes to achieve purposes
- create media arts communications that convey meaning to audiences
- evaluate media art-making processes and media artwork concepts and ideas.

Assessment

For Media Arts in Practice, assessment from Units 3 and 4 is used to determine the student's exit result, and consists of four instruments, including:

- at least two projects, with at least one project arising from community connections
- at least one product, separate to an assessable component of a project.

Project	Product	Extended response	Investigation
A response to a single task, situation and/or scenario.	A technique that assesses the application of skills in the production of media artwork/s.	A technique that assesses the interpretation, analysis/examination and/or evaluation of ideas and information in provided stimulus materials.	A response that includes locating and using information beyond students' own knowledge and the data they have been given.
<p>At least two different components from the following:</p> <ul style="list-style-type: none"> • written: 500–900 words • spoken: 2½–3½ minutes • multimodal <ul style="list-style-type: none"> – non-presentation: 8 A4 pages max (or equivalent) – presentation: 3–6 minutes • product: variable conditions. 	<ul style="list-style-type: none"> • variable conditions 	<p>Presented in one of the following modes:</p> <ul style="list-style-type: none"> • written: 600–1000 words • spoken: 3–4 minutes • multimodal <ul style="list-style-type: none"> – non-presentation: 10 A4 pages max (or equivalent) – presentation: 4–7 minutes. 	<p>Presented in one of the following modes:</p> <ul style="list-style-type: none"> • written: 600–1000 words • spoken: 3–4 minutes • multimodal <ul style="list-style-type: none"> – non-presentation: 10 A4 pages max (or equivalent) – presentation: 4–7 minutes.

Music in Practice gives students opportunities to engage with music and music productions, and, where possible, interact with practising artists.

Students are exposed to authentic music practices in which they learn to view the world from different perspectives, and experiment with different ways of sharing ideas and feelings. They gain confidence and self-esteem, and contribute to the social and cultural lives of their school and local community. They gain practical, technical and listening skills to communicate in and through their music.

Students explore and engage with the core of music principles and practices as they create, perform, produce and respond to their own and others' music works in class, school and community settings. They learn about workplace health and safety (WHS) issues relevant to the music industry and effective work practices that lead to the acquisition of industry skills needed by a practising musician.

Pathways

A course of study in Music in Practice can establish a basis for further education and employment in areas such as performance, critical listening, music management and music promotions.

Structure

The Music in Practice course is designed around core and elective topics.

Core	Electives
<ul style="list-style-type: none"> • Music principles • Music practices 	<ul style="list-style-type: none"> • Community music • Contemporary music • Live production and performance • Music for film, TV and video games • Music in advertising • The music industry • Music technology and production • Performance craft • Practical music skills • Songwriting • World music

Objectives

By the conclusion of the course of study, students should:

- identify and explain music principles and practices
- interpret music principles and practices
- demonstrate music principles and practices
- apply technical and expressive skills to performance and production of music works
- analyse the use of music principles and practices in their own and others' music works
- use language conventions and features to communicate ideas and information about music, according to context and purpose
- plan and modify music works using music principles and practices to achieve purposes
- create music works to communicate music ideas to audiences
- evaluate the application of music principles and practices to music works and music activities.

Assessment

For Music in Practice, assessment from Units 3 and 4 is used to determine the student's exit result, and consists of four instruments, including:

- at least two projects, with at least one project arising from community connections
- at least one performance, separate to an assessable component of a project
- at least one product (composition), separate to an assessable component of a project.

Project	Performance	Product (Composition)	Extended response	Investigation
A response to a single task, situation and/or scenario.	A technique that assesses the physical demonstration of identified skills.	A technique that assesses the application of skills to create music.	A technique that assesses the interpretation, analysis/examination and/or evaluation of ideas and information in provided stimulus materials.	A response that includes locating and using information beyond students' own knowledge and the data they have been given.
<p>At least two different components from the following:</p> <ul style="list-style-type: none"> • written: 500–900 words • spoken: 2½–3½ minutes • multimodal <ul style="list-style-type: none"> – non-presentation: 8 A4 pages max (or equivalent) – presentation: 3–6 minutes • performance: variable conditions • product: variable conditions. 	<ul style="list-style-type: none"> • music performance: minimum of two minutes total performance time • production performance: variable conditions 	<ul style="list-style-type: none"> • manipulating existing sounds: minimum of two minutes • arranging and creating: minimum of 32 bars or 60 seconds 	<p>Presented in one of the following modes:</p> <ul style="list-style-type: none"> • written: 600–1000 words • spoken: 3–4 minutes • multimodal <ul style="list-style-type: none"> – non-presentation: 10 A4 pages max (or equivalent) – presentation: 4–7 minutes. 	<p>Presented in one of the following modes:</p> <ul style="list-style-type: none"> • written: 600–1000 words • spoken: 3–4 minutes • multimodal <ul style="list-style-type: none"> – non-presentation: 10 A4 pages max (or equivalent) – presentation: 4–7 minutes.

Visual Arts in Practice

Applied senior subject

Applied

Visual Arts in Practice focuses on students engaging in art-making processes and making virtual or physical visual artworks. Visual artworks are created for a purpose and in response to individual, group or community needs.

Students explore and apply the materials, technologies and techniques used in art-making. They use information about design elements and principles to influence their own aesthetic and guide how they view others' works. They also investigate information about artists, art movements and theories, and use the lens of a context to examine influences on art-making.

Students reflect on both their own and others' art-making processes. They integrate skills to create artworks and evaluate aesthetic choices. Students decide on the best way to convey meaning through communications and artworks. They learn and apply safe visual art practices.

Pathways

A course of study in Visual Arts in Practice can establish a basis for further education and employment in a range of fields, including design, styling, decorating,

illustrating, drafting, visual merchandising, make-up artistry, advertising, game design, photography, animation or ceramics.

Objectives

By the conclusion of the course of study, students should:

- recall terminology and explain art-making processes
- interpret information about concepts and ideas for a purpose
- demonstrate art-making processes required for visual artworks
- apply art-making processes, concepts and ideas
- analyse visual art-making processes for particular purposes
- use language conventions and features to achieve particular purposes
- generate plans and ideas and make decisions
- create communications that convey meaning to audiences
- evaluate art-making processes, concepts and ideas.

Structure

The Visual Arts in Practice course is designed around core and elective topics.

Core	Electives
<ul style="list-style-type: none">• Visual mediums, technologies, techniques• Visual literacies and contexts• Artwork realisation	<ul style="list-style-type: none">• 2D• 3D• Digital and 4D• Design• Craft

Assessment

For Visual Arts in Practice, assessment from Units 3 and 4 is used to determine the student's exit result, and consists of four instruments, including:

- at least two projects, with at least one project arising from community connections
- at least one product (composition), separate to an assessable component of a project.

Project	Product	Extended response	Investigation
A response to a single task, situation and/or scenario.	A technique that assesses the application of identified skills to the production of artworks.	A technique that assesses the interpretation, analysis/examination and/or evaluation of ideas and information in provided stimulus materials.	A response that includes locating and using information beyond students' own knowledge and the data they have been given.
<p>A project consists of:</p> <ul style="list-style-type: none"> • a product component: variable conditions • at least one different component from the following <ul style="list-style-type: none"> - written: 500–900 words - spoken: 2½–3½ minutes - multimodal <ul style="list-style-type: none"> ▪ non-presentation: 8 A4 pages max (or equivalent) ▪ presentation: 3–6 minutes. 	<ul style="list-style-type: none"> • variable conditions 	<p>Presented in one of the following modes:</p> <ul style="list-style-type: none"> • written: 600–1000 words • spoken: 3–4 minutes • multimodal <ul style="list-style-type: none"> - non-presentation: 10 A4 pages max (or equivalent) - presentation: 4–7 minutes. 	<p>Presented in one of the following modes:</p> <ul style="list-style-type: none"> • written: 600–1000 words • spoken: 3–4 minutes • multimodal <ul style="list-style-type: none"> - non-presentation: 10 A4 pages max (or equivalent) - presentation: 4–7 minutes.
