Introduction

The purpose of this guide is to support schools through the provision of a resource that guides students and parents/carers in Years 11 and 12 subject selection. It includes a comprehensive list of all Queensland Curriculum and Assessment Authority (QCAA) subjects that form the basis of a school’s curriculum offerings.

Schools design curriculum programs that provide a variety of opportunities for students while catering to individual schools’ contexts, resources, students’ pathways and community expectations.

The information contained in this booklet is a summary of the approved General, Applied, Senior External Examinations and Short Courses syllabuses. Schools that require further detail about any subject should access the syllabuses from the QCAA portal.
Senior Education Profile

Students in Queensland are issued with a Senior Education Profile (SEP) upon completion of senior studies. This profile may include a:

- statement of results
- Queensland Certificate of Education (QCE)
- Queensland Certificate of Individual Achievement (QCIA).

For more information about the SEP see: www.qcaa.qld.edu.au/senior/certificates-qualifications/sep.

Statement of results

Students are issued with a statement of results in the December following the completion of a QCAA-developed course of study. A new statement of results is issued to students after each QCAA-developed course of study is completed.

A full record of study will be issued, along with the QCE qualification, in the first December or July after the student meets the requirements for a QCE.

Queensland Certificate of Education (QCE)

Students may be eligible for a Queensland Certificate of Education (QCE) at the end of their senior schooling. Students who do not meet the QCE requirements can continue to work towards the certificate post-secondary schooling. The QCAA awards a QCE in the following July or December, once a student becomes eligible. Learning accounts are closed after nine years; however, a student may apply to the QCAA to have the account reopened and all credit continued.

Queensland Certificate of Individual Achievement (QCIA)

The Queensland Certificate of Individual Achievement (QCIA) reports the learning achievements of eligible students who complete an individual learning program. At the end of the senior phase of learning, eligible students achieve a QCIA. These students have the option of continuing to work towards a QCE post-secondary schooling.
QCE Credit and Duplication of Learning

QCE requirements for Year 12 students from 2020

The Queensland Certificate of Education (QCE) is Queensland's internationally recognised senior secondary schooling qualification.

To be issued a QCE, students need to accrue the set amount of learning, at the set standard, in a set pattern, while meeting literacy and numeracy requirements. These requirements are aimed at ensuring students complete their senior schooling with the knowledge and skills they need for success in life beyond school. The QCE is issued to eligible students when they meet all requirements, usually at the end of Year 12.

The QCE demonstrates to employers, tertiary institutions and the wider community that school leavers have met the set standard by completing a learning program with sufficient breadth and depth. To support this, the QCAA ensures that students accrue credit to a QCE for new learning only.

Vocational education and training (VET) provides valid and important pathway options for many students. Students may enrol in any Applied subject and/or VET qualification. Students will not accrue credit where duplication of learning is identified.

This factsheet outlines how QCE credit will accrue in:

- Applied subjects and VET Certificate II qualifications
- VET qualifications in
  - any training package
  - the same training package
- Diploma and Advanced Diploma qualifications.

VET and QCE credit

The QCAA recognises completion and partial completion of courses of study and assigns QCE credit appropriate to the amount of learning students have completed. All completed qualifications and Applied subjects are recorded on the statement of results.

Applied subject and VET qualifications

Applied subjects and Certificate II level VET qualifications that have similar subject matter and learning goals (as determined by the QCAA) are considered duplication of learning as outlined in the following table.
## Applied subjects and VET qualifications with duplication of learning and QCE credit

Relevant Applied subjects and related qualifications are identified on the QCAA website and apply to students at the time of enrolment in a course. This information is updated annually. Further information is available in the *QCE and QCIA Policy and Procedures handbook*. 
VET qualifications

To ensure the requirements for the amount and breadth of learning for a QCE are met, limitations are placed on the amount of QCE credit that can contribute to the QCE for some VET qualifications.

Credit for the QCE is accrued when a student completes new learning. When students complete multiple VET qualifications, an RTO may transfer credit from completed units of competencies from one qualification toward completion of another qualification. New learning in VET is identified as units of competency that are recorded as competent, rather than credit transfer. Credit transfer relates to learning in VET qualifications, which is different from credit contributing to a QCE.

QCE credit and qualifications from the same VET training package

When a student completes or partially completes multiple qualifications from within the same VET training package (e.g. Certificate II in Business and Certificate III in Business), the highest level qualification in the Core category of learning will contribute credit to a QCE. A student who completes only a Certificate I from a training package accrues credit in the Preparatory category of learning. A student who completes a Diploma or Advanced Diploma accrues credit in the Complementary category of learning.

To ensure the breadth of learning, a maximum of eight credits from the same training package can contribute to a QCE.

All completed qualifications are recorded on the statement of results.

VET Credit transfer and QCE credit

Credit accrues to the QCE when a student completes new learning.

For certification, when competencies within a qualification are reported as credit transfer, this is not considered to be new learning. All completed VET qualifications are recorded on the statement of results.
The following table outlines the credit that contributes to a QCE when a VET qualification is completed or partially completed and units of competency are recorded as VET credit transfer.

**QCE credit contribution with VET qualifications completed with a combination of new learning and VET credit transfer**

*Example of QCE credit for Certificates II and III with VET credit transfer from any training packages*
Example of QCE credit for Certificates II and III with VET credit transfer from different training packages

**Diploma and Advanced Diploma qualifications and QCE credit**

Diploma and Advanced Diploma qualifications represent learning that complements core learning undertaken during senior secondary schooling and may provide valuable pathway options for many students. Credit to the QCE for a Diploma or Advanced Diploma may be accrued in the Complementary category of learning.

Where a student is eligible, they accrue credit for Diploma and Advanced Diploma qualifications. Some examples are provided below. Refer to the QCE and QCIA policy and procedures handbook for more information.

Senior subjects

The QCAA develops four types of senior subject syllabuses — General, Applied, Senior External Examinations and Short Courses. Results in General and Applied subjects contribute to the award of a QCE and may contribute to an Australian Tertiary Admission Rank (ATAR) calculation, although no more than one result in an Applied subject can be used in the calculation of a student’s ATAR.

Extension subjects are extensions of the related General subjects and are studied either concurrently with, or after, Units 3 and 4 of the General course.

Typically, it is expected that most students will complete these courses across Years 11 and 12. All subjects build on the P–10 Australian Curriculum.

General syllabuses

General subjects are suited to students who are interested in pathways beyond senior secondary schooling that lead primarily to tertiary studies and to pathways for vocational education and training and work. General subjects include Extension subjects.

Applied syllabuses

Applied subjects are suited to students who are primarily interested in pathways beyond senior secondary schooling that lead to vocational education and training or work.

Senior External Examination

The Senior External Examination consists of individual subject examinations provided across Queensland in October and November each year by the QCAA.

Short Courses

Short Courses are developed to meet a specific curriculum need and are suited to students who are interested in pathways beyond senior secondary schooling that lead to vocational education and training and establish a basis for further education and employment. They are informed by, and articulate closely with, the requirements of the Australian Core Skills Framework (ACSF). A grade of C in Short Courses aligns with the requirements for ACSF Level 3.

Underpinning factors

All senior syllabuses are underpinned by:

- literacy — the set of knowledge and skills about language and texts essential for understanding and conveying content
- numeracy — the knowledge, skills, behaviours and dispositions that students need to use mathematics in a wide range of situations, to recognise and understand the role of mathematics in the world, and to develop the dispositions and capacities to use mathematical knowledge and skills purposefully.
General syllabuses and Short Courses

In addition to literacy and numeracy, General syllabuses and Short Courses are underpinned by:

- 21st century skills — the attributes and skills students need to prepare them for higher education, work and engagement in a complex and rapidly changing world. These include critical thinking, creative thinking, communication, collaboration and teamwork, personal and social skills, and information & communication technologies (ICT) skills.
Applied syllabuses

In addition to literacy and numeracy, Applied syllabuses are underpinned by:

- applied learning — the acquisition and application of knowledge, understanding and skills in real-world or lifelike contexts
- community connections — the awareness and understanding of life beyond school through authentic, real-world interactions by connecting classroom experience with the world outside the classroom
- core skills for work — the set of knowledge, understanding and non-technical skills that underpin successful participation in work.

Vocational education and training (VET)

Students can access VET programs through the school if it:

- is a registered training organisation (RTO)
- has a third-party arrangement with an external provider who is an RTO
- offers opportunities for students to undertake school-based apprenticeships or traineeships.

Australian Tertiary Admission Rank (ATAR) eligibility

The calculation of an Australian Tertiary Admission Rank (ATAR) will be based on a student’s:

- best five General subject results or
- best results in a combination of four General subject results plus an Applied subject result or a Certificate III or higher VET qualification.

The Queensland Tertiary Admissions Centre (QTAC) has responsibility for ATAR calculations.

English requirement

Eligibility for an ATAR will require satisfactory completion of a QCAA English subject.

Satisfactory completion will require students to attain a result that is equivalent to a Sound Level of Achievement in one of five subjects — English, Essential English, Literature, English and Literature Extension or English as an Additional Language.

While students must meet this standard to be eligible to receive an ATAR, it is not mandatory for a student’s English result to be included in the calculation of their ATAR.

<th>Business</th>
<th>Type:</th>
<th>VET Certificate</th>
<th>Field Weightings:</th>
<th>Not Applicable</th>
</tr>
</thead>
</table>

**QCE Credits:**
- 2 Preparatory +
- 4 Core

When a student completes or partially completes multiple qualifications from within the same VET training package, the highest level qualification in the Core category of learning will contribute credit to a QCE. In this case 4 core credits.

**Future Options:**
- Further Certificate courses at TAFE in IT and Multimedia.
- Employment in IT, Administration, Legal, Banking, Tourism, Hospitality, Insurance, Health Care and Travel Industries.

This is an excellent, relevant, real-world course for any student who wants to enhance their employability. It is the foundation of all modern business operations. This course is practical, using real business experiences to prepare students for entry level employment. It also incorporates ICA10111 Certificate I in Information, Digital Media and Technology. A total of 6 QCE points is possible for students who complete both Certificate courses.

**RTO:** Robina State High School  
**Provider Number:** 30341

## Certificate I in Information, Digital Media and Technology

**Competencies:**
- ICTICT101 Operate a personal computer
- ICTICT102 Operate word-processing applications
- ICTICT103 Use, communicate and search securely on the internet
- ICTICT104 Use digital devices
- ICTICT105 Operate spreadsheet applications
- BSBOHS201 Participate in OHS processes

## Certificate II in Information, Digital Media and Technology

**Competencies:**
- ICTICT201 Use computer operating systems and hardware
- ICTICT202 Work effectively in an IT environment
- ICTICT203 Operate application software packages
- ICTICT204 Operate a digital media technology package
- ICTICT205 Design basic organizational documents using computer packages
- ICTICT207 Integrate commercial computing packages
- ICTICT208 Operate accounting applications
- ICTICT210 Operate database applications
- BSBOHS201 Participate in OHS processes
- BSBUS201 Participate in environmentally sustainable work practices
- ICAWEB201 Use social media tools for collaboration and engagement
- BSBIND201 Work effectively in a business environment
- BSBADM201 Communicate in the workplace
- ICASA203 Connect hardware peripherals

Complements BSB30412 Certificate III in Business Administration.

**Assessment:**
Completion of competencies with an ability to re-sit.

**Expectations:**
Willingness and capacity to work independently.

**Additional Costs:**
Excursion Costs.
MEM20413 – CERTIFICATE II IN ENGINEERING (PATHWAYS)  

<table>
<thead>
<tr>

<td></td>
</tr>
<tr>
<td>Future Options:</td>
<td>A trade in a metal fabrication, boiler making, fitter and turner or related industry.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Engineering pathways is a metal based course that is managed and moderated by an external Registered Training Organisation, Blue Dog Training. The course provides the industrial and personal benefits of aligning the appropriate levels of learning and experience that are reasonably attainable in a school setting at Certificate II level, focusing on a broad range of metal fabrication and manufacturing techniques. This qualification has been designed to equip students with the skills and knowledge for employment prospects in an engineering related working environment.

RTO: Blue Dog Training  
Provider Number: 31193

Competencies:
- MEM13014A Apply principles of occupational health and safety in the work environment
- MEMPE005A Develop a career plan for the engineering and manufacturing industry
- MEMPE006A Undertake a basic engineering project
- MSAENV272B Participate in environmentally sustainable work practices
- MEM16006A Organise and communicate information
- MEM16008A Interact with computing technology
- MEM18001C Use hand tools
- MEM18002B Use power tools/hand held operations
- MEMPE001A Use engineering workshop machines
- MEMPE002A Use electric welding machines
- MEMPE003A Use oxy-acetylene and soldering equipment
- MEMPE004A Use fabrication equipment
- MEMPE007A Pull apart and re-assemble engineering mechanisms

Blue Dog will issue the certificate upon completion

Assessment:
- Competency based with an opportunity to redo tasks
- Short and specific online tests

Expectations:
- Motivated students who enjoy practical work
- Students looking to gain a traineeship or school based apprenticeship
- Practical and skilled students who enjoy working with hand and power tools
- Students looking to get a trade or have an interest in gaining practical hand skills

Additional Costs:
- This course is covered by the VETiS funding arrangement and is provided free for students who have not previously accessed the funding.**
- Safety gear- full-length shirt/pants (cotton), safety boots (steel capped).

** This information was correct at the time of printing but may alter dependent upon policy changes with the current government.

</tbody>
</table>

**Future Options:**
- Trade in furnishing or timber related (carpentry) industry.
- Preparation for entry into the general workforce with a focus towards a timber trade.

The Certificate II Furniture Making (Pathways) course is managed and moderated by an external Registered Training Organisation – Core Industry Training. The course provides the industrial and personal benefits of aligning the appropriate levels of learning and experience that are reasonably attainable in a school setting at Certificate II level. Students can credit transfer some units of competency if they have studied Cert I in Furnishing allowing freedom, flexibility and acceleration through the course. The course contains 5 core and 8 elective competencies which have been selected from the furnishings training package. Students will be exposed to a broad range of manufacturing techniques and will consolidate and extend their experiences from previous work done in the manufacturing area. This is a competency-based training program that may lead to employment in a qualifying timber related construction, manufacturing or process industry.

**RTO:** Core Industry Training  
**Provider Number:** 91712

**Competencies:**
- MSFFM2001 Use furniture making sector hand and power tools
- MSAENV272B Participate in environmentally sustainable work practices
- MSAPMOPS101A Make measurements
- MSAPMSUP102A Communicate in the workplace
- MSAPMSUP106A Work in a team
- CPCCOHS1001A Work safely in the construction industry
- MSAPOHS200A Work safely
- MSFFF2004 Prepare surfaces for finishing
- MSFFM2002 Assemble furnishing components
- MSFFM2003 Select and apply hardware
- MSFFM2005 Join solid timber
- MSFFM2006 Hand make timber joints
- MSFFM2007 Follow plans to assemble production furniture
- MSFFM2010 Set up, maintain and operate basic static machines

Core Industry Training will issue the certificate upon completion

**Assessment:**
- Competency based with an opportunity to redo tasks
- Short and specific written tests

**Expectations:**
- Ability to attend early/late classes
- Motivated students who enjoy practical work
- Students will undertake industry placement, a traineeship or school based apprenticeship to compliment the course content

**Additional Costs:**
This course is covered by the VETiS funding arrangement and is provided free for students who have not previously accessed the funding.**  
There may some extra costs associated with the supply of materials for this course.

**This information was correct at the time of printing but may alter dependant on policy changes with the current government.**
The Certificate II in Hospitality course will be delivered at school and off campus through an external Registered Training Organisation (Blueprint Career Development RTO 30978) who will deliver and issue the certificate upon completion.

While theoretical components are completed here at school using an online training package with their class teacher and a Blueprint trainer, the students will attend some external training opportunities in the second year of the course (details to be advised). Some school lessons will also contain practical cooking sessions to consolidate learning and provide opportunities to further develop skills before going out into industry. This subject has been designed to develop an understanding of the hospitality industry, skills in the area of food and beverage production and service, and encourages personal skills and attitudes important in this major employment area here on the Gold Coast.

**RTO:** Blueprint Career Development  
**Provider Number:** 30978

**Proposed competencies:**
- BSBWOR203B Work effectively with others
- SITHIND201 Source and use information on the hospitality industry
- SITHIND202 Use hospitality skill effectively
- SITXCOM201 Show social and cultural sensitivity
- SITSCCS202 Interact with customers
- SITXWHS101 Participate in safe work practices
- SITXFSA101 Use hygienic practices for food safety
- SITXFIN201 Process financial transactions
- SITHFOB Prepare and serve non-alcoholic beverages
- SITHFOB204 Prepare and serve espresso coffee
- SITHFOB206 Serve food and beverage
- SITXCCC102 Prepare simple dishes

**Assessment:**
- Tests (theoretical and practical)
- Practical tasks
- Applied tasks (hospitality events)
- Assessor observations

**Expectations:**
- Workplace Health and Safety Practices are followed in the kitchens- including wearing of appropriate footwear
- Students will be required to work at school-based functions out of normal school hours (generally one per semester)

**Additional Costs:**
Students may need to supply some ingredients for practical lessons back at school.

There is no invoiced cost for the Certificate II Hospitality course and transport is also provided free as course fees are currently covered by VETis funding arrangement. This course covers all training, resources, industry standard equipment, access to online units and external training blocks.

Provide black long pants and white collared shirt for service shifts.

*(Information is true at time of printing)*

</tr>
</tbody>
</table>

**Other Pre-Requisites:**
Candidates must meet ALL of the following conditions:
- Be at least 15 years of age on the date of final assessment
- Complete an unaided swim (goggles/masks permitted) of 400 metre swim in nine (9) minutes or less, in a swimming pool of not less than 25 metres, or over a measured open water course which will be observed prior to the candidate undertaking any water training or assessment activities, evidence of which must be provided to the Assessor on the appropriate form prior to commencement of the assessment for this qualification.

**Context:**
Students offered the opportunity to complete this certificate while completing Aquatic Practices. The aim of this course is to provide participants with the skills and knowledge of basic patrolling and surf awareness in order to be able to participate in lifesaving operations. This is the core award to be a surf lifesaver in Australia.

**Future Options:**
After achieving the PUA21012 Certificate II in Public Safety (Aquatic Rescue), candidates may undertake a range of qualifications relevant to their role, such as:
- PUA31312 Certificate III in Public Safety (Aquatic Search and Rescue)
- PUA31412 Certificate III in Public Safety (Community Safety)

This course is delivered in conjunction with a Registered Training Organisation who will issue the certificate upon completion.

**RTO:** Burleigh Emergency & Safety Training / QLD Surf Lifesaving  
**Provider Number:** 2804

**Competencies:**
PUA21012 Certificate II in Public Safety (Aquatic Rescue):
- PUA21012: Communicate in the workplace
- HLTFA211A: Provide basic emergency life support
- PUA013A: Participate in an aquatic rescue operation
- PUA001B: Work in a team
- PUA004D: Work effectively in a public safety organisation
- PUOHS001C: Follow defined occupational health & safety policies & procedures
- PUOPE013A: Operate communications systems and equipment
- PUOS012C: Apply surf awareness and self-rescue skills

Candidates may also be issued the following units:
- HLTCP211B: Perform CPR OR
- HLTADC01: Perform CPR

**Assessment:**
Competency based assessment tasks including practical components

**Expectations:**
Must attend and participate in all aspects of the course

**Additional Costs:**
This certificate course is delivered as part of Aquatic Practices – Course delivery by RTO

<td>This Certificate requires students to commit to 80 hours of mandatory structured workplace learning (work placement) over 2 years. Students will need to seek out employers; however, the school will assist with all other organisational requirements for Structured Workplace Learning.</td>
</tr>
</tbody>
</table>
| **Future Options:** | • School-based Apprenticeships or Traineeships  
• Part or Full time employment  
• TAFE course |

This Certificate II is primarily designed for young people still in school, who have not determined their career pathway. Work placement forms a significant part of the learning associated with this course. Students may choose any industry to complete their work placement.

The purpose of this pre-vocational course is to maximise young people’s employability potential in small, medium or large enterprises by equipping them with knowledge, skills, generic and specific competencies that enable them to meet the demands of the workplace as a proficient worker and to plan and manage their own skills development and employment options.

**RTO:** Robina State High School  
**Provider Number:** 30341

**Competencies:**
- FSKDIG03 Use digital technology for routine workplace tasks
- FSKLRG09 Use strategies to respond to routine workplace problems
- FSKLRG11 Use routine strategies for work-related learning
- FSKNUM14 Calculate with whole numbers and familiar fractions, decimals and percentages
- FSKNUM15 Estimate, measure and calculate routine metric measurements for work
- FSKOCM07 Interact effectively with others at work
- FSKRDG10 Read and respond to routine workplace information
- FSKWTG09 Write routine workplace texts
- GENSWL201C Participate in structured workplace learning 2
- BSBHOS201 Participate in OHS processes
- BSBSUS201 Participate in environmentally sustainable work practices
- ICAWEB201 Use social media tools for collaboration and engagement
- BSBIND201 Work effectively in a business environment
- BSBCOMM201 Communicate in the workplace

**Assessment:**
- Specific tests
- Class work folios
- Competency-based assessment
- Work Experience Diary

**Expectations:**
- Motivated students who are committed to theory and practical work
- Students must undertake 80 hours of work placement for the completion of the Certificate II component of the course

**Additional Costs:**
White Card $40 - $50 depending on the RTO chosen by the student. This can be done on-line in most cases.

**Optional Costs:**
First Aid Certification $90.

- • For parents: Detailed information about the modules in this course can be found at www.training.gov.au
CHC30113 – CERTIFICATE III IN EARLY CHILDHOOD EDUCATION & CARE (VEC)

Faculty: Applied Technologies
Type: VET Certificate

QCE Credits: 8 Core
Field Weightings: Not Applicable

Future Options: Career in childcare as an educator or further study in Early Childhood Education at TAFE or University.

Certificate III in Early Childhood Education & Care is delivered at school through a Registered Training Organisation who will issue the certificate upon completion. The course consists of two components; theory completed at school and practical application completed in the workplace during work placement.

Students complete the following units of competence over 7 terms:

RTO: Charlton Brown  Provider Number: 2508

Competencies:
- CHCECE013 Use information about children to inform practice
- CHCECE011 Provide experiences to support children’s play and learning
- CHCECE012 Support children to connect to their world
- CHCECE007 Develop positive and respectful relationships with children
- CHCECE009 Use an approved learning framework to guide practice
- CHCECE010 Support the holistic development of children in early childhood
- CHCECE002 Ensure health and safety of children
- CHCECE003 Provide care for children
- CHCECE004 Promote and provide healthy foods and drinks
- CHCECE005 Provide care for babies and toddlers
- CHCECE001 Develop cultural competence
- HLT POR 04D Work effectively with Aboriginal and or Torres Strait Islander people
- BSBWOR301 Organise personal work priorities and development
- HLT POR 03C Work effectively with culturally diverse clients and co-workers
- CHCCS400C Work within a relevant legal and ethical framework
- CHCPRT001 Identify and respond to children and young people at risk
- HLTWHS001 Participate in work health and safety
- CHCORG303C Participate effectively in the work environment
- HLT AID 004 Provide an emergency first aid response in an education and care setting in Year 12 by a separate provider

Part of this qualification includes a minimum of 120 and up to 250 hours of work placement which must be undertaken at a registered education and care centre over the 7 terms of the course.

Assessment:
- Completion of module booklets and assessable activities
- Activities could include: practical demonstrations, resource folios & written tasks
- Demonstration of competencies during work placement

Expectations:
- Students will need to participate in at least 120 hours and up to 250 hours of work experience in a centre on Fridays
- Students to obtain a blue card (processed through the school)

Invoiced Fees: $350 per year. External tuition and work placement.

INVOICED FEES FOR THIS SUBJECT MUST BE PAID IN FULL ON OR BEFORE 1 NOVEMBER 2018 ALONG WITH FULL/INSTALMENT PAYMENT OF 2019 STUDENT RESOURCE SCHEME TO ENSURE PLACEMENT INTO THE SUBJECT.
NON-REFUNDABLE AFTER COURSE COMMENCEMENT.
STUDENTS WISHING TO ENTER THIS SUBJECT/PROGRAM AFTER THIS DATE ARE REQUIRED TO PAY IN FULL AT ENROLMENT INTERVIEW OR PRIOR TO SUBJECT CHANGE FINAL APPROVAL.

Additional Costs:
- USB stick

Information is true at time of printing
### SIS30315 – CERTIFICATE III IN FITNESS (VFD)

</tbody>
</table>

#### Subject Pre-Requisites:
- C in English and Science
- B in Physical Education (or recommendation by HPE Teacher)

#### Other Pre-Requisites:
- Language, Literacy and Numeracy skills to be able to understand content
- A high capacity and interest in physical activity is essential

#### Future Options:
- Entry Level Qualification required for employment in the fitness industry.
- Certificate IV in Fitness
- Diploma of Fitness
- Alternative entry to some bachelor courses (provided other prerequisites are met)

Whilst Robina staff delivers this course the Registered Training Organisation will issue the certificate upon completion. Some of the skills and knowledge that are developed in the course include being able to:

- Identify clients’ fitness requirements and advice on facilities and services
- Develop basic fitness programs for fitness industry clients
- Provide the applied exercise science required for fitness instructors
- Educate clients on the application of basic anatomy and physiology and understand the functional significance of these structures in relation to movement and exercise
- Provide basic nutritional information and advice to fitness industry clients, who have no dietary or nutritional concerns
- Instruct and supervise clients in fitness using basic fitness industry equipment

**RTO:** Alma 1 trading as the Human Performance Centre (HPC)  
**Provider No:** 41071

**Competencies achieved include:**

#### CORE UNITS
- SISFFIT001 Provide health screening and fitness orientation
- SISFFIT003 Instruct fitness programs
- SISFFIT002 Recognise and apply exercise considerations for specific populations
- SISFFIT014 Instruct exercise to older clients
- SISFFIT004 Incorporate anatomy and physiology principles into fitness programming
- SXCC5001 Provide quality service
- SISFXAC001 Maintain equipment for activities
- SISIND001 Work effectively in sport, fitness and recreation environments
- SISFFIT005 Provide healthy eating information

#### ELECTIVE UNITS
- SISFFIT006 Conduct fitness appraisals
- BSBRSK401 Identify risk and apply risk management processes
- HLTHSW5001 Participate in workplace health and safety
- HLTAID001 Provide CPR
- HLTAID003 Provide first aid
- SISFFIT012 Instruct movement programs to children aged 5 to 12 years
- SISSCO307 Provide nutrition information to athletes

#### Assessment:
- Workbooks
- Assignments
- Practical Assessment
- Structured Work Placement (in students own time)

#### Expectations:
Students must complete a total of 15 units of competency.

#### Invoiced Fees:
$350 per year; gym fees, group fitness training, first aid qualification, additional transport & equipment. Course delivery is in conjunction with an RTO.

**INVOICED FEES FOR THIS SUBJECT MUST BE PAID IN FULL ON OR BEFORE 1 NOVEMBER 2018 ALONG WITH FULL/INSTALMENT PAYMENT OF 2019 STUDENT RESOURCE SCHEME TO ENSURE PLACEMENT INTO THE SUBJECT. NON-REFUNDABLE AFTER COURSE COMMENCEMENT. STUDENTS WISHING TO ENTER THIS SUBJECT/PROGRAM AFTER THIS DATE ARE REQUIRED TO PAY IN FULL AT ENROLMENT INTERVIEW OR PRIOR TO SUBJECT CHANGE FINAL APPROVAL.**

Students will complete the following courses across 2 years:

**HLT21212 Certificate II in Health Support Services** has been identified as a need within the health industry and it allows students to be employed multi-skilled, thus increasing employment opportunities. This program will provide job opportunities including but not limited to; Orderly, Support Services Worker and Ward Assistant.

**HLT32512 Certificate III in Health Services Assistance** covers workers in a range of roles providing assistance to health professional staff with the care of clients. Health Services Assistance involves the worker in direct client contact under supervision.

**HLT32512/HLT21212 Schools Health Program - Certificate III in Health Services Assistance/Certificate II in Health Support Services (Dual Qualification)**

RTO: TAFE QLD Gold Coast
Provider Number: 0083

**Units of Competency:**

| CHCCOM005 | Communicate and work in health or community services |
| HLTINF001 | Comply with infection prevention and control policies and procedures |
| BSBFLM312 | Contribute to team effectiveness |
| BSBMED301 | Interpret and apply medical terminology appropriately |
| CHCCCS010 | Maintain a high standard of service |
| BSBWOR301 | Organise personal work priorities and development |
| HLTWHS001 | Participate in Workplace Health and Safety |
| HLTAAP001 | Recognise healthy body systems |
| HLTAID003 | Provide first aid |
| CHCCCS020 | Respond effectively to behaviours of concern |
| CHCCCS015 | Provide Individualised Support |
| CHCCCS026 | Transport individuals |
| CHCCCS012 | Prepare and maintain beds |
| BSBWOR203 | Work effectively with others |
| CHCDIV001 | Work with diverse people |
| MOOVCPC80 | Vocational Placement |
(Con’t) Certificate III in Health Services Assistance/Certificate II in Health Support Services

| Assessment: | • Online tasks and assessment  
|            | • Oral Presentations  
|            | • Practical Assessment |

| Expectations: | This course has blended delivery (online study with scheduled practical skills days each semester) held over 2 years. Compulsory scheduled face-to-face workshops, practical sessions and field trips to be attended at TAFE Gold Coast Southport throughout the program. All face-to-face sessions will be timetabled on Fridays. |

**Vocational Placement (HLT32512 Certificate III in Health Services Assistance ONLY)**

The vocational placement requirement for this program is 80 hours completed in the second year of course delivery. This will occur during the school holidays.

**IMPORTANT:** Students are required to organise their own transport to and from the facilities, be available to attend nominated shifts and may be required to undertake placement in the Gold Coast and Tweed areas.

The TAFE sources and coordinates vocational placement on the students’ behalf. The TAFE’s Vocational Placement Team will work in collaboration with students and facilities to coordinate vocational placement.

**Mandatory Vocational Placement Documentation**

Please note: The Health Industry dictates that TAFE Queensland Gold Coast must ensure that all students going on placement in health care facilities hold the following documentation. Students will **NOT** be released for placement without these documents.

Students must provide to TAFE Queensland Gold Coast a certified copy* of each of these documents as soon as possible. *Certified copy - photocopy certified by a Justice of the Peace or Commissioner of Declarations.

1. Current Australian First Aid Certificate (HLTAID003 Provide First Aid) with current competency in CPR (CPR must be updated annually). HLTAID003 Provide First Aid is delivered as part of this course.

2. Full vaccination history for all of the following vaccination regimes, including serology evidence of immunity where indicated.

   - **Hepatitis B** - you must commence or have undertaken an age appropriate course of vaccination. Students must not undertake an accelerated course of vaccination. To prove immunity you will need to have a blood test (serology) after the completion of the full vaccination course.

   - **Varicella (Chicken Pox)** - provide serology or evidence of completed vaccinations. **MMR (Measles Mumps and Rubella)** - provide serology or evidence of completed vaccinations. **dTPa (Adult Diphtheria, Tetanus and Pertussis)** - provide evidence that you have received a booster within the last 10 years.

   - **Influenza vaccination** is recommended but not mandatory. Completion of the TAFE Queensland Gold Coast **Tuberculosis** Screening form.

3. Blue Card (Working with Children Check Queensland) - phone 1800 113 611 or [http://www.bluecard.qld.gov.au](http://www.bluecard.qld.gov.au). This will need to be linked to TAFE Queensland.

4. Australian Federal Police Check - please contact the Australian Federal Police on (02) 6202 3333 or [http://www.afp.gov.au](http://www.afp.gov.au). Approximate cost $45.00 (N.B. The certificate MUST be issued by the Australian Federal Police. All other types of police checks will not be accepted).

5. A TAFE Queensland Health Services polo shirt. Approximate cost $35.00

**IMPORTANT:** Any costs associated with these documents are in addition to course costs and will be borne by the student.

**Additional Costs:** TAFE Queensland Gold Coast is the Registered Training Organisation for this course and charge a subsidised fee of TBA. This fee is payable to TAFE Gold Coast upon enrolment.

Recommended Study: Year 10 Certificate II in Creative Industries or Digital Technologies or Film, Television & New Media. Only recommended it is not compulsory to have studied these subjects.

Future Options: On successful completion of this qualification your career prospects may include entry level positions in any of the following:
- Graphic Design Company
- Photography Company requiring photo manipulation/correction skills
- 2D animation (Digital animator)
- Web design
- Freelance graphic artist

We are now linked with University of Canberra and TAFE Queensland Degrees *(Coomera and Brisbane campus)* and on completion of this certificate students will have a direct pathway to:
- Bachelor of Information Technology (proposed)
- Bachelor of Games and Interactive Design (under development)
- Bachelor of Web Design and Production (proposed)
- Bachelor of Media Arts and Production (proposed)

Completed Digital Folio/Website can also be used for other University graphic arts courses e.g. Griffith University Degree in Creative Arts, Communications, and Multi Media and Design, Diploma Graphic design.

Learn essential skills of DIGITAL MEDIA and GRAPHIC DESIGN in this exciting course!
This course has been especially designed to meet the demands of the technical industry. It is also ideal for anyone wanting to upgrade their current computer skills to gain a recognized qualification.

Students completing this course will be required to participate in both simulated and real work experiences in the digital media/graphic design industry to complete their competencies.

Students will develop key digital-communication skills in graphic design, communication, project management, and web technology. This course covers the skills required to create and manage digital media including digital imaging, graphic design, website construction & 2D animations, with the focus on using the industry software packages, Adobe Illustrator, Adobe Photoshop, Adobe Dreamweaver and Adobe Flash amongst others.

RTO: Robina State High School  
Provider Number: 30341

Competencies:

This course is delivered in conjunction with IKIN Dance on behalf of the RTO who will issue the qualification. The course commences in term 1 and completed by end of year 11. Students in this course are strongly recommended to be enrolled in Dance in Practice, which is a two year course (Year 11 & 12).

**RTO:** National Health and Fitness Academy  
**Provider Number:** 31894  
**Certificate IV in Dance (14 units)**

### Units of Competencies:

- CUAOHS401A Develop expertise in jazz dance technique
- CUADAN408 Develop expertise in ballet technique
- CUADTM403 Apply safe dance teaching methods
- CUAPRF407 Develop expertise in musical theatre
- CUADAN409 Develop expertise in contemporary dance technique
- CUADAN407 Develop expertise in dance performance technique
- CUAPRF404 Refine movement skills for performance
- CUADAN303 Develop dance partnering techniques
- CUACHR403 Develop choreography skills
- CUAPRF405 Rehearse technique for performance
- CUAPPR404 Develop self as artist
- CUAPRF304 Develop audition techniques
- CUACHR301 Perform basic on-ground acrobatics techniques
- CUAWHS401 Apply movement and behavioural principles to physical conditioning

This course is available to General and Applied students and may be chosen in conjunction with Dance in Practice, or separately. NB If chosen separately students will be required to attend the IKIN Dance Studio out of school hours. If chosen in conjunction with Dance in Practice the course will be delivered predominantly in school hours.

### Assess:

- Satisfactory completion of all competencies
- 14 units

### Expectations:

- Attend all scheduled classes.
- Complete theory modules online
- Personal dance practice, outside of class hours

### Additional Costs:

- Cert IV course fees (14 units):
  - $3295 (if paid in full)
  - $3600 (if on payment plan)

(Costs are paid directly to IKIN DANCE)

</tbody>
</table>

**Learn the essential skills of song-writing and performing and how to record a demo.**

This course is delivered in conjunction the Registered Training Organisation who will issue the qualification.

**RTO:** The QLD College of Music Pty Ltd  
**Provider Number:** 40821

#### Core competencies:
- BSBCRT401 Articulate, present and debate ideas
- BSBIPR401 Use and respect copyright
- BSBSMB301 Investigate micro-business opportunities
- CUAWHS302 Apply work health and safety practices

#### Elective competencies:
- CUAMCP402 Develop techniques for composing music
- CUAMPF304 Make a music demo
- CUAMPF405 Develop instrumental techniques
- CUAMPF302 Prepare for performances
- CUAMPF401 Rehearse music for group performances
- CUAMPF404 Perform music as part of a group
- CUAMPF406 Perform music as a soloist
- CUARES402 Conduct Research
- BSBUS201 Participate in environmentally sustainable work practices
- BSBLDR403 Lead team effectiveness

This course is available to General and Applied students and may be chosen in conjunction with Music, or Music in Practice, or separately.

**A completed Certificate IV course gives a student an automatic scaled score for their ATAR**

#### Assessment:
- Satisfactory completion of all competencies
- 4 core units
- 10 elective units for Cert IV

#### Expectations:
Personal instrumental practice, outside of class hours

#### Additional Costs:
- QCM admin fees: $100. Students pay $60 per completed unit for their course.
- Cert IV course fees (14 units): $940, Cert III course fees (11 units): $660
SB50207 – DIPLOMA OF BUSINESS (VDB)

Faculty: Student Pathways
Type: VET Certificate

QCE Credits: 1 – 8 Advanced (1 per completed Competency) Field Weightings: Not Applicable

Context: This course is delivered by an external Registered Training Organisation Prestige Training Services, at our campus. Delivery is from 1.00pm to 4.00pm Wednesdays in the Business block. Delivery is over 10 months for Y12 and 11 months for Year 11. Students have full and open access to their trainer and may attend holiday catch-up sessions. Open to Year 11 & 12 students.

Future Options: • Opportunity to move into full-time employment in any business • Provide job opportunities whilst undertaking a Gap Year • Earn money whilst studying a higher qualification • This provides advanced standing when applying to university • May articulate directly into the second year of allied business degree courses (check this carefully with the relevant university)

# This is an excellent course for any student who wishes to pursue further tertiary study in business, is interested in seeking employment in a business environment or who wishes to use the diploma as an alternative route to university. In some degree courses this diploma overrides the requirement for 4 semesters of Authority English.

All textbooks and learning material will be provided and continuous email and phone support outside of class delivery will be available to students.

RTO: Prestige Service Training Provider Number: 31981

Students will complete the following 8 Competencies:
BSBWORS01 Manage work priorities and professional development
BSBADMS02 Manage Meetings
BSBMMGS01 Identify and evaluate marketing opportunities
BSBPMG522 Undertake project work
BSBMLT516 Facilitate continuous improvement
BSBHRM506 Manage budgets and financial plans
BSBADM506 Manage business documents design and development
BSBHRMS06 Manage recruitment, selection and induction processes

The course allows articulation directly into many bachelor degrees as long as other prerequisites are met.

STUDENTS MUST STILL SELECT 6 SCHOOL SUBJECTS to commence Year 11 Adjustments will be made to a student’s timetable to acknowledge extra study when they have successfully completed 1 term of the course. They may drop a subject at that time or later depending on QCE eligibility.

# This course will not appear in your One School on-line selections. To select this please see Ms McKenzie, Head of Senior Schooling, or Ms Allen in Student Pathways (Support House).

Assessment: Progressive completion of competencies including portfolios, teacher observations and teacher questioning.

Expectations: Willingness and capacity to work independently and in a team, under timeline pressures. Attendance at all sessions or immediate liaison with school and trainer if absent.

Additional Costs: $1990 Course costs are payable to Prestige Service Training at commencement of the course by either full payment or a payment plan.
### SAT – SCHOOL BASED APPRENTICESHIP OR TRAINEESHIP (STP)

<table>
<thead>
<tr>
<th>Faculty:</th>
<th>Student Pathways</th>

</thead>
<tbody>
<tr>
<td>QCE Credits:</td>
<td>4 – 8 Core Certificate II = 4 credits Certificate III = 5-8 credits Certificate IV = 8 credits Apprenticeship up to 6 credits</td>
</tr>
<tr>
<td>Field Weightings:</td>
<td>Not applicable</td>
</tr>
<tr>
<td>Other Pre-Requisites:</td>
<td>• Provide own transport to work place • Specific Industry requirements e.g. White Card (construction)</td>
</tr>
<tr>
<td>Context:</td>
<td>School-based Apprenticeships and Traineeships can be started at any time in Year 10 &amp; 11 and first term of Year 12. SATs are advertised through the school’s Newsletter, on our website under Careers and Senior Schooling Dashboard. Students apply for these via the Industry Liaison Officer (ILO), Mrs Allen. Students are selected by the employer using resume, interview and sometimes work trialling. The process is coordinated by the ILO. Students who have a family business or friends with a trade/industry business who will take a student on as a SAT need only bring their details to the ILO to arrange a sign up.</td>
</tr>
<tr>
<td>Advantages &amp; Future Options:</td>
<td>• Qualified direct entry into an industry area • Permanent/part time traineeship or apprenticeship. Advancement to higher qualification • Completed VET qualifications or completed competencies contribute to Selection Ranking</td>
</tr>
</tbody>
</table>

SATs, a combination of paid work, training and school study, are available in over 800 areas. Students undertaking a SAT work at least one day/shift a week and attend school for other scheduled classes. *Each SAT arrangement is flexible and individually negotiated between the student, employer and school.*

Training with a Registered Training Organisation selected by the employer takes place in the work place, school or at an outside venue.

In some cases students are able to turn their part-time job into a SAT. Others work in a family company whilst most apply through the school for one of the advertised SAT positions.

Students may elect to study a reduced timetable but must maintain their QCE eligibility.

**STUDENTS MUST STILL SELECT 6 SCHOOL SUBJECTS for SUBJECT SELECTION from Year 10 into 11 even if they are already signed into a SAT.** Adjustments will be made to a student’s timetable to acknowledge this extra study when they have completed the probationary period of the SAT. They may drop a subject at that time, or later, depending on QCE eligibility.

| Assessment: | Training assessment/competency items as per certificate requirements. |
| Expectations: | • Adhere to workplace health and safety requirements • Excellent attendance at workplace, training and school • Notification of any changed circumstance or difficulty with SAT • Completion of all school subject assessment |
| Additional Costs: | Some industries may require specific clothing or equipment and/or own transport. Funding of SATs changes from time to time but there is no cost to a SAT student for the delivery of their certified training course. |
### TAFE SCHOOLS PROGRAM (STP)

<table>
<thead>
<tr>
<th>Faculty:</th>
<th>Student Pathways</th>
</tr>
</thead>
</table>
| QCE Credits: | 2-3 Preparatory (Cert I)  
4 Core (Cert II)  
6-8 Core (Cert III or IV)  
1-8 Advanced (Diploma) | Field Weightings: | Not applicable VETiS (Cert I & II) |
| Other Pre-Requisites: | • Keen interest in course, own transport to TAFE or RTO’s campus  
• Independent learner as some school-based classes may be missed to attend. |
| Advantages & Future Options: | • Use of completed VET certificate or completed competencies to improve Selection Rank and QCE credits.  
• Use for entry to some further tertiary courses such as more advanced Certificate and Diploma courses.  
• Articulation into/credit towards some University studies.  
• Direct qualified entry into some industries at entry level.  
• Employability skills. |

The TAFE & other RTO’s Schools Program involves students enrolling in a VET certificate I, II, III, IV or Diploma courses as offered by TAFE Gold Coast, TAFE Brisbane, Prestige Services Training and other RTOs. Courses are completed **one day per week** at the relevant RTO’s campus. Depending on the qualification the course will run for 1 year, 18 months or 2 years.

Most Certificate III or higher courses take place over two years, therefore students need to apply for these in Year 10, usually by September. Enrolments are on an electronic application basis in Term 3/4 for commencement the following year. There is a mid-year Year 11 intake in some courses as well. Students apply in the year before course commencement so these are open only to Year 10 & 11 students.

See the 2019 TAFE Schools Program booklet and other brochures at Student Pathways in the Support House, the Careers and Senior Schooling Dashboard on Robina SHS’s website or GCIT website for available courses.

**YEAR 10 STUDENTS MUST STILL SELECT 6 SCHOOL SUBJECTS at the time of Subject Selection**, even if they are applying for an external course. Not all students are successful.

**PLEASE NOTE:** Most certificate I & II course are funded under VETiS. As students can only access this funding ONCE, enrolling in a Cert I or II with TAFE or another provider will preclude them from taking a range of certificates as school subjects. Please check the coding at the top of certificate pages.

Students may study a reduced school timetable while maintaining QCE eligibility if undertaking a Certificate II or higher.

Adjustments will be made to a student’s timetable to acknowledge a TAFE/external RTO course when they have completed four weeks of the certificate course. They may drop a subject at that time or later, depending on QCE eligibility.

| Assessment: | • Written/spoken assessment/tests  
• Module work booklets and/or  
• Demonstrated industry competencies |
| Expectations: | Excellent attendance at certificate course whilst managing to keep up to date with school based subjects. Absences for external courses are noted on a student’s school record as Acknowledged absences. Absences from TAFE are Unauthorised |
| Costs: | • Some are fee free whilst others have a small cost depending on the course. This is payable to TAFE or other RTO on enrolment. Transport to campus is not provided by Robina SHS.  
• Specialised equipment outlined prior to enrolment |
### UNIVERSITY SEMESTER COURSES (Year 12 only) (STP)

<table>
<thead>
<tr>

<tr>
<td>Field Weightings:</td>
<td>Not applicable</td>
</tr>
<tr>
<td>Other Pre-Requisites:</td>
<td>Strong academic progress in Authority subjects. Must be OP eligible.</td>
</tr>
</tbody>
</table>
| Advantages & Future Options: | • QCE credits  
| | • Direct or Guaranteed Entry to relevant university in Bachelor degree with credit towards that degree.  
| | • Reduced HECs costs (public university courses are free)  
| | • Taste of university life  
| | • Begin tertiary studies early  
| | • Credit towards courses at other public universities  
| | • Scholarship advantage |

Students enroll in and attend lectures/tutorials for a semester course offered through the “Student for a Semester” Bond University Program; the “GUESTS” Griffith University Program or Griffith Business or Engineering Course, Law or Health program; START QUT; Southern Cross University’s Head Start and Access program. Success in these programs gives students eligibility for Bonus Admission Schemes, Guaranteed Entry and QCE credits.

Applications are processed in Semester 1, 2 & 3 of the two-year senior school course, depending on the universities’ timelines and the types of programs offered. Students may withdraw up to Week 4 of a course without penalty. Please refer to the relevant university’s websites for more specific course information.

**STUDENTS MUST STILL SELECT 6 SCHOOL SUBJECTS as university courses are offered late in Year 11 for Year 12 intake.** Adjustments will be made to a student’s timetable to acknowledge extra study when they have completed 3 weeks of the course. They may drop a subject at that time or later depending on QCE eligibility.

| Assessment: | • Dependent on semester course undertaken:  
| | • Extended written assignments  
| | • Exams  
| | • Group tasks  
| | • Presentations |

| Expectations: | • Independent study skills  
| | • Maintain academic progress in school-based subjects |

| Costs: | • Bond Student for a Semester from $229.00  
| | • Griffith and other public universities’ courses are free  
| | • Transport to campus  
| | • Text books  
| | • Stationery supplies |
General syllabuses

Structure

The syllabus structure consists of a course overview and assessment.

General syllabuses course overview

General syllabuses are developmental four-unit courses of study.

Units 1 and 2 provide foundational learning, allowing students to experience all syllabus objectives and begin engaging with the course subject matter. It is intended that Units 1 and 2 are studied as a pair. Assessment in Units 1 and 2 provides students with feedback on their progress in a course of study and contributes to the award of a QCE.

Students should complete Units 1 and 2 before starting Units 3 and 4.

Units 3 and 4 consolidate student learning. Assessment in Units 3 and 4 is summative and student results contribute to the award of a QCE and to ATAR calculations.

Extension syllabuses course overview

Extension subjects are extensions of the related General subjects and include external assessment. Extension subjects are studied either concurrently with, or after, Units 3 and 4 of the General course of study.

Extension syllabuses are courses of study that consist of two units (Units 3 and 4). Subject matter, learning experiences and assessment increase in complexity across the two units as students develop greater independence as learners.

The results from Units 3 and 4 contribute to the award of a QCE and to ATAR calculations.

Assessment

Units 1 and 2 assessments

Schools decide the sequence, scope and scale of assessments for Units 1 and 2. These assessments should reflect the local context. Teachers determine the assessment program, tasks and marking guides that are used to assess student performance for Units 1 and 2.

Units 1 and 2 assessment outcomes provide feedback to students on their progress in the course of study. Schools should develop at least two but no more than four assessments for Units 1 and 2. At least one assessment must be completed for each unit.

Schools report satisfactory completion of Units 1 and 2 to the QCAA, and may choose to report levels of achievement to students and parents/carers using grades, descriptive statements or other indicators.

Units 3 and 4 assessments

Students complete a total of four summative assessments — three internal and one external — that count towards the overall subject result in each General subject.

Schools develop three internal assessments for each senior subject to reflect the requirements described in Units 3 and 4 of each General syllabus.
The three summative internal assessments need to be endorsed by the QCAA before they are used in schools. Students’ results in these assessments are externally confirmed by QCAA assessors. These confirmed results from internal assessment are combined with a single result from an external assessment, which is developed and marked by the QCAA. The external assessment result for a subject contributes to a determined percentage of a students' overall subject result. For most subjects this is 25%; for Mathematics and Science subjects it is 50%.

Instrument-specific marking guides

Each syllabus provides instrument-specific marking guides (ISMGs) for summative internal assessments.

The ISMGs describe the characteristics evident in student responses and align with the identified assessment objectives. Assessment objectives are drawn from the unit objectives and are contextualised for the requirements of the assessment instrument.

Schools cannot change or modify an ISMG for use with summative internal assessment.

As part of quality teaching and learning, schools should discuss ISMGs with students to help them understand the requirements of an assessment task.

External assessment

External assessment is summative and adds valuable evidence of achievement to a student’s profile. External assessment is:

- common to all schools
- administered under the same conditions at the same time and on the same day
- developed and marked by the QCAA according to a commonly applied marking scheme.

The external assessment contributes a determined percentage (see specific subject guides — assessment) to the student’s overall subject result and is not privileged over summative internal assessment.
Applied syllabuses

Structure

The syllabus structure consists of a course overview and assessment.

Applied syllabuses course overview

Applied syllabuses are developmental four-unit courses of study.

Units 1 and 2 of the course are designed to allow students to begin their engagement with the course content, i.e. the knowledge, understanding and skills of the subject. Course content, learning experiences and assessment increase in complexity across the four units as students develop greater independence as learners.

Units 3 and 4 consolidate student learning. Results from assessment in Applied subjects contribute to the award of a QCE and results from Units 3 and 4 may contribute as a single input to ATAR calculation.

A course of study for Applied syllabuses includes core topics and elective areas for study.

Assessment

Applied syllabuses use four summative internal assessments from Units 3 and 4 to determine a student’s exit result.

Schools should develop at least two but no more than four internal assessments for Units 1 and 2 and these assessments should provide students with opportunities to become familiar with the summative internal assessment techniques to be used for Units 3 and 4.

Applied syllabuses do not use external assessment.

Instrument-specific standards matrixes

For each assessment instrument, schools develop an instrument-specific standards matrix by selecting the syllabus standards descriptors relevant to the task and the dimension/s being assessed. The matrix is shared with students and used as a tool for making judgments about the quality of students’ responses to the instrument. Schools develop assessments to allow students to demonstrate the range of standards.

Essential English and Essential Mathematics — Common internal assessment

Students complete a total of four summative internal assessments in Units 3 and 4 that count toward their overall subject result. Schools develop three of the summative internal assessments for each senior subject and the other summative assessment is a common internal assessment (CIA) developed by the QCAA.

The CIA for Essential English and Essential Mathematics is based on the learning described in Unit 3 of the respective syllabus. The CIA is:

- developed by the QCAA
- common to all schools
- delivered to schools by the QCAA
- administered flexibly in Unit 3
• administered under supervised conditions
• marked by the school according to a common marking scheme developed by the QCAA.

The CIA is not privileged over the other summative internal assessment.

**Summative internal assessment — instrument-specific standards**

The Essential English and Essential Mathematics syllabuses provide instrument-specific standards for the three summative internal assessments in Units 3 and 4.

The instrument-specific standards describe the characteristics evident in student responses and align with the identified assessment objectives. Assessment objectives are drawn from the unit objectives and are contextualised for the requirements of the assessment instrument.

**Senior External Examinations**

**Senior External Examinations course overview**

A Senior External Examination syllabus sets out the aims, objectives, learning experiences and assessment requirements for each of these subjects.

Results are based solely on students’ demonstrated achievement in examinations. Work undertaken before an examination is not assessed.

The Senior External Examination is for:

• low candidature subjects not otherwise offered as a General subject in Queensland
• students in their final year of senior schooling who are unable to access particular subjects at their school
• adult students (people of any age not enrolled at a Queensland secondary school)
  – to meet tertiary entrance or employment requirements
  – for personal interest.

Senior External Examination results may contribute credit to the award of a QCE and contribute to ATAR calculations.

For more information about the Senior External Examination, see: www.qcaa.qld.edu.au/senior/see.

**Assessment**

The Senior External Examination consists of individual subject examinations that are held once each year in Term 4. Important dates and the examination timetable are published in the Senior Education Profile (SEP) calendar, available at: https://www.qcaa.qld.edu.au/senior/sep-calendar.

Results are based solely on students’ demonstrated achievement in the examinations. Work undertaken before an examination is not assessed. Results are reported as a mark and grade of A–E. For more information about results, see the QCE and QCIA policy and procedures handbook, Section 10.
Short Courses

Course overview
Short Courses are one-unit courses of study. A Short Course includes topics and subtopics. Results contribute to the award of a QCE. Results do not contribute to ATAR calculations.

Short Courses are available in:
- Literacy
- Numeracy
- Aboriginal and Torres Strait Islander Languages
- Career Education.

Assessment
A Short Course uses two summative school-developed assessments to determine a student’s exit result. Short Courses do not use external assessment.

The Short Course syllabus provides instrument-specific standards for the two summative internal assessments.

General Mathematics
General senior subject

General Mathematics’ major domains are Number and algebra, Measurement and geometry, Statistics, and Networks and matrices, building on the content of the P–10 Australian Curriculum.

General Mathematics is designed for students who want to extend their mathematical skills beyond Year 10 but whose future studies or employment pathways do not require calculus.

Students build on and develop key mathematical ideas, including rates and percentages, concepts from financial mathematics, linear and non-linear expressions, sequences, the use of matrices and networks to model and solve authentic problems, the use of trigonometry to find solutions to practical problems, and the exploration of real-world phenomena in statistics.

Students engage in a practical approach that equips learners for their needs as future citizens. They learn to ask appropriate questions, map out pathways, reason about complex solutions, set up models and communicate in different forms. They experience the relevance of mathematics to their daily lives, communities and cultural backgrounds. They develop the ability to understand, analyse and take action regarding social issues in their world.

Pathways
A course of study in General Mathematics can establish a basis for further education and employment in the fields of business, commerce, education, finance, IT, social science and the arts.

Objectives
By the conclusion of the course of study, students will:

- select, recall and use facts, rules, definitions and procedures drawn from Number and algebra, Measurement and geometry, Statistics, and Networks and matrices
- comprehend mathematical concepts and techniques drawn from Number and algebra, Measurement and geometry, Statistics, and Networks and matrices
- communicate using mathematical, statistical and everyday language and conventions
- evaluate the reasonableness of solutions
- justify procedures and decisions by explaining mathematical reasoning
- solve problems by applying mathematical concepts and techniques drawn from Number and algebra, Measurement and geometry, Statistics, and Networks and matrices

**Page 40 of 130**
Mathematical Methods’ major domains are Algebra, Functions, relations and their graphs, Calculus and Statistics.

Mathematical Methods enables students to see the connections between mathematics and other areas of the curriculum and apply their mathematical skills to real-world problems, becoming critical thinkers, innovators and problem-solvers.

Students learn topics that are developed systematically, with increasing levels of sophistication, complexity and connection, and build on algebra, functions and their graphs, and probability from the P–10 Australian Curriculum. Calculus is essential for developing an understanding of the physical world. The domain Statistics is used to describe and analyse phenomena involving uncertainty and variation. Both are the basis for developing effective models of the world and solving complex and abstract mathematical problems.

Students develop the ability to translate written, numerical, algebraic, symbolic and graphical information from one representation to another. They make complex use of factual knowledge to successfully formulate, represent and solve mathematical problems.

Pathways

A course of study in Mathematical Methods can establish a basis for further education and employment in the fields of natural and physical sciences (especially physics and chemistry), mathematics and science education, medical and health sciences (including human biology, biomedical science, nanoscience and forensics), engineering (including chemical, civil, electrical and mechanical engineering, avionics, communications and mining), computer science (including electronics and software design), psychology and business.

Objectives

By the conclusion of the course of study, students will:

• select, recall and use facts, rules, definitions and procedures drawn from Algebra, Functions, relations and their graphs, Calculus and Statistics
• comprehend mathematical concepts and techniques drawn from Algebra, Functions, relations and their graphs, Calculus and Statistics
• communicate using mathematical, statistical and everyday language and conventions
• evaluate the reasonableness of solutions
• justify procedures and decisions by explaining mathematical reasoning
• solve problems by applying mathematical concepts and techniques drawn from Algebra, Functions, relations and their graphs, Calculus and Statistics.

Specialist Mathematics
General senior subject

Specialist Mathematics’ major domains are Vectors and matrices, Real and complex numbers, Trigonometry, Statistics and Calculus.

Specialist Mathematics is designed for students who develop confidence in their mathematical knowledge and ability, and gain a positive view of themselves as mathematics learners. They will gain an appreciation of the true nature of mathematics, its beauty and its power.

Students learn topics that are developed systematically, with increasing levels of sophistication, complexity and connection, building on functions, calculus, statistics from Mathematical Methods, while vectors, complex numbers and matrices are introduced. Functions and calculus are essential for creating models of the physical world. Statistics are used to describe and analyse phenomena involving probability, uncertainty and variation. Matrices, complex numbers and vectors are essential tools for explaining abstract or complex relationships that occur in scientific and technological endeavours.

Student learning experiences range from practising essential mathematical routines to developing procedural fluency, through to investigating scenarios, modelling the real world, solving problems and explaining reasoning.

Pathways
A course of study in Specialist Mathematics can establish a basis for further education and employment in the fields of science, all branches of mathematics and statistics, computer science, medicine, engineering, finance and economics.

Objectives
By the conclusion of the course of study, students will:

- select, recall and use facts, rules, definitions and procedures drawn from Vectors and matrices, Real and complex numbers, Trigonometry, Statistics and Calculus
- comprehend mathematical concepts and techniques drawn from Vectors and matrices, Real and complex numbers, Trigonometry, Statistics and Calculus
- communicate using mathematical, statistical and everyday language and conventions
- evaluate the reasonableness of solutions
- justify procedures and decisions, and prove propositions by explaining mathematical reasoning
- solve problems by applying mathematical concepts and techniques drawn from Vectors and matrices, Real and complex numbers, Trigonometry, Statistics and Calculus.
Structure

Specialist Mathematics is to be undertaken in conjunction with, or on completion of, Mathematical Methods.

Essential Mathematics
Applied senior subject

Essential Mathematics’ major domains are Number, Data, Location and time, Measurement and Finance.

Essential Mathematics benefits students because they develop skills that go beyond the traditional ideas of numeracy.

Students develop their conceptual understanding when they undertake tasks that require them to connect mathematical concepts, operations and relations. They learn to recognise definitions, rules and facts from everyday mathematics and data, and to calculate using appropriate mathematical processes.

Students interpret and use mathematics to make informed predictions and decisions about personal and financial priorities. This is achieved through an emphasis on estimation, problem-solving and reasoning, which develops students into thinking citizens.

Pathways
A course of study in Essential Mathematics can establish a basis for further education and employment in the fields of trade, industry, business and community services. Students learn within a practical context related to general employment and successful participation in society, drawing on the mathematics used by various professional and industry groups.

Objectives
By the conclusion of the course of study, students will:

- select, recall and use facts, rules, definitions and procedures drawn from Number, Data, Location and time, Measurement and Finance
- comprehend mathematical concepts and techniques drawn from Number, Data, Location and time, Measurement and Finance
- communicate using mathematical, statistical and everyday language and conventions
- evaluate the reasonableness of solutions
- justify procedures and decisions by explaining mathematical reasoning
- solve problems by applying mathematical concepts and techniques drawn from Number, Data, Location and time, Measurement and Finance.

English focuses on the study of both literary texts and non-literary texts, developing students as independent, innovative and creative learners and thinkers who appreciate the aesthetic use of language, analyse perspectives and evidence, and challenge ideas and interpretations through the analysis and creation of varied texts.

Students are offered opportunities to interpret and create texts for personal, cultural, social and aesthetic purposes. They learn how language varies according to context, purpose and audience, content, modes and mediums, and how to use it appropriately and effectively for a variety of purposes. Students have opportunities to engage with diverse texts to help them develop a sense of themselves, their world and their place in it.

Students communicate effectively in Standard Australian English for the purposes of responding to and creating texts. They make choices about generic structures, language, textual features and technologies for participating actively in literary analysis and the creation of texts in a range of modes, mediums and forms, for a variety of purposes and audiences. They explore how literary and non-literary texts shape perceptions of the world, and consider ways in which texts may reflect or challenge social and cultural ways of thinking and influence audiences.

Objectives
By the conclusion of the course of study, students will:
- use patterns and conventions of genres to achieve particular purposes in cultural contexts and social situations
- establish and maintain roles of the writer/speaker/signer/designer and relationships with audiences
- create and analyse perspectives and representations of concepts, identities, times and places
- make use of and analyse the ways cultural assumptions, attitudes, values and beliefs underpin texts and invite audiences to take up positions
- use aesthetic features and stylistic devices to achieve purposes and analyse their effects in texts
- select and synthesise subject matter to support perspectives
- organise and sequence subject matter to achieve particular purposes
- use cohesive devices to emphasise ideas and connect parts of texts
- make language choices for particular purposes and contexts
- use grammar and language structures for particular purposes
- use mode-appropriate features to achieve particular purposes.

Pathways
A course of study in English promotes open-mindedness, imagination, critical awareness and intellectual flexibility — skills that prepare students for local and global citizenship, and for lifelong learning across a wide range of contexts.

English as an Additional Language
General senior subject

English as an Additional Language is designed for students for whom English is not their first or home language. It develops students’ knowledge, understanding and language skills in Standard Australian English (SAE), and provides them with opportunities to develop higher-order thinking skills and to interpret and create texts for personal, cultural, social and aesthetic purposes.

Students have opportunities to engage with language and texts to foster the skills to communicate effectively in SAE for the purposes of responding to and creating literary and non-literary texts. They develop the language skills required to be competent users of written and spoken English in a variety of contexts, including academic contexts suitable for tertiary studies.

Students make choices about generic structures, language, textual features and technologies to best convey intended meaning in the most appropriate medium and genre. They explore the ways literary and non-literary texts may reflect or challenge social and cultural ways of thinking and influence audiences. Students develop empathy for others and appreciation of different perspectives through a study of a range of literary texts from diverse cultures and periods.

Pathways
A course of study in English as an Additional Language promotes not only language and literacy skills, but also open-mindedness, imagination, critical awareness and intellectual flexibility — skills that prepare students for local and global citizenship, and for lifelong learning across a wide range of contexts.

Objectives
By the conclusion of the course of study, students will:

- use patterns and conventions of genres to achieve particular purposes in cultural contexts and social situations
- establish and maintain roles of the writer/speaker/signer/designer and relationships with audiences
- create and analyse perspectives and representations of concepts, identities, times and places
- make use of and analyse the ways cultural assumptions, attitudes, values and beliefs underpin texts and invite audiences to take up positions
- use aesthetic features and stylistic devices to achieve purposes and analyse their effects in texts
- select and synthesise subject matter to support perspectives
- organise and sequence subject matter to achieve particular purposes
- use cohesive devices to emphasise ideas and connect parts of texts
- make language choices for particular purposes and contexts
- use grammar and language structures for particular purposes
- use mode-appropriate features to achieve particular purposes.

Literature
General senior subject

Literature focuses on the study of literary texts, developing students as independent, innovative and creative learners and thinkers who appreciate the aesthetic use of language, analyse perspectives and evidence, and challenge ideas and interpretations through the analysis and creation of varied literary texts.

Students engage with language and texts through a range of teaching and learning experiences to foster the skills to communicate effectively. They make choices about generic structures, language, textual features and technologies to participate actively in the dialogue and detail of literary analysis and the creation of imaginative and analytical texts in a range of modes, mediums and forms.

Students explore how literary texts shape perceptions of the world and enable us to enter the worlds of others. They explore ways in which literary texts may reflect or challenge social and cultural ways of thinking and influence audiences.

Pathways
A course of study in Literature promotes open-mindedness, imagination, critical awareness and intellectual flexibility — skills that prepare students for local and global citizenship, and for lifelong learning across a wide range of contexts.

Objectives
By the conclusion of the course of study, students will:

- use patterns and conventions of genres to achieve particular purposes in cultural contexts and social situations
- establish and maintain roles of the writer/speaker/signer/designer and relationships with audiences
- create and analyse perspectives and representations of concepts, identities, times and places
- make use of and analyse the ways cultural assumptions, attitudes, values and beliefs underpin texts and invite audiences to take up positions

English & Literature Extension (Year 12 only)
General senior subject

English & Literature Extension is an extension of both the English (2019) and the Literature (2019) syllabuses and therefore offers more challenge than other English courses as it builds on the study students have already undertaken.

English & Literature Extension provides a theorised study of literature, to understand themselves and the potential of literature to expand the scope of their experiences. They ask critical questions about cultural assumptions, implicit values and differing world views encountered in an exploration of social, cultural and textual understandings about literary texts and the ways they might be interpreted and valued.

Students apply different theoretical approaches to analyse and evaluate a variety of literary texts and different ways readers might interpret these texts. They synthesise different interpretations and relevant theoretical approaches to produce written and spoken/signed extended analytical and evaluative texts. The nature of the learning in this subject provides opportunities for students to work independently on intellectually challenging tasks.

Pathways
A course of study in English & Literature Extension can establish a basis for further education and employment in a range of fields, and can lead to a range of careers in areas where understanding social, cultural and textual influences on ways of viewing the world is a key element, such as law, journalism, media, arts, curating, education, policy and human resources. It also provides a good introduction to the academic disciplines and fields of study that involve the application of methodologies based on theoretical understandings.

Objectives
By the conclusion of the course of study, students will:

- demonstrate understanding of literary texts studied to develop interpretation/s
- demonstrate understanding of different theoretical approaches to exploring meaning in texts
- demonstrate understanding of the relationships among theoretical approaches
- apply different theoretical approaches to literary texts to develop and examine interpretations
- analyse how different genres, structures and textual features of literary texts support different interpretations
- use appropriate patterns and conventions of academic genres and communication, including correct terminology, citation and referencing conventions
- use textual features in extended analytical responses to create desired effects for specific audiences
- evaluate theoretical approaches used to explore different interpretations of literary texts
- evaluate interpretations of literary texts, making explicit the theoretical approaches that underpin them
- synthesise analysis of literary texts, theoretical approaches and interpretations with supporting evidence.
Structure

To study English & Literature Extension, students should have completed Units 1 and 2 of either English or Literature. In Year 12, students undertake Units 3 and 4 of English & Literature Extension concurrently with, or after, Units 3 and 4 of English and/or Units 3 and 4 of Literature.

Essential English develops and refines students’ understanding of language, literature and literacy to enable them to interact confidently and effectively with others in everyday, community and social contexts. Students recognise language and texts as relevant in their lives now and in the future and learn to understand, accept or challenge the values and attitudes in these texts.

Students engage with language and texts to foster skills to communicate confidently and effectively in Standard Australian English in a variety of contemporary contexts and social situations, including everyday, social, community, further education and work-related contexts. They choose generic structures, language, language features and technologies to best convey meaning. They develop skills to read for meaning and purpose, and to use, critique and appreciate a range of contemporary literary and non-literate texts.

Students use language effectively to produce texts for a variety of purposes and audiences and engage creative and imaginative thinking to explore their own world and the worlds of others. They actively and critically interact with a range of texts, developing an awareness of how the language they engage with positions them and others.

Objectives

By the conclusion of the course of study, students will:

- use patterns and conventions of genres to achieve particular purposes in cultural contexts and social situations
- use appropriate roles and relationships with audiences
- construct and explain representations of identities, places, events and concepts
- make use of and explain the ways cultural assumptions, attitudes, values and beliefs underpin texts and influence meaning
- explain how language features and text structures shape meaning and invite particular responses
- select and use subject matter to support perspectives
- sequence subject matter and use mode-appropriate cohesive devices to construct coherent texts
- make mode-appropriate language choices according to register informed by purpose, audience and context
- use language features to achieve particular purposes across modes.

Pathways

A course of study in Essential English promotes open-mindedness, imagination, critical awareness and intellectual flexibility — skills that prepare students for local and global citizenship, and for lifelong learning across a wide range of contexts.

Accounting
General senior subject

Accounting provides opportunities for students to develop an understanding of the essential role of organising, analysing and communicating financial data and information in the successful performance of any organisation.

Students learn fundamental accounting concepts in order to understand accrual accounting and managerial and accounting controls, preparing internal financial reports, ratio analysis and interpretation of internal and external financial reports. They synthesise financial data and other information, evaluate accounting practices, solve authentic accounting problems, make decisions and communicate recommendations.

Students develop numerical, literacy, technical, financial, critical thinking, decision-making and problem-solving skills. They develop an understanding of the ethical attitudes and values required to participate effectively and responsibly in a changing business environment.

Pathways
A course of study in Accounting can establish a basis for further education and employment in the fields of accounting, business, management, banking, finance, law, economics and commerce.

Objectives
By the conclusion of the course of study, students will:
• describe accounting concepts and principles
• explain accounting concepts, principles and processes
• apply accounting principles and processes
• analyse and interpret financial data and information to draw conclusions
• evaluate accounting practices to make decisions and propose recommendations
• synthesise and solve accounting problems
• create responses that communicate meaning to suit purpose and audience.

Ancient History
General senior subject

Ancient History provides opportunities for students to study people, societies and civilisations of the past, from the development of the earliest human communities to the end of the Middle Ages. Students explore the interaction of societies, and the impact of individuals and groups on ancient events and ways of life, and study the development of some features of modern society, such as social organisation, systems of law, governance and religion.

Students analyse and interpret archaeological and written evidence. They develop increasingly sophisticated skills and understandings of historical issues and problems by interrogating the surviving evidence of ancient sites, societies, individuals and significant historical periods. They investigate the problematic nature of evidence, pose increasingly complex questions about the past and formulate reasoned responses.

Students gain multi-disciplinary skills in analysing textual and visual sources, constructing arguments, challenging assumptions, and thinking both creatively and critically.

Pathways
A course of study in Ancient History can establish a basis for further education and employment in the fields of archaeology, history, education, psychology, sociology, law, business, economics, politics, journalism, the media, health and social sciences, writing, academia and research.

Objectives
By the conclusion of the course of study, students will:

- comprehend terms, issues and concepts
- devise historical questions and conduct research
- analyse historical sources and evidence
- synthesise information from historical sources and evidence
- evaluate historical interpretations
- create responses that communicate meaning.

Business
General senior subject

Business provides opportunities for students to develop business knowledge and skills to contribute meaningfully to society, the workforce and the marketplace and prepares them as potential employees, employers, leaders, managers and entrepreneurs.

Students investigate the business life cycle, develop skills in examining business data and information and learn business concepts, theories, processes and strategies relevant to leadership, management and entrepreneurship. They investigate the influence of, and implications for, strategic development in the functional areas of finance, human resources, marketing and operations.

Students use a variety of technological, communication and analytical tools to comprehend, analyse, interpret and synthesise business data and information. They engage with the dynamic business world (in both national and global contexts), the changing workforce and emerging digital technologies.

Pathways
A course of study in Business can establish a basis for further education and employment in the fields of business management, business development, entrepreneurship, business analytics, economics, business law, accounting and finance, international business, marketing, human resources management and business information systems.

Objectives
By the conclusion of the course of study, students will:

• describe business environments and situations
• explain business concepts, strategies and processes
• select and analyse business data and information
• interpret business relationships, patterns and trends to draw conclusions
• evaluate business practices and strategies to make decisions and propose recommendations
• create responses that communicate meaning to suit purpose and audience.

Economics encourages students to think deeply about the global challenges facing individuals, business and government, including how to allocate and distribute scarce resources to maximise well-being.

Students develop knowledge and cognitive skills to comprehend, apply analytical processes and use economic knowledge. They examine data and information to determine validity, and consider economic policies from various perspectives. They use economic models and analytical tools to investigate and evaluate outcomes to draw conclusions.

Students study opportunity costs, economic models and the market forces of demand and supply. They dissect and interpret the complex nature of international economic relationships and the dynamics of Australia’s place in the global economy. They develop intellectual flexibility, digital literacy and economic thinking skills.

Pathways
A course of study in Economics can establish a basis for further education and employment in the fields of economics, econometrics, management, data analytics, business, accounting, finance, actuarial science, law and political science.

Economics is an excellent complement for students who want to solve real-world science or environmental problems and participate in government policy debates. It provides a competitive advantage for career options where students are aiming for management roles and developing their entrepreneurial skills to create business opportunities as agents of innovation.

Objectives
By the conclusion of the course of study, students will:
- comprehend economic concepts, principles and models
- select data and economic information from sources
- analyse economic issues
- evaluate economic outcomes
- create responses that communicate economic meaning.

Geography
General senior subject

Geography focuses on the significance of ‘place’ and ‘space’ in understanding our world. Students engage in a range of learning experiences that develop their geographical skills and thinking through the exploration of geographical challenges and their effects on people, places and the environment.

Students investigate places in Australia and across the globe to observe and measure spatial, environmental, economic, political, social and cultural factors. They interpret global concerns and challenges including responding to risk in hazard zones, planning sustainable places, managing land cover transformations and planning for population change. They develop an understanding of the complexities involved in sustainable planning and management practices.

Students observe, gather, organise, analyse and present data and information across a range of scales. They engage in real-world applications of geographical skills and thinking, including the collection and representation of data.

Pathways
A course of study in Geography can establish a basis for further education and employment in the fields of urban and environmental design, planning and management; biological and environmental science; conservation and land management; emergency response and hazard management; oceanography, surveying, global security, economics, business, law, engineering, architecture, information technology, and science.

Objectives
By the conclusion of the course of study, students will:
- explain geographical processes
- comprehend geographic patterns
- analyse geographical data and information
- apply geographical understanding
- synthesise information from the analysis to propose action
- communicate geographical understanding.

Structure

Legal Studies focuses on the interaction between society and the discipline of law and explores the role and development of law in response to current issues. Students study the legal system and how it regulates activities and aims to protect the rights of individuals, while balancing these with obligations and responsibilities.

Students study the foundations of law, the criminal justice process and the civil justice system. They critically examine issues of governance, explore contemporary issues of law reform and change, and consider Australian and international human rights issues.

Students develop skills of inquiry, critical thinking, problem-solving and reasoning to make informed and ethical decisions and recommendations. They identify and describe legal issues, explore information and data, analyse, evaluate to make decisions or propose recommendations, and create responses that convey legal meaning. They question, explore and discuss tensions between changing social values, justice and equitable outcomes.

Pathways

A course of study in Legal Studies can establish a basis for further education and employment in the fields of law, law enforcement, criminology, justice studies and politics. The knowledge, skills and attitudes students gain are transferable to all discipline areas and post-schooling tertiary pathways. The research and analytical skills this course develops are universally valued in business, health, science and engineering industries.

Objectives

By the conclusion of the course of study, students will:

• comprehend legal concepts, principles and processes
• select legal information from sources
• analyse legal issues
• evaluate legal situations
• create responses that communicate meaning.

Modern History provides opportunities for students to gain historical knowledge and understanding about some of the main forces that have contributed to the development of the Modern World and to think historically and form a historical consciousness in relation to these same forces.

Modern History enables students to empathise with others and make meaningful connections between the past, present and possible futures.

Students learn that the past is contestable and tentative. Through inquiry into ideas, movements, national experiences and international experiences they discover how the past consists of various perspectives and interpretations.

Students gain a range of transferable skills that will help them become empathetic and critically-literate citizens who are equipped to embrace a multicultural, pluralistic, inclusive, democratic, compassionate and sustainable future.

Pathways

A course of study in Modern History can establish a basis for further education and employment in the fields of history, education, psychology, sociology, law, business, economics, politics, journalism, the media, writing, academia and strategic analysis.

Objectives

By the conclusion of the course of study, students will:

- comprehend terms, issues and concepts
- devise historical questions and conduct research
- analyse historical sources and evidence
- synthesise information from historical sources and evidence
- evaluate historical interpretations
- create responses that communicate meaning.

Tourism
Applied senior subject

Tourism studies enable students to gain an appreciation of the role of the tourism industry and the structure, scope and operation of the related tourism sectors of travel, hospitality and visitor services.

Students examine the socio-cultural, environmental and economic aspects of tourism, as well as tourism opportunities, problems and issues across global, national and local contexts.

Students develop and apply tourism-related knowledge and understanding through learning experiences and assessment in which they plan projects, analyse issues and opportunities, and evaluate concepts and information.

Pathways
A course of study in Tourism can establish a basis for further education and employment in businesses and industries such as tourist attractions, cruising, gaming, government and industry organisations, meeting and events coordination, caravan parks, marketing, museums and galleries, tour operations, wineries, cultural liaison, tourism and leisure industry development, and transport and travel.

Objectives
By the conclusion of the course of study, students should:

- recall terminology associated with tourism and the tourism industry
- describe and explain tourism concepts and information
- identify and explain tourism issues or opportunities
- analyse tourism issues and opportunities
- apply tourism concepts and information from a local, national and global perspective
- communicate meaning and information using language conventions and features relevant to tourism contexts
- generate plans based on consumer and industry needs
- evaluate concepts and information within tourism and the tourism industry
- draw conclusions and make recommendations.

Structure
The Tourism course is designed around interrelated core topics and electives.

<table>

At least two different components from the following:
- written: 500–900 words
- spoken: 2½–3½ minutes
- multimodal
  - non-presentation: 8 A4 pages max (or equivalent)
  - presentation: 3–6 minutes
- performance: continuous class time
- product: continuous class time.

Presented in one of the following modes:
- written: 600–1000 words
- spoken: 3–4 minutes
- multimodal
  - non-presentation: 10 A4 pages max (or equivalent)
  - presentation: 4–7 minutes.

Presented in one of the following modes:
- written: 600–1000 words
- spoken: 3–4 minutes
- multimodal
  - non-presentation: 10 A4 pages max (or equivalent)
  - presentation: 4–7 minutes.

- 60–90 minutes
- 50–250 words per item
Design

General senior subject

Design focuses on the application of design thinking to envisage creative products, services and environments in response to human needs, wants and opportunities. Designing is a complex and sophisticated form of problem-solving that uses divergent and convergent thinking strategies that can be practised and improved. Designers are separated from the constraints of production processes to allow them to appreciate and exploit new innovative ideas.

Students learn how design has influenced the economic, social and cultural environment in which they live. They understand the agency of humans in conceiving and imagining possible futures through design. Collaboration, teamwork and communication are crucial skills needed to work in design teams and liaise with stakeholders. They learn the value of creativity and build resilience as they experience iterative design processes, where the best ideas may be the result of trial and error and a willingness to take risks and experiment with alternatives.

Students learn about and experience design through exploring needs, wants and opportunities; developing ideas and design concepts; using drawing and low-fidelity prototyping skills; and evaluating ideas and design concepts. They communicate design proposals to suit different audiences.

Pathways

A course of study in Design can establish a basis for further education and employment in the fields of architecture, digital media design, fashion design, graphic design, industrial design, interior design and landscape architecture.

Objectives

By the conclusion of the course of study, students will:

- describe design problems and design criteria
- represent ideas, design concepts and design information using drawing and low-fidelity prototyping
- analyse needs, wants and opportunities using data
- devise ideas in response to design problems
- synthesise ideas and design information to propose design concepts
- evaluate ideas and design concepts to make refinements
- make decisions about and use mode-appropriate features, language and conventions for particular purposes and contexts.

Digital Solutions
General senior subject

Digital Solutions enables students to learn about algorithms, computer languages and user interfaces through generating digital solutions to problems. Students engage with data, information and applications to create digital solutions that filter and present data in timely and efficient ways while understanding the need to encrypt and protect data. They understand computing’s personal, local and global impact, and the issues associated with the ethical integration of technology into our daily lives.

Students use problem-based learning to write computer programs to create digital solutions that: use data; require interactions with users and within systems; and affect people, the economy and environments. They develop solutions using combinations of readily available hardware and software development environments, code libraries or specific instructions provided through programming.

Students create, construct and repurpose solutions that are relevant in a world where data and digital realms are transforming entertainment, education, business, manufacturing and many other industries.

Objectives
By the conclusion of the course of study, students will:

- recognise and describe elements, components, principles and processes
- symbolise and explain information, ideas and interrelationships
- analyse problems and information
- determine solution requirements and criteria
- synthesise information and ideas to determine possible digital solutions
- generate components of the digital solution
- evaluate impacts, components and solutions against criteria to make refinements and justified recommendations
- make decisions about and use mode-appropriate features, language and conventions for particular purposes and contexts.

Pathways
A course of study in Digital Solutions can establish a basis for further education and employment in the fields of science, technologies, engineering and mathematics.

Food & Nutrition is the study of food in the context of food science, nutrition and food technologies, considering overarching concepts of waste management, sustainability and food protection.

Students explore the chemical and functional properties of nutrients to create food solutions that maintain the beneficial nutritive values. This knowledge is fundamental for continued development of a safe and sustainable food system that can produce high quality, nutritious solutions with an extended shelf life. Their studies of the food system include the sectors of production, processing, distribution, consumption, research and development.

Students actively engage in a food and nutrition problem-solving process to create food solutions that contribute positively to preferred personal, social, ethical, economic, environmental, legal, sustainable and technological futures.

Pathways

A course of study in Food & Nutrition can establish a basis for further education and employment in the fields of science, technology, engineering and health.

Objectives

By the conclusion of the course of study, students will:

- recognise and describe food and nutrition facts and principles
- explain food and nutrition ideas and problems
- analyse problems, information and data
- determine solution requirements and criteria
- synthesise information and data to develop ideas for solutions
- generate solutions to provide data to determine the feasibility of the solution
- evaluate and refine ideas and solutions to make justified recommendations for enhancement
- make decisions about and use mode-appropriate features, language and conventions for particular purposes and contexts.

Furnishing Skills
Applied senior subject

Furnishing Skills focuses on the underpinning industry practices and production processes required to manufacture furnishing products with high aesthetic qualities.

Students understand industry practices; interpret specifications, including technical information and drawings; demonstrate and apply safe practical production processes with hand/power tools and machinery; communicate using oral, written and graphical modes; organise, calculate and plan production processes; and evaluate the products they create using predefined specifications.

Students develop transferable skills by engaging in manufacturing tasks that relate to business and industry, and that promote adaptable, competent, self-motivated and safe individuals who can work with colleagues to solve problems and complete practical work.

Pathways
A course of study in Furnishing Skills can establish a basis for further education and employment in the furnishing industry. With additional training and experience, potential employment opportunities may be found in furnishing trades as, for example, a furniture-maker, wood machinist, cabinet-maker, polisher, shopfitter, upholsterer, furniture restorer, picture framer, floor finisher or glazier.

Objectives
By the conclusion of the course of study, students should:

- describe industry practices in manufacturing tasks
- demonstrate fundamental production skills
- interpret drawings and technical information
- analyse manufacturing tasks to organise materials and resources
- select and apply production skills and procedures in manufacturing tasks
- use visual representations and language conventions and features to communicate for particular purposes
- plan and adapt production processes
- create products from specifications
- evaluate industry practices, production processes and products, and make recommendations.

Structure
The Furnishing Skills course is designed around core and elective topics.

<table>
<thead>
<tr>
<th>Core topics</th>

</tbody>
</table>
Assessment

For Furnishing Skills, assessment from Units 3 and 4 is used to determine the student’s exit result, and consists of four instruments, including:

- at least two projects
- at least one practical demonstration (separate to the assessable component of a project).

<table>
<thead>
<tr>
<th>Project</th>
<th>Practical demonstration</th>
<th>Examination</th>
</tr>
</thead>
<tbody>
<tr>
<td>A response to a single task, situation and/or scenario.</td>
<td>A task that assesses the practical application of a specific set of teacher-identified production skills and procedures.</td>
<td>A response that answers a number of provided questions, scenarios and/or problems.</td>
</tr>
</tbody>
</table>
| A project consists of a product component and at least one of the following components:  
  • written: 500–900 words  
  • spoken: 2½–3½ minutes  
  • multimodal  
    - non-presentation: 8 A4 pages max (or equivalent)  
    - presentation: 3-6 minutes  
  • product: continuous class time. | Students demonstrate production skills and procedures in class under teacher supervision. | 60–90 minutes  
  50–250 words per item |

FURNISHING SKILLS – Applied Senior Subject

**Invoiced Fees:** $85 per year: *Project materials*

INVOICED FEES FOR THIS SUBJECT MUST BE PAID IN FULL ON OR BEFORE 1 NOVEMBER 2018 ALONG WITH FULL/INSTALMENT PAYMENT OF 2019 STUDENT RESOURCE SCHEME TO ENSURE PLACEMENT INTO THE SUBJECT.  
NON-REFUNDABLE AFTER COURSE COMMENCEMENT.  
STUDENTS WISHING TO ENTER THIS SUBJECT/PROGRAM AFTER THIS DATE ARE REQUIRED TO PAY IN FULL AT ENROLMENT INTERVIEW OR PRIOR TO SUBJECT CHANGE FINAL APPROVAL.
Hospitality Practices develops knowledge, understanding and skills about the hospitality industry and emphasises the food and beverage sector, which includes food and beverage production and service.

Students develop an understanding of hospitality and the structure, scope and operation of related activities in the food and beverage sector and examine and evaluate industry practices from the food and beverage sector.

Students develop skills in food and beverage production and service. They work as individuals and as part of teams to plan and implement events in a hospitality context. Events provide opportunities for students to participate in and produce food and beverage products and perform service for customers in real-world hospitality contexts.

Pathways

A course of study in Hospitality Practices can establish a basis for further education and employment in the hospitality sectors of food and beverage, catering, accommodation and entertainment. Students could pursue further studies in hospitality, hotel, event and tourism or business management, which allows for specialisation.

Structure

The Hospitality Practices course is designed around core topics embedded in a minimum of two elective topics.

<table>
<thead>
<tr>
<th>Core topics</th>
<th>Elective topics</th>
</tr>
</thead>
<tbody>
<tr>
<td>Navigating the hospitality industry</td>
<td>Kitchen operations</td>
</tr>
<tr>

<td>Food and beverage service</td>
</tr>
</tbody>
</table>
Assessment

For Hospitality Practices, assessment from Units 3 and 4 is used to determine the student’s exit result, and consists of four instruments, including:

- at least two projects
- at least one investigation or an extended response.

<table>
<thead>
<tr>
<th>Project</th>
<th>Investigation</th>
<th>Extended response</th>
<th>Examination</th>
</tr>
</thead>
<tbody>
<tr>
<td>A response to a single task, situation and/or scenario.</td>
<td>A response that includes locating and using information beyond students’ own knowledge and the data they have been given.</td>
<td>A technique that assesses the interpretation, analysis/examination and/or evaluation of ideas and information in provided stimulus materials.</td>
<td>A response that answers a number of provided questions, scenarios and/or problems.</td>
</tr>
</tbody>
</table>

A project consists of a product and performance component and one other component from the following:
- written: 500–900 words
- spoken: 2½–3½ minutes
- multimodal: 3–6 minutes
- product and performance: continuous class time

Presented in one of the following modes:
- written: 600–1000 words
- spoken: 3–4 minutes
- multimodal: 4–7 minutes.

Presented in one of the following modes:
- written: 600–1000 words
- spoken: 3–4 minutes
- multimodal: 4–7 minutes.

• 60–90 minutes
• 50–250 words per item
Industrial Graphics Skills focuses on the underpinning industry practices and production processes required to produce the technical drawings used in a variety of industries, including building and construction, engineering and furnishing.

Students understand industry practices, interpret technical information and drawings, demonstrate and apply safe practical modelling procedures with tools and materials, communicate using oral and written modes, organise and produce technical drawings and evaluate drawings using specifications.

Students develop transferable skills by engaging in drafting and modelling tasks that relate to business and industry, and that promote adaptable, competent, self-motivated and safe individuals who can work with colleagues to solve problems and complete tasks.

Pathways
A course of study in Industrial Graphics Skills can establish a basis for further education and employment in a range of roles and trades in the manufacturing industries. With additional training and experience, potential employment opportunities may be found in drafting roles such as architectural drafter, estimator, mechanical drafter, electrical drafter, structural drafter, civil drafter and survey drafter.

Objectives
By the conclusion of the course of study, students should:
- describe industry practices in drafting and modelling tasks
- demonstrate fundamental drawing skills
- interpret drawings and technical information
- analyse drafting tasks to organise information
- select and apply drawing skills and procedures in drafting tasks
- use language conventions and features to communicate for particular purposes
- construct models from drawings
- create technical drawings from industry requirements
- evaluate industry practices, drafting processes and drawings, and make recommendations.

Structure
The Industrial Graphics Skills course is designed around core and elective topics.

<table>

</table>
Industrial Technology Skills

Industrial Technology Skills focuses on the practices and processes required to manufacture products in a variety of industries.

Students understand industry practices; interpret specifications, including technical information and drawings; demonstrate and apply safe, practical production processes with hand/power tools and machinery; communicate using oral, written and graphical modes; organise, calculate and plan production processes; and evaluate the products they create using predefined specifications.

Students develop transferable skills by engaging in manufacturing tasks that relate to business and industry, and that promote adaptable, competent, self-motivated and safe individuals who can work with colleagues to solve problems and complete practical work.

Pathways

A course of study in Industrial Technology Skills can establish a basis for further education and employment in manufacturing industries. Employment opportunities may be found in the industry areas of aeroskills, automotive, building and construction, engineering, furnishing, industrial graphics and plastics.

Objectives

By the conclusion of the course of study, students should:

- describe industry practices in manufacturing tasks
- demonstrate fundamental production skills
- interpret drawings and technical information
- analyse manufacturing tasks to organise materials and resources
- select and apply production skills and procedures in manufacturing tasks
- use visual representations and language conventions and features to communicate for particular purposes
- plan and adapt production processes
- create products from specifications
- evaluate industry practices, production processes and products, and make recommendations.
Structure

The Industrial Technology Skills course is designed around:

- core topics, which are integrated throughout the course
- elective topics, organised in industry areas, and manufacturing tasks related to the chosen electives.

<table>

INDUSTRIAL TECHNOLOGY SKILLS – Applied Senior Subject

<table>
<thead>
<tr>
<th>Invoiced Fees:</th>
<th>$85 per year: Project materials</th>
</tr>
</thead>
</table>

INVOICED FEES FOR THIS SUBJECT MUST BE PAID IN FULL ON OR BEFORE 1 NOVEMBER 2018 ALONG WITH FULL/INSTALMENT PAYMENT OF 2019 STUDENT RESOURCE SCHEME TO ENSURE PLACEMENT INTO THE SUBJECT. NON-REFUNDABLE AFTER COURSE COMMENCEMENT. STUDENTS WISHING TO ENTER THIS SUBJECT/PROGRAM AFTER THIS DATE ARE REQUIRED TO PAY IN FULL AT ENROLMENT INTERVIEW OR PRIOR TO SUBJECT CHANGE FINAL APPROVAL.
Physical Education
General senior subject

Physical Education provides students with knowledge, understanding and skills to explore and enhance their own and others’ health and physical activity in diverse and changing contexts.

Physical Education provides a philosophical and educative framework to promote deep learning in three dimensions: about, through and in physical activity contexts. Students optimise their engagement and performance in physical activity as they develop an understanding and appreciation of the interconnectedness of these dimensions.

Students learn how body and movement concepts and the scientific bases of biophysical, sociocultural and psychological concepts and principles are relevant to their engagement and performance in physical activity. They engage in a range of activities to develop movement sequences and movement strategies.

Students learn experientially through three stages of an inquiry approach to make connections between the scientific bases and the physical activity contexts. They recognise and explain concepts and principles about and through movement, and demonstrate and apply body and movement concepts to movement sequences and movement strategies.

Through their purposeful engagement in physical activities, students gather data to analyse, synthesise and devise strategies to optimise engagement and performance. They engage in reflective decision-making as they evaluate and justify strategies to achieve a particular outcome.

Pathways
A course of study in Physical Education can establish a basis for further education and employment in the fields of exercise science, biomechanics, the allied health professions, psychology, teaching, sport journalism, sport marketing and management, sport promotion, sport development and coaching.

Objectives
By the conclusion of the course of study, students will:

• recognise and explain concepts and principles about movement
• demonstrate specialised movement sequences and movement strategies
• apply concepts to specialised movement sequences and movement strategies
• analyse and synthesise data to devise strategies about movement
• evaluate strategies about and in movement
• justify strategies about and in movement
• make decisions about and use language, conventions and mode-appropriate features for particular purposes and contexts.
## Structure

</tr>
<tr>
<td>• Functional anatomy and biomechanics integrated with a selected physical activity</td>
<td>• Equity — barriers and enablers</td>
<td>• Ethics and integrity</td>
<td></td>
</tr>
</tbody>
</table>

## Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

### Summative assessments

Sport & Recreation provides students with opportunities to learn in, through and about sport and active recreation activities, examining their role in the lives of individuals and communities.

Students examine the relevance of sport and active recreation in Australian culture, employment growth, health and wellbeing. They consider factors that influence participation in sport and recreation, and how physical skills can enhance participation and performance in sport and recreation activities. Students explore how interpersonal skills support effective interaction with others, and the promotion of safety in sport and recreation activities. They examine technology in sport and recreation activities, and how the sport and recreation industry contributes to individual and community outcomes.

Students are involved in acquiring, applying and evaluating information about and in physical activities and performances, planning and organising activities, investigating solutions to individual and community challenges, and using suitable technologies where relevant. They communicate ideas and information in, about and through sport and recreation activities. They examine the effects of sport and recreation on individuals and communities, investigate the role of sport and recreation in maintaining good health, evaluate strategies to promote health and safety, and investigate personal and interpersonal skills to achieve goals.

Pathways

A course of study in Sport & Recreation can establish a basis for further education and employment in the fields of fitness, outdoor recreation and education, sports administration, community health and recreation and sport performance.

Objectives

By the conclusion of the course of study, students should:

- demonstrate physical responses and interpersonal strategies in individual and group situations in sport and recreation activities
- describe concepts and ideas about sport and recreation using terminology and examples
- explain procedures and strategies in, about and through sport and recreation activities for individuals and communities
- apply concepts and adapt procedures, strategies and physical responses in individual and group sport and recreation activities
- manage individual and group sport and recreation activities
- apply strategies in sport and recreation activities to enhance health, wellbeing, and participation for individuals and communities
- use language conventions and textual features to achieve particular purposes
- evaluate individual and group physical responses and interpersonal strategies to improve outcomes in sport and recreation activities
- evaluate the effects of sport and recreation on individuals and communities
- evaluate strategies that seek to enhance health, wellbeing, and participation in sport and recreation activities and provide recommendations
- create communications that convey meaning for particular audiences and purposes.
Structure

The Sport & Recreation course is designed around core and elective topics.

<table>

Biology 
General senior subject

Biology provides opportunities for students to engage with living systems.

Students develop their understanding of cells and multicellular organisms. They engage with the concept of maintaining the internal environment. They study biodiversity and the interconnectedness of life. This knowledge is linked with the concepts of heredity and the continuity of life.

Students learn and apply aspects of the knowledge and skills of the discipline (thinking, experimentation, problem-solving and research skills), understand how it works and how it may impact society. They develop their sense of wonder and curiosity about life; respect for all living things and the environment; understanding of biological systems, concepts, theories and models; appreciation of how biological knowledge has developed over time and continues to develop; a sense of how biological knowledge influences society.

Students plan and carry out fieldwork, laboratory and other research investigations; interpret evidence; use sound, evidence-based arguments creatively and analytically when evaluating claims and applying biological knowledge; and communicate biological understanding, findings, arguments and conclusions using appropriate representations, modes and genres.

Pathways

A course of study in Biology can establish a basis for further education and employment in the fields of medicine, forensics, veterinary, food and marine sciences, agriculture, biotechnology, environmental rehabilitation, biosecurity, quarantine, conservation and sustainability.

Objectives

By the conclusion of the course of study, students will:

- describe and explain scientific concepts, theories, models and systems and their limitations
- apply understanding of scientific concepts, theories, models and systems within their limitations
- analyse evidence
- interpret evidence
- investigate phenomena
- evaluate processes, claims and conclusions
- communicate understandings, findings, arguments and conclusions.

Chemistry is the study of materials and their properties and structure.

Students study atomic theory, chemical bonding, and the structure and properties of elements and compounds. They explore intermolecular forces, gases, aqueous solutions, acidity and rates of reaction. They study equilibrium processes and redox reactions. They explore organic chemistry, synthesis and design to examine the characteristic chemical properties and chemical reactions displayed by different classes of organic compounds.

Students develop their appreciation of chemistry and its usefulness; understanding of chemical theories, models and chemical systems; expertise in conducting scientific investigations. They critically evaluate and debate scientific arguments and claims in order to solve problems and generate informed, responsible and ethical conclusions, and communicate chemical understanding and findings through the use of appropriate representations, language and nomenclature.

Students learn and apply aspects of the knowledge and skills of the discipline (thinking, experimentation, problem-solving and research skills), understand how it works and how it may impact society.

Pathways

A course of study in Chemistry can establish a basis for further education and employment in the fields of forensic science, environmental science, engineering, medicine, pharmacy and sports science.

Objectives

By the conclusion of the course of study, students will:

- describe and explain scientific concepts, theories, models and systems and their limitations
- apply understanding of scientific concepts, theories, models and systems within their limitations
- analyse evidence
- interpret evidence

Marine Science
General senior subject

Marine Science provides opportunities for students to study an interdisciplinary science focusing on marine environments and the consequences of human influences on ocean resources.

Students develop their understanding of oceanography. They engage with the concept of marine biology. They study coral reef ecology, changes to the reef and the connectivity between marine systems. This knowledge is linked with ocean issues and resource management where students apply knowledge to consider the future of our oceans and techniques for managing fisheries.

Students learn and apply aspects of the knowledge and skills of the discipline (thinking, experimentation, problem-solving and research skills), understand how it works and how it may impact society.

Pathways
A course of study in Marine Science can establish a basis for further education and employment in the fields of marine sciences, biotechnology, aquaculture, environmental rehabilitation, biosecurity, quarantine, conservation and sustainability.

Objectives
By the conclusion of the course of study, students will:

- describe and explain scientific concepts, theories, models and systems and their limitations
- apply understanding of scientific concepts, theories, models and systems within their limitations
- analyse evidence
- interpret evidence
- investigate phenomena
- evaluate processes, claims and conclusions

**MARINE SCIENCE - General Senior Subject**

**Invoiced Fees:** $150 per year: Marine excursions, transport & activities, fishing & kayaking

NOTE: Marine camp is NOT included in this fee.

INVOICED FEES FOR THIS SUBJECT MUST BE PAID IN FULL ON OR BEFORE 1 NOVEMBER 2018 ALONG WITH FULL/INSTALMENT PAYMENT OF 2019 STUDENT RESOURCE SCHEME TO ENSURE PLACEMENT INTO THE SUBJECT. NON-REFUNDABLE AFTER COURSE COMMENCEMENT. STUDENTS WISHING TO ENTER THIS SUBJECT/PROGRAM AFTER THIS DATE ARE REQUIRED TO PAY IN FULL AT ENROLMENT INTERVIEW OR PRIOR TO SUBJECT CHANGE FINAL APPROVAL.
Physics
General senior subject

Physics provides opportunities for students to engage with classical and modern understandings of the universe.

Students learn about the fundamental concepts of thermodynamics, electricity and nuclear processes; and about the concepts and theories that predict and describe the linear motion of objects. Further, they explore how scientists explain some phenomena using an understanding of waves. They engage with the concept of gravitational and electromagnetic fields, and the relevant forces associated with them. They study modern physics theories and models that, despite being counterintuitive, are fundamental to our understanding of many common observable phenomena.

Students develop appreciation of the contribution physics makes to society: understanding that diverse natural phenomena may be explained, analysed and predicted using concepts, models and theories that provide a reliable basis for action; and that matter and energy interact in physical systems across a range of scales. They understand how models and theories are refined, and new ones developed in physics; investigate phenomena and solve problems; collect and analyse data; and interpret evidence. Students use accurate and precise measurement, valid and reliable evidence, and scepticism and intellectual rigour to evaluate claims; and communicate physics understanding, findings, arguments and conclusions using appropriate representations, modes and genres.

Students learn and apply aspects of the knowledge and skills of the discipline (thinking, experimentation, problem-solving and research skills), understand how it works and how it may impact society.

Pathways
A course of study in Physics can establish a basis for further education and employment in the fields of science, engineering, medicine and technology.

Objectives
By the conclusion of the course of study, students will:

- describe and explain scientific concepts, theories, models and systems and their limitations
- apply understanding of scientific concepts, theories, models and systems within their limitations
- analyse evidence
- interpret evidence
- investigate phenomena
- evaluate processes, claims and conclusions
- communicate understandings, findings, arguments and conclusions.

Aquatic Practices provides opportunities for students to explore, experience and learn practical skills and knowledge valued in aquatic workplaces and other settings.

Students gain insight into the management of aquatic regions and their ecological and environmental systems, helping them to position themselves within a long and sustainable tradition of custodianship.

Students have opportunities to learn in, through and about aquatic workplaces, events and other related activities. Additional learning links to an understanding of the employment, study and recreational opportunities associated with communities who visit, live or work on and around our waterways.

Pathways
A course of study in Aquatic Practices can establish a basis for further education and employment in the fields of recreation, tourism, fishing and aquaculture. The subject also provides a basis for participating in and contributing to community associations, events and activities, such as yacht and sailing club races and competitions and boating shows.

Objectives
By the conclusion of the course of study, students should:

- describe concepts and ideas in aquatic contexts
- explain concepts and ideas in aquatic contexts
- demonstrate skills in aquatic contexts
- analyse information, situations and relationships in aquatic contexts
- apply knowledge, understanding and skills in aquatic contexts
- use language conventions and features appropriate to aquatic contexts to communicate ideas and information, according to purpose
- generate plans and procedures for activities in aquatic contexts
- evaluate the safety and effectiveness of activities in aquatic contexts
- make recommendations for activities in aquatic contexts.
Structure

The Aquatic Practices course is designed around:

- the four areas of study with the core topics for ‘Safety and management practices’ embedded in each of the four areas of study
- schools determine whether to include elective topics in a course of study.

<table>

</tbody>
</table>
Assessment

For Aquatic Practices, assessment from Units 3 and 4 is used to determine the student’s exit result, and consists of four instruments, including no more than two assessment instruments from any one technique.

<table>
<thead>
<tr>
<th>Project</th>
<th>Investigation</th>
<th>Extended response</th>
<th>Examinatio n</th>
<th>Performance</th>
</tr>
</thead>
<tbody>
<tr>
<td>A response to a single task, situation and/or scenario.</td>
<td>A response that includes locating and using information beyond students’ own knowledge and the data they have been given.</td>
<td>A technique that assesses the interpretation, analysis/examination and/or evaluation of ideas and information in provided stimulus materials.</td>
<td>A response that answers a number of provided questions, scenarios and/or problems.</td>
<td>A technique that assesses physical demonstrations as outcomes of applying a range of cognitive, technical and physical skills.</td>
</tr>
</tbody>
</table>

At least two different components from the following:
- written: 500–900 words
- spoken: 2½–3½ minutes
- multimodal: 3–6 minutes
- performance: continuous class time
- product: continuous class time.

Presented in one of the following modes:
- written: 600–1000 words
- spoken: 3–4 minutes
- multimodal: 4–7 minutes.

Presented in one of the following modes:
- written: 600–1000 words
- spoken: 3–4 minutes
- multimodal: 4–7 minutes.

- 60–90 minutes
- 50–250 words per item
- performance: continuous class time to develop and practice the performance.

AQUATIC PRACTICS - Applied Senior Subject

Invoiced Fees:

$350 per year: Surfing, kayaking, snorkelling excursions and equipment, transport and entry to venues, access to boating/fishing equipment, and certification for boat licence/bronze medallion and outside provider fees for Certificate II In Public Safety (Aquatic Rescue).

INVOICED FEES FOR THIS SUBJECT MUST BE PAID IN FULL ON OR BEFORE 1 NOVEMBER 2018 ALONG WITH FULL/INSTALMENT PAYMENT OF 2019 STUDENT RESOURCE SCHEME TO ENSURE PLACEMENT INTO THE SUBJECT. NON-REFUNDABLE AFTER COURSE COMMENCEMENT. STUDENTS WISHING TO ENTER THIS SUBJECT/PROGRAM AFTER THIS DATE ARE REQUIRED TO PAY IN FULL AT ENROLMENT INTERVIEW OR PRIOR TO SUBJECT CHANGE FINAL APPROVAL.
Japanese provides students with the opportunity to reflect on their understanding of the Japanese language and the communities that use it, while also assisting in the effective negotiation of experiences and meaning across cultures and languages. Students participate in a range of interactions in which they exchange meaning, develop intercultural understanding and become active participants in understanding and constructing written, spoken and visual texts.

Students communicate with people from Japanese-speaking communities to understand the purpose and nature of language and to gain understanding of linguistic structures. They acquire language in social and cultural settings and communicate across a range of contexts for a variety of purposes.

Students experience and evaluate a range of different text types; reorganise their thinking to accommodate other linguistic and intercultural knowledge and textual conventions; and create texts for a range of contexts, purposes and audiences.

Pathways

A course of study in Japanese can establish a basis for further education and employment in many professions and industries, particularly those where the knowledge of an additional language and the intercultural understanding it encompasses could be of value, such as business, hospitality, law, science, technology, sociology and education.

Objectives

By the conclusion of the course of study, students will:

- comprehend Japanese to understand information, ideas, opinions and experiences
- identify tone, purpose, context and audience to infer meaning, values and attitudes
- analyse and evaluate information and ideas to draw conclusions and justify opinions, ideas and perspectives
- apply knowledge of Japanese language elements, structures and textual conventions to convey meaning appropriate to context, purpose, audience and cultural conventions
- structure, sequence and synthesise information to justify opinions, ideas and perspectives
- use strategies to maintain communication and exchange meaning in Japanese.

Drama fosters creative and expressive communication. It interrogates the human experience by investigating, communicating and embodying stories, experiences, emotions and ideas that reflect the human experience. It engages students in imaginative meaning-making processes and involves them using a range of artistic skills as they make and respond to dramatic works.

Students experience, reflect on, understand, communicate, collaborate and appreciate different perspectives of themselves, others and the world in which they live. They learn about the dramatic languages and how these contribute to the creation, interpretation and critique of dramatic action and meaning for a range of purposes. They study a range of forms, styles and their conventions in a variety of inherited traditions, current practice and emerging trends, including those from different cultures and contexts.

Students learn how to engage with dramatic works as both artists and audience through the use of critical literacies. The study of drama develops students’ knowledge, skills and understanding in the making of and responding to dramatic works to help them realise their creative and expressive potential as individuals. Students learn to pose and solve problems, and work independently and collaboratively.

Pathways
A course of study in Drama can establish a basis for further education and employment in the field of drama, and to broader areas in creative industries and cultural institutions, including arts administration and management, communication, education, public relations, research and science and technology.

Objectives
By the conclusion of the course of study, students will:

- demonstrate an understanding of dramatic languages
- apply literacy skills
- apply and structure dramatic languages
- analyse how dramatic languages are used to create dramatic action and meaning
- interpret purpose, context and text to communicate dramatic meaning
- manipulate dramatic languages to create dramatic action and meaning
- evaluate and justify the use of dramatic languages to communicate dramatic meaning
- synthesise and argue a position about dramatic action and meaning.

Film, Television & New Media fosters creative and expressive communication. It explores the five key concepts of technologies, representations, audiences, institutions and languages.

Students learn about film, television and new media as our primary sources of information and entertainment. They understand that film, television and new media are important channels for educational and cultural exchange, and are fundamental to our self-expression and representation as individuals and as communities.

Students creatively apply film, television and new media key concepts to individually and collaboratively make moving-image media products, and investigate and respond to moving-image media content and production contexts. Students develop a respect for diverse perspectives and a critical awareness of the expressive, functional and creative potential of moving-image media in a diverse range of global contexts. They develop knowledge and skills in creative thinking, communication, collaboration, planning, critical analysis, and digital and ethical citizenship.

Objectives
By the conclusion of the course of study, students will:

- explain the features of moving-image media content and practices
- symbolise conceptual ideas and stories
- construct proposals and construct moving-image media products
- apply literacy skills
- analyse moving-image products and contexts of production and use
- structure visual, audio and text elements to make moving-image media products
- experiment with ideas for moving-image media products
- appraise film, television and new media products, practices and viewpoints
- synthesise visual, audio and text elements to solve conceptual and creative problems.

Pathways
A course of study in Film, Television & New Media can establish a basis for further education and employment in the fields of information technologies, creative industries, cultural institutions, and diverse fields that use skills inherent in the subject, including advertising, arts administration and management, communication, design, education, film and television, and public relations.

FILM TELEVISION & NEW MEDIA - General Senior Subject

Invoiced Fees: $125 per year: Cameras equipment, filming lab

INVOICED FEES FOR THIS SUBJECT MUST BE PAID IN FULL ON OR BEFORE 1 NOVEMBER 2018 ALONG WITH FULL/INSTALMENT PAYMENT OF 2019 STUDENT RESOURCE SCHEME TO ENSURE PLACEMENT INTO THE SUBJECT. NON-REFUNDABLE AFTER COURSE COMMENCEMENT. STUDENTS WISHING TO ENTER THIS SUBJECT/PROGRAM AFTER THIS DATE ARE REQUIRED TO PAY IN FULL AT ENROLMENT INTERVIEW OR PRIOR TO SUBJECT CHANGE FINAL APPROVAL.
Music
General senior subject

Music fosters creative and expressive communication. It allows students to develop musicianship through making (composition and performance) and responding (musicology).

Through composition, performance and musicology, students use and apply music elements and concepts. They apply their knowledge and understanding to convey meaning and/or emotion to an audience.

Students use essential literacy skills to engage in a multimodal world. They demonstrate practical music skills, and analyse and evaluate music in a variety of contexts, styles and genres.

Pathways
A course of study in Music can establish a basis for further education and employment in the fields of arts administration, communication, education, creative industries, public relations and science and technology.

Objectives
By the conclusion of the course of study, students will:
- demonstrate technical skills
- explain music elements and concepts
- use music elements and concepts
- analyse music
- apply compositional devices
- apply literacy skills
- interpret music elements and concepts
- evaluate music to justify the use of music elements and concepts
- realise music ideas
- resolve music ideas.

Music Extension (Composition) is an extension of the Music General senior syllabus. It provides an opportunity for students with specific abilities in music to extend their expertise. Students select one specialisation only, and follow an individual program of study designed to continue the development of refined musicianship skills. Music Extension encourages students to investigate music concepts and ideas relevant to their specialisation.

In the Composition specialisation (making), students create and resolve new music works. They demonstrate use of music concepts and manipulate music concepts to express meaning and/or emotion to an audience through resolved compositions.

Pathways
A course of study in Music Extension can establish a basis for further education and employment in the fields of arts administration, communication, education, creative industries, public relations and science and technology.

Objectives
By the conclusion of the course of study, students will:
• apply literary skills
• evaluate music and ideas about music
• examine music and ideas about music
• express meaning, emotion or ideas about music
• apply compositional devices
• manipulate music elements and concepts
• resolve music ideas.

Music Extension (Performance) is an extension of the Music General senior syllabus. It provides an opportunity for students with specific abilities in music to extend their expertise. Students select one specialisation only, and follow an individual program of study designed to continue the development of refined musicianship skills. Music Extension encourages students to investigate music concepts and ideas relevant to their specialisation.

In the Performance specialisation (making), students realise music works, demonstrating technical skills and understanding. They make decisions about music, interpret music elements and concepts, and express music ideas to realise their performances.

Pathways

A course of study in Music Extension can establish a basis for further education and employment in the fields of arts administration, communication, education, creative industries, public relations and science and technology.

Objectives

By the conclusion of the course of study, students will:
- apply literary skills
- evaluate music and ideas about music
- examine music and ideas about music
- express meaning, emotion or ideas about music
- apply technical skills
- interpret music elements and concepts
- realise music ideas.

Visual Art provides students with opportunities to understand and appreciate the role of visual art in past and present traditions and cultures, as well as the contributions of contemporary visual artists and their aesthetic, historical and cultural influences. Students interact with artists, artworks, institutions and communities to enrich their experiences and understandings of their own and others’ art practices.

Students have opportunities to construct knowledge and communicate personal interpretations by working as both artist and audience. They use their imagination and creativity to innovatively solve problems and experiment with visual language and expression.

Through an inquiry learning model, students develop critical and creative thinking skills. They create individualised responses and meaning by applying diverse materials, techniques, technologies and art processes.

In responding to artworks, students employ essential literacy skills to investigate artistic expression and critically analyse artworks in diverse contexts. They consider meaning, purposes and theoretical approaches when ascribing aesthetic value and challenging ideas.

Pathways

A course of study in Visual Art can establish a basis for further education and employment in the fields of arts practice, design, craft, and information technologies; broader areas in creative industries and cultural institutions; and diverse fields that use skills inherent in the subject, including advertising, arts administration and management, communication, design, education, galleries and museums, film and television, public relations, and science and technology.

Objectives

By the conclusion of the course of study, students will:

- implement ideas and representations
- apply literacy skills
- analyse and interpret visual language, expression and meaning in artworks and practices
- evaluate art practices, traditions, cultures and theories
- justify viewpoints
- experiment in response to stimulus
- create meaning through the knowledge and understanding of materials, techniques, technologies and art processes
- realise responses to communicate meaning.

Dance in Practice focuses on experiencing and understanding the role of dance in and across communities and, where possible, interacting with practising performers, choreographers and designers.

Students create, perform and produce dance works in class, school and community contexts, and use their senses as a means of understanding and responding to their own and others’ dance works. This fosters creativity, helps students develop problem-solving skills, and heightens their imaginative, emotional, aesthetic, analytical and reflective experiences.

Students explore and apply techniques, processes and technologies individually and in groups to express dance ideas that serve particular purposes. Students explore safe dance practices for themselves and groups. They gain practical and technical skills, employ terminology specific to dance, investigate ways to solve problems, and make choices to communicate through dance and about dance.

Pathways
A course of study in Dance in Practice can establish a basis for further education and employment in dance education, dance teaching, choreography, performance and event production.

Objectives
By the conclusion of the course of study, students should:

- recall terminology, concepts and ideas associated with dance
- interpret and demonstrate the technical and expressive skills required for dance genres
- explain dance and dance works
- apply dance concepts and ideas through performance and production of dance works
- analyse dance concepts and ideas for particular purposes, genres, styles and contexts
- use language conventions and features to achieve particular purposes
- generate, plan and modify creative processes to produce dance works
- create communications and make decisions to convey meaning to audiences
- evaluate dance works.

Structure
The Dance in Practice course is designed around core and elective topics. Students explore at least two dance genres across Units 1 and 2 and again in Units 3 and 4, and three genres across the four units.

<td>A technique that assesses the interpretation, analysis/examination and/or evaluation of ideas and information in provided stimulus materials.</td>
<td>A response that includes locating and using information beyond students’ own knowledge and the data they have been given.</td>
</tr>
</tbody>
</table>

The Project in Dance in Practice requires:

- a dance performance: 1½ – 2 minutes
- at least one other component from the following
  - written: 500–900 words
  - spoken: 2½–3½ minutes
  - multimodal
    - non-presentation: 8 A4 pages max (or equivalent)
    - presentation: 3–6 minutes
- product: variable conditions.

- Dance performance: 2–3 minutes
- Production performance: variable conditions
- Teaching performance: variable conditions
- Design solution and folio: variable conditions
- Choreographic work: 2–3 minutes
- Presented in one of the following modes:
  - written: 600–1000 words
  - spoken: 3–4 minutes
  - multimodal
    - non-presentation: 10 A4 pages max (or equivalent)
    - presentation: 4–7 minutes.

- Presented in one of the following modes:
  - written: 600–1000 words
  - spoken: 3–4 minutes
  - multimodal
    - non-presentation: 10 A4 pages max (or equivalent)
    - presentation: 4–7 minutes.
Drama in Practice
Applied senior subject

Drama in Practice gives students opportunities to plan, create, adapt, produce, perform, appreciate and evaluate a range of dramatic works or events in a variety of settings.

Students participate in learning activities that apply knowledge and develop creative and technical skills in communicating meaning to an audience.

Students learn essential workplace health and safety procedures relevant to the drama and theatre industry, as well as effective work practices and industry skills needed by a drama practitioner.

Pathways
A course of study in Drama in Practice can establish a basis for further education and employment in the drama and theatre industry in areas such as performance, theatre management and promotions.

Objectives
By the conclusion of the course of study, students should:

- identify and explain dramatic principles and practices
- interpret and explain dramatic works and dramatic meanings
- demonstrate dramatic principles and practices
- apply dramatic principles and practices when engaging in drama activities and/or with dramatic works
- analyse the use of dramatic principles and practices to communicate meaning for a purpose
- use language conventions and features and terminology to communicate ideas and information about drama, according to purposes
- plan and modify dramatic works using dramatic principles and practices to achieve purposes
- create dramatic works that convey meaning to audiences
- evaluate the application of dramatic principles and practices to drama activities or dramatic works.

Structure
The Drama in Practice course is designed around core and elective topics.

  - presentation: 4–7 minutes.
Media Arts in Practice focuses on the role media arts plays in the community in reflecting and shaping society’s values, attitudes and beliefs. It provides opportunities for students to create and share media artworks that convey meaning and express insight.

Students learn how to apply media technologies in real-world contexts to solve technical and/or creative problems. When engaging with school and/or local community activities, they gain an appreciation of how media communications connect ideas and purposes with audiences. They use their knowledge and understanding of design elements and principles to develop their own works and to evaluate and reflect on their own and others’ art-making processes and aesthetic choices.

Students learn to be ethical and responsible users of and advocates for digital technologies, and aware of the social, environmental and legal impacts of their actions and practices.

Pathways

A course of study in Media Arts in Practice can establish a basis for further education and employment in a dynamic, creative and global industry that is constantly adapting to new technologies.

Objectives

By the conclusion of the course of study, students should:

- identify and explain media art-making processes
- interpret information about media arts concepts and ideas for particular purposes
- demonstrate practical skills, techniques and technologies required for media arts
- organise and apply media art-making processes, concepts and ideas
- analyse problems within media arts contexts
- use language conventions and features to communicate ideas and information about media arts, according to context and purpose
- plan and modify media artworks using media art-making processes to achieve purposes
- create media arts communications that convey meaning to audiences
- evaluate media art-making processes and media artwork concepts and ideas.

Music in Practice gives students opportunities to engage with music and music productions, and, where possible, interact with practising artists.

Students are exposed to authentic music practices in which they learn to view the world from different perspectives, and experiment with different ways of sharing ideas and feelings. They gain confidence and self-esteem, and contribute to the social and cultural lives of their school and local community. They gain practical, technical and listening skills to communicate in and through their music.

Students explore and engage with the core of music principles and practices as they create, perform, produce and respond to their own and others’ music works in class, school and community settings. They learn about workplace health and safety (WHS) issues relevant to the music industry and effective work practices that lead to the acquisition of industry skills needed by a practising musician.

Pathways
A course of study in Music in Practice can establish a basis for further education and employment in areas such as performance, critical listening, music management and music promotions.

Objectives
By the conclusion of the course of study, students should:

- identify and explain music principles and practices
- interpret music principles and practices
- demonstrate music principles and practices
- apply technical and expressive skills to performance and production of music works
- analyse the use of music principles and practices in their own and others’ music works
- use language conventions and features to communicate ideas and information about music, according to context and purpose
- plan and modify music works using music principles and practices to achieve purposes
- create music works to communicate music ideas to audiences
- evaluate the application of music principles and practices to music works and music activities.

Structure
The Music in Practice course is designed around core and elective topics.

Visual Arts in Practice focuses on students engaging in art-making processes and making virtual or physical visual artworks. Visual artworks are created for a purpose and in response to individual, group or community needs.

Students explore and apply the materials, technologies and techniques used in art-making. They use information about design elements and principles to influence their own aesthetic and guide how they view others’ works. They also investigate information about artists, art movements and theories, and use the lens of a context to examine influences on art-making.

Students reflect on both their own and others’ art-making processes. They integrate skills to create artworks and evaluate aesthetic choices. Students decide on the best way to convey meaning through communications and artworks. They learn and apply safe visual art practices.

Pathways
A course of study in Visual Arts in Practice can establish a basis for further education and employment in a range of fields, including design, styling, decorating, illustrating, drafting, visual merchandising, make-up artistry, advertising, game design, photography, animation or ceramics.

Objectives
By the conclusion of the course of study, students should:

- recall terminology and explain art-making processes
- interpret information about concepts and ideas for a purpose
- demonstrate art-making processes required for visual artworks
- apply art-making processes, concepts and ideas
- analyse visual art-making processes for particular purposes
- use language conventions and features to achieve particular purposes
- generate plans and ideas and make decisions
- create communications that convey meaning to audiences
- evaluate art-making processes, concepts and ideas.
